•  Pres. Obama Delivers a Statement on the Ferguson Grand Jury’s Decision Not to Bring Charges (2014)
Preface

In This Edition

Teachers familiar with previous editions of American Stories will find that this fourth edition expands impressively on its predecessors. The major changes include:

Revel for American Stories

Revel™ is an interactive learning environment that deeply engages students and prepares them for class. Media and assessment integrated directly within the authors’ narrative lets students read, explore interactive content, and practice in one continuous learning path. Thanks to the dynamic reading experience in Revel, students come to class prepared to discuss, apply, and learn from instructors and from each other.

Learn More about Revel

Rather than simply offering opportunities to read about and study U.S. history, Revel facilitates deep, engaging interactions with the concepts that matter most. By providing opportunities to improve skills in analyzing and interpreting sources of historical evidence, for example, Revel engages students directly and immediately, which leads to a better understanding of course material. A wealth of student and instructor resources and interactive materials can be found within Revel. Some of our favorites are mentioned in the information that follows.

For more information about all the tools and resources in Revel and access to your own Revel account for American Stories, go to www.pearsonhighered.com/revel.

American Stories, 4e, features many of the dynamic interactive elements that make Revel unique. In addition to the rich narrative content, American Stories includes the following:

• Engaging Video Program:
  • Chapter opening videos. These videos capture the attention of today’s students and provide a brief introduction to the key themes and content in the chapter.
  • Author guided videos. Videos, featuring author Bill Brands, presented in a friendly and inviting style, provide learners with complementary and compelling content not in the narrative.
  • Artifacts as Evidence videos. Created in partnership with the Smithsonian Institution, these videos focus on a wide range of unique artifacts from the Smithsonian collection, using these artifacts as starting points for explaining and illuminating the American historical experience.

• Charting the Past modules combine interactive maps, documents, and images to create in-depth opportunities for students to explore the relationship between geography, demography, and history.

• Key Term Definitions: Key Terms appear in bold and include pop-up definitions inline that allow students to see the meaning of a word or phrase while reading the text, providing context.

• Interactive Maps: Interactive maps throughout the text include a pan/zoom feature and an additional feature that allows students to toggle on and off map details.

• Assessments: Multiple-choice end-of-module and end-of-chapter quizzes test student’s knowledge of the chapter content, including dates, concepts, and major events.

• Chapter Review: The Chapter Review—which contains a timeline, Key Term flashcards, an image gallery, video gallery and review questions—is laid out using interactive features that allow students to click on specific topics to learn more or test their knowledge about concepts covered in the chapter.

• Source Collections: An end-of-chapter source collection includes three to five documents relevant to the chapter content. Each document includes header notes, questions, and audio. Students can highlight and make notes on the documents.

• Journal Prompts: Revel is rich in opportunities for writing about topics and concepts and the Journal Prompts included are one way in which students can explore themes presented in the chapter. The ungraded Journal Prompts are included inline with content and can be shared with instructors.

• Shared Writing Prompts: These prompts provide peer-to-peer feedback in a discussion board, developing critical thinking skills and fostering collaboration among a specific class. These prompts appear between modules.

• Essay Prompts: These prompts appear in Pearson’s Writing Space and can be assigned and graded by instructors.
ENGAGE STUDENTS AND IMPROVE CRITICAL THINKING

- Chapter introductory vignettes
- Chapter images, maps, and figures are bigger, visually interesting, and informative. Photographs and pieces of fine art encapsulate emotional and historical meaning. Captions provide valuable information that allows for a fuller understanding of the people who lived the American story.
- Quick Check Questions give students the opportunity to review as they read, leading to a more complete understanding of chapter content.

SUPPORT INSTRUCTORS

- Learning Objective questions highlight the important issues and themes. Each is linked to one of the chapter’s main sections, and they are all emphasized in the chapter overview.
- Key Terms throughout the chapters highlight important topics as they are introduced.
- The thematic timeline ending each chapter reinforces the essential points of the narrative.

SUPPLEMENTS FOR INSTRUCTORS

Instructor’s Resource Center. www.pearsonhighered.com/irc. This website provides instructors with additional text-specific resources that can be downloaded for classroom use. Resources include the Instructor’s Resource Manual, PowerPoint presentations, and the Test Bank. Register online for access to the resources for American Stories.

