# ABOUT THE **AUTHORS**

**Glenn Hubbard, policymaker, professor, and researcher.**

R. Glenn Hubbard is the dean and Russell L. Carson Professor of Finance and Economics in the Graduate School of Business at Columbia University and professor of economics in Columbia's Faculty of Arts and Sciences. He is also a research associate of the National Bureau of Economic Research and a director of Automatic Data Processing, Black Rock Closed-End Funds, and MetLife. He received a PhD in economics from Harvard University in 1983. From 2001 to 2003, he served as chair of the White House Council of Economic Advisers and chair of the

OECD Economic Policy Committee, and from 1991 to 1993, he was deputy assistant secretary of the U.S. Treasury Department. He currently serves as co-chair of the nonpartisan Committee on Capital Markets Regulation. Hubbard's fields of specialization are public economics, financial markets and institutions, corporate finance, macroeconomics, industrial organization, and public policy. He is the author of more than 100 articles in leading journals, including *American Economic Review*, *Brookings Papers on Economic Activity*, *Journal of Finance*, *Journal of Financial Economics*, *Journal of Money, Credit, and Banking*, *Journal of Political Economy*, *Journal of Public Economics*, *Quarterly Journal of Economics*, *RAND Journal of Economics*, and *Review of Economics and Statistics*. His research has been supported by grants from the National Science Foundation, the National Bureau of Economic Research, and numerous private foundations.

**Tony O'Brien, award-winning professor and researcher.**

Anthony Patrick O'Brien is a professor of economics at Lehigh University. He received a PhD from the University of California, Berkeley, in 1987. He has taught principles of economics for more than 20 years, in both large sections and small honors classes. He received the Lehigh University Award for Distinguished Teaching. He was formerly the director of the Diamond Center for Economic Education and was named a Dana Foundation Faculty Fellow and Lehigh Class of 1961 Professor of Economics. He has been a visiting professor at the University of

California, Santa Barbara, and the Graduate School of Industrial Administration at Carnegie Mellon University. O'Brien's research has dealt with issues such as the evolution of the U.S. automobile industry, the sources of U.S. economic competitiveness, the development of U.S. trade policy, the causes of the Great Depression, and the causes of black-white income differences. His research has been published in leading journals, including *American Economic Review*, *Quarterly Journal of Economics*, *Journal of Money, Credit, and Banking*, *Industrial Relations*, *Journal of Economic History*, and *Explorations in Economic History*. His research has been supported by grants from government agencies and private foundations.

# BRIEF CONTENTS

Preface	P-1
A Word of Thanks	P-28

## PART 1 Introduction

<b>Chapter 1:</b> Economics: Foundations and Models	2
Appendix: Using Graphs and Formulas	28
<b>Chapter 2:</b> Trade-offs, Comparative Advantage, and the Market System	40
<b>Chapter 3:</b> Where Prices Come From: The Interaction of Demand and Supply	72
<b>Chapter 4:</b> Economic Efficiency, Government Price Setting, and Taxes	108
Appendix: Quantitative Demand and Supply Analysis	141

## PART 2 Markets in Action: Policy and Applications

<b>Chapter 5:</b> Externalities, Environmental Policy, and Public Goods	146
<b>Chapter 6:</b> Elasticity: The Responsiveness of Demand and Supply	182
<b>Chapter 7:</b> The Economics of Health Care	218

## PART 3 Firms in the Domestic and International Economies

<b>Chapter 8:</b> Firms, the Stock Market, and Corporate Governance	252
Appendix: Tools to Analyze Firms' Financial Information	278
<b>Chapter 9:</b> Comparative Advantage and the Gains from International Trade	288

## PART 4 Microeconomic Foundations: Consumers and Firms

<b>Chapter 10:</b> Consumer Choice and Behavioral Economics	324
Appendix: Using Indifference Curves and Budget Lines to Understand Consumer Behavior	358
<b>Chapter 11:</b> Technology, Production, and Costs	372
Appendix: Using Isoquants and Isocost Lines to Understand Production and Cost	402