Instructor’s Resource Manual. Available at the Instructor’s Resource Center for download, www.pearsonhighered.com/irc, the Instructor’s Resource Manual includes an Introduction to Revel section that walks the user through the Revel product using screen shots that identify and explain the numerous Revel features, detailed chapter overviews, and discussion questions.

Test Bank. Available at the Instructor’s Resource Center for download, www.pearsonhighered.com/irc, the Test Bank contains more than 1,700 multiple-choice, and essay test questions.

PowerPoint Presentations. Strong PowerPoint presentations make lectures more engaging for students. Available at the Instructor’s Resource Center for download, www.pearsonhighered.com/irc, the PowerPoints contain chapter outlines and full-color images of maps and art. All PowerPoints are ADA compliant.

MyTest Test Bank. Available at www.pearsonmytest.com, MyTest is a powerful assessment generation program that helps instructors easily create and print quizzes and exams. Questions and tests can be authored online, allowing instructors ultimate flexibility and the ability to efficiently manage assessments anytime, anywhere! Instructors can easily access existing questions and edit, create, and store using simple drag-and-drop and Word-like controls.
A Note to My Fellow Teachers

H.W. Brands I’ve been teaching American history for thirty-five years now, and in that time I’ve noticed something. Our students come to our classrooms with increasingly varied backgrounds. Some students are better prepared, having taken AP courses and acquired a solid grounding in historical facts, interpretations, and methods. Other students arrive less well prepared. Many of these are international students; some are students for whom English is a second or third language. Some of these, and some others, simply never took American history in high school.

Different students require different methods of teaching. Students well versed in American history do best with a book that presupposes their preparation and takes them beyond it. Students for whom the subject is new or otherwise challenging are more likely to succeed with a book that focuses on essential themes, and offers features designed to facilitate the learning process. Any textbook can be intimidating, as even my best students have reminded me over the years. For that reason, whatever reduces the intimidation factor can help students succeed.

This is the philosophy behind American Stories: A History of the United States. A single purpose has motivated the creation of this book: to enhance the accessibility of American history and thereby increase students’ chances of success. This goal is what brought me to the classroom, and it’s one I think I share with you. If American Stories: A History of the United States contributes to achieving this goal, we all—teachers and students—will be the winners.

The most frequent complaint I get from students regarding history textbooks is that the mass of information is overwhelming. This complaint provided the starting point for American Stories, which differs from standard textbooks in two fundamental respects.

First, we reduced the number of topics covered, only retaining the essential elements of the American story. We surveyed over five hundred instructors from across the country to find out what topics were most commonly covered in a typical survey classroom. Once we received the results, we culled the most commonly taught topics and selected them for inclusion in American Stories.

Second, we integrated a variety of study aids into the text. These were originally developed with the assistance of Dr. Kathleen T. McWhorter and Debby Kalk. Kathleen is a professor and author with more than 40 years of experience who specializes in developmental reading, writing, composition, and study skills. Debby is an instructional designer and author with more than 20 years of experience producing materials. With the help of both Kathleen and Debby, American Stories is the first college-level U.S. history survey designed to meet the needs of the instructor and the student.

Beyond this, American Stories places great emphasis on a compelling narrative. We—I and my fellow authors—have used significant incidents and episodes to reflect the dilemmas, the choices, and the decisions made by the American people as well as by their leaders. Our story of the American past includes the major events that have shaped the nation. We examine the ways in which the big events influenced the lives of ordinary people. How did the American Revolution alter the fortunes and prospects of men, women, and children around the country? What was it like for blacks and whites to live in a plantation society?

Each chapter begins with a vignette that launches the narrative of that chapter and identifies its themes. Some of the vignettes have special meaning for the authors. The vignette that opens Chapter 26, on the Great Depression of the 1930s, reminds me of the stories my father used to tell about his experiences during that trying decade. His family wasn’t nearly as hard hit as many in the 1930s; like Pauline Kael, he was a college student and like her, he saw how hard it was for many of his classmates to stay in school. He himself was always working at odd jobs, trying to make ends meet. Times were hard, yet he learned the value of a dollar—something he impressed on me as I was growing up.

By these means and others, I and my fellow authors have attempted to bring history to life for students. We believe that while history rarely repeats itself, the story of the American past is profoundly relevant to the problems and challenges facing the nation today.

Pedagogical Features

The pedagogical elements in American Stories have been carefully constructed to be accessible to students and to support a better, deeper understanding of U.S. history. These elements fall into two categories, Narrative Pedagogy that appears throughout the main body of each chapter, and Study Resources collected at the ends of chapters.

- **Narrative Pedagogy** Each chapter follows a consistent pedagogy that maximizes student learning. **Focus Questions** in the chapter openers preview the main idea for each major section and provide a framework for the entire chapter. As a reminder to students, these
questions are repeated in the margins after each major section. Quick Check Questions follow each subsection for immediate reinforcement. Key Terms are highlighted throughout each chapter and are defined in the text’s glossary.

- **Study Resources** Each chapter concludes with series of study resources. A chapter Timeline surveys the chronology of key events with page references for easy look-up of information. The Chapter Review connects back to the Spotlight Questions, providing brief answers that summarize the main points of each section.

A FINAL WORD

My fellow authors and I, with the assistance of the professionals at Pearson, have devoted a great deal of effort to making a textbook of which we are all very proud. Our goal with American Stories is to convey our excitement for history to our students in the most accessible manner possible. We’ve done what we can toward this goal, but we realize that our success depends on you, the classroom instructors. Our job is to make your job easier. All of us—authors and instructors—are in this together. So keep up the good work, and thanks!
A Note to Students: Tips for Studying History

Nearly every semester for many years I have taught an introductory course in American history. Over that time I’ve come to appreciate the value of devoting the first class session to the fundamentals of studying and learning. Different students have different learning styles, but the experiences of the many students I’ve taught have convinced me that certain general techniques produce good results.

I always tell students that these techniques aren’t the only way to study; they may have their own methods. But I also tell them that these techniques have worked for a lot of students in the past, and might work for them. Here they are:

1. History is a story, not just an assortment of facts. The connections are critical. How do the events and people you are reading or hearing about relate to one another? This is what historians want to know. Therefore:
   - Find the story line, the plot. Identify the main characters, the turning points. How did the story turn out? Why did it turn out that way and not some other?

2. Dates matter, but order matters more. Students often get the idea that history is all about dates. It’s not. It’s about what caused what (as in a story: see Rule 1 above). Dates are useful only in that they help you remember what happened before what else. This is crucial, because the thing that came first might have caused, or at least influenced, the thing that came later. Therefore:
   - Concentrate on the order of events. If you do, the dates will fall into place by themselves.

3. History takes time—to happen, and to learn. History is a story. But like any richly detailed story, it can take time to absorb. Therefore:
   - Spread out your studying. If you have three hours of reading to do, do it over three days for an hour a day. If you have a test coming up, give yourself two weeks to study, allocating a half hour each day. You’ll learn more easily; you’ll retain more. And you’ll have a better chance to enjoy the story.

4. History’s stories are both spoken and written. That’s why most classes involve both lectures and readings. Therefore:
   - Read the assigned materials before the corresponding lectures. It’s tempting not to—to let the reading slide. But resist the temptation. Advance reading makes the lectures far more understandable—and far more enjoyable.

5. Less is more, at least in note-taking. Not every word in the text or lecture is equally important. The point of notes is to distill a chapter or a lecture into a smaller, more manageable size. Therefore:
   - Hit the high points. Focus on where the text and lecture overlap. Write down key phrases and words; don’t write complete sentences. And if you are using a highlighter on a book, be sparing.

6. History is a twice-told tale. History is both what happened and how we’ve remembered what happened. Think of your first exposure to a particular historical topic as history happening, and your second exposure as history being remembered. An awareness of both is necessary to making the history stick in your head. Therefore:
   - Take a rest after reading a chapter or attending a lecture. Then go back and review. Your class notes should not be comprehensive (see Rule 5), but as you go back over them, you will remember details that will help you fill out your notes. While you are reviewing a chapter, ask yourself what your notes on the chapter mean, and why you highlighted this particular phrase or that.

To summarize, when approaching a history course:

- Find the story line.
- Concentrate on the order of events.
- Spread out your studying.
- Read the assignments before the lectures.
- Hit the high points in taking notes.
- Take a rest, then review.

A final suggestion: Allow enough time for this course so you aren’t rushed. If you give yourself time to get into the story, you’ll come to enjoy it. And what you enjoy, you’ll remember.