## PART 5 Market Structure and Firm Strategy

<b>Chapter 12:</b> Firms in Perfectly Competitive Markets	414
<b>Chapter 13:</b> Monopolistic Competition: The Competitive Model in a More Realistic Setting	450
<b>Chapter 14:</b> Oligopoly: Firms in Less Competitive Markets	478
<b>Chapter 15:</b> Monopoly and Antitrust Policy	506
<b>Chapter 16:</b> Pricing Strategy	538

## PART 6 Labor Markets, Public Choice, and the Distribution of Income

<b>Chapter 17:</b> The Markets for Labor and Other Factors of Production	562
<b>Chapter 18:</b> Public Choice, Taxes, and the Distribution of Income	600

## PART 7 Macroeconomic Foundations and Long-Run Growth

<b>Chapter 19:</b> GDP: Measuring Total Production and Income	636
<b>Chapter 20:</b> Unemployment and Inflation	662
<b>Chapter 21:</b> Economic Growth, the Financial System, and Business Cycles	702
<b>Chapter 22:</b> Long-Run Economic Growth: Sources and Policies	736

## PART 8 Short-Run Fluctuations

<b>Chapter 23:</b> Aggregate Expenditure and Output in the Short Run	776
Appendix: The Algebra of Macroeconomic Equilibrium	818
<b>Chapter 24:</b> Aggregate Demand and Aggregate Supply Analysis	820
Appendix: Macroeconomic Schools of Thought	858

**PART 9 Monetary and Fiscal Policy**

<b>Chapter 25:</b> Money, Banks, and the Federal Reserve System	862
<b>Chapter 26:</b> Monetary Policy	900
<b>Chapter 27:</b> Fiscal Policy	944
<b>Appendix:</b> A Closer Look at the Multiplier	989
<b>Chapter 28:</b> Inflation, Unemployment, and Federal Reserve Policy	994

**PART 10 The International Economy**

<b>Chapter 29:</b> Macroeconomics in an Open Economy	1028
<b>Chapter 30:</b> The International Financial System	1058
<b>Appendix:</b> The Gold Standard and the Bretton Woods System	1081
<b>Glossary</b>	<b>G-1</b>
<b>Company Index</b>	<b>I-1</b>
<b>Subject Index</b>	<b>I-3</b>
<b>Credits</b>	<b>C-1</b>