Best wishes,

H. W. Brands

About the Authors

H.W. Brands Henry William Brands was born in Oregon, went to college in California, sold cutlery across the American West, and earned graduate degrees in mathematics and history in Oregon and Texas. He taught at Vanderbilt University and Texas A&M University before joining the faculty at the University of Texas at Austin, where he holds the Jack S. Blanton Sr. Chair in History. He writes on American history and politics, with books including The General vs. the President, Reagan, The Man Who Saved the Union, Traitor to His Class, Andrew Jackson, The Age of Gold, The First American, and TR. Several of his books have been bestsellers; two, Traitor to His Class and The First American, were finalists for the Pulitzer Prize. He lectures frequently on historical and current events, and can be seen and heard on national and international television and radio programs. His writings have been translated into Spanish, French, German, Russian, Chinese, Japanese, Korean, and Ukrainian.

Ariela Gross Ariela Gross is John B. and Alice R. Sharp Professor of Law and History, and Co-Director of the Center for Law, History and Culture, at the University of Southern California. She has been a visiting Professor at Stanford University, Tel Aviv University, the École des Hautes Études en Sciences Sociales, the Université de Paris 8, and Kyoto University. Her book What Blood Won’t Tell: A History of Race on Trial in America (Harvard University Press, 2008, ppb. 2010), a Choice Outstanding Academic Title for 2009, was awarded the J. Willard Hurst Prize for outstanding scholarship in sociolegal history by the Law and Society Association, the Lillian Smith Book Award for a book that illuminates the people and problems of the South, and the American Political Science Association’s award for the best book on race, ethnicity, and politics. Gross is also the author of Double Character: Slavery and Mastery in the Antebellum Southern Courtroom (Princeton University Press, 2000; ppb., University of Georgia Press, 2006), and numerous articles and book chapters. She edited a symposium in the February 2017 issue of Law and History Review on Slavery and The Boundaries of Legality, Past and Present. Her research has been supported by a John Simon Guggenheim Memorial Fellowship, an American Council for Learned Societies Collaborative Research Fellowship in 2017-19 and a Frederick J. Burkhardt Fellowship in 2003-04, a Stanford Center for the Advanced Study of the Behavioral Sciences Fellowship, as well as an NEH Long-Term Fellowship at the Huntington Library. She is currently working on a comparative history of law, race, slavery and freedom in the Americas with Alejandro De La Fuente, the Robert Woods Bliss Professor of Latin American History and Economics at Harvard University.

T. H. Breen T.H. Breen, currently the William Smith Mason Professor of American History at Northwestern University Emeritus, the James Marsh Professor At-Large at the University of Vermont, and the John Kluge Professor of American Law and Governance at the Library of Congress, received a Ph.D. from Yale University. At Northwestern, he was the founding director of the Kaplan Center for the Humanities and the Chabraja Center for Historical Studies. Breen has published eight books on Early American and Revolutionary History, including, “Marketplace of Revolution,” “American Insurgents: American Patriots,” and “George Washington’s Journey: The President Forges a New Nation.” His writings have won awards from the Historic Preservation Society, Society of Colonial Wars, and Society of the Cincinnati. Several foundations and libraries have supported his research: Institute for Advanced Study (Princeton), Humboldt Foundation, Guggenheim Foundation, National Endowment for the Humanities, Colonial Williamsburg, and Huntington Library. Breen has held appointments at the California Institute of Technology, Chicago University, Yale University, Oxford University, and Cambridge University. He is now completing a study of the American Revolution for Harvard University Press entitled “An Appeal to Heaven: The American Revolution.”

R. Hal Williams R. Hal Williams was professor of history emeritus at Southern Methodist University. He received his A.B. from Princeton University in 1963 and his Ph.D. from Yale University in 1968. His books include The Democratic Party and California Politics, 1880–1896 (1973); Years of
About the Authors

Williams has received grants from the American Philosophical Society and the National Endowment for the Humanities, and he has served on the Texas Committee for the Humanities. Mr. Williams passed away in February of 2016.

Acknowledgments

The authors acknowledge with special gratitude the efforts of those who helped make this revision a reality. H.W. Brands thanks his colleagues and students at the University of Texas at Austin. T.H. Breen extends his gratitude to Strother Roberts who played an integral role throughout the project. Ariela Gross recognizes James Bennett, Riaz Tejani and Randy Eisenberg who provided key research assistance. Finally, R. Hal Williams thanked Susan Harper, Billie Stovall, Dan Vest, and Peggy Varghese for their important help on previous editions the book. They offered ideas, sharpened the writing, and tracked down details that improved the narrative.