# CONTENTS

Preface	P-1	Graphs of Two Variables	30
A Word of Thanks	P-28	Slopes of Lines	31
		<b>Taking into Account More Than Two Variables on a Graph</b>	<b>32</b>
		Positive and Negative Relationships	32
		Determining Cause and Effect	34
		Are Graphs of Economic Relationships Always Straight Lines?	35
		Slopes of Nonlinear Curves	35
		<b>Formulas</b>	<b>36</b>
		Formula for a Percentage Change	37
		Formulas for the Areas of a Rectangle and a Triangle	37
		Summary of Using Formulas	38
		Problems and Applications	38
		<b>CHAPTER 2: Trade-offs, Comparative Advantage, and the Market System</b>	<b>40</b>
		<b>Managers at Tesla Motors Face Trade-offs</b>	<b>40</b>
		<b>2.1 Production Possibilities Frontiers and Opportunity Costs</b>	<b>42</b>
		Graphing the Production Possibilities Frontier	42
		<b>Solved Problem 2.1:</b> Drawing a Production Possibilities Frontier for Tesla Motors	44
		Increasing Marginal Opportunity Costs	46
		Economic Growth	47
		<b>2.2 Comparative Advantage and Trade</b>	<b>48</b>
		Specialization and Gains from Trade	48
		Absolute Advantage versus Comparative Advantage	50
		Comparative Advantage and the Gains from Trade	51
		<b>Don't Let This Happen to You:</b> Don't Confuse Absolute Advantage and Comparative Advantage	51
		<b>Solved Problem 2.2:</b> Comparative Advantage and the Gains from Trade	52
		<b>Apply the Concept:</b> Comparative Advantage, Opportunity Cost, and Housework	53
		<b>2.3 The Market System</b>	<b>54</b>
		The Circular Flow of Income	55
		The Gains from Free Markets	56
		The Market Mechanism	56
		<b>Apply the Concept:</b> A Story of the Market System in Action: How Do You Make an iPad?	57
		The Role of the Entrepreneur in the Market System	59
		The Legal Basis of a Successful Market System	59
		<b>Apply the Concept:</b> Managers at Feeding America Use the Market Mechanism to Reduce Hunger	62
<b>PART 1 Introduction</b>			
<b>CHAPTER 1: Economics: Foundations and Models</b>	<b>2</b>		
<b>Why Does Ford Assemble Cars in Both the United States and Mexico?</b>	<b>2</b>		
<b>1.1 Three Key Economic Ideas</b>	<b>4</b>		
People Are Rational	5		
People Respond to Economic Incentives	5		
<b>Apply the Concept:</b> Does Health Insurance Give People an Incentive to Become Obese?	5		
Optimal Decisions Are Made at the Margin	7		
<b>Solved Problem 1.1:</b> The Marginal Benefit and Marginal Cost of Speed Limits	7		
<b>1.2 The Economic Problem That Every Society Must Solve</b>	<b>8</b>		
What Goods and Services Will Be Produced?	9		
How Will the Goods and Services Be Produced?	9		
Who Will Receive the Goods and Services Produced?	9		
Centrally Planned Economies versus Market Economies	10		
The Modern "Mixed" Economy	10		
Efficiency and Equity	11		
<b>1.3 Economic Models</b>	<b>12</b>		
The Role of Assumptions in Economic Models	12		
Forming and Testing Hypotheses in Economic Models	13		
Positive and Normative Analysis	14		
<b>Don't Let This Happen to You:</b> Don't Confuse Positive Analysis with Normative Analysis	14		
Economics as a Social Science	15		
<b>Apply the Concept:</b> What Can Economics Contribute to the Debate over Tariffs?	15		
<b>1.4 Microeconomics and Macroeconomics</b>	<b>16</b>		
<b>1.5 Economic Skills and Economics as a Career</b>	<b>16</b>		
<b>1.6 A Preview of Important Economic Terms</b>	<b>17</b>		
<b>Conclusion</b>	<b>19</b>		
<b>An Inside Look:</b> Is Manufacturing Returning to the United States?	20		
<b>*Chapter Summary and Problems</b>	<b>22</b>		
Key Terms, Summary, Review Questions, Problems and Applications, and Critical Thinking Exercises			
<b>Appendix: Using Graphs and Formulas</b>	<b>28</b>		
<b>Graphs of One Variable</b>	<b>29</b>		

\* These end-of-chapter resource materials repeat in all chapters. Select chapters also include Real-Time Data Exercises. Students can complete all questions, problems, and exercises in MyLab Economics.

<b>Conclusion</b>	<b>63</b>	<b>CHAPTER 4: Economic Efficiency, Government Price Setting, and Taxes</b>	<b>108</b>
<b>An Inside Look:</b> Tesla Bets Big on Nevada Battery Plant	64		
<b>Chapter Summary and Problems</b>	<b>66</b>		
 <b>CHAPTER 3: Where Prices Come From: The Interaction of Demand and Supply</b>	 <b>72</b>	 <b>What Do Food Riots in Venezuela and the Rise of Uber in the United States Have in Common?</b>	 <b>108</b>
<b>How Smart Is Your Water?</b>	<b>72</b>	<b>4.1 Consumer Surplus and Producer Surplus</b>	<b>110</b>
<b>3.1 The Demand Side of the Market</b>	<b>74</b>	Consumer Surplus	110
Demand Schedules and Demand Curves	74	<b>Apply the Concept:</b> The Consumer Surplus from Uber	112
The Law of Demand	75	Producer Surplus	114
What Explains the Law of Demand?	75	What Consumer Surplus and Producer Surplus Measure	115
Holding Everything Else Constant: The <i>Ceteris Paribus</i> Condition	76	<b>4.2 The Efficiency of Competitive Markets</b>	<b>115</b>
Variables That Shift Market Demand	76	Marginal Benefit Equals Marginal Cost in Competitive Equilibrium	115
<b>Apply the Concept:</b> Virtual Reality Headsets: Will a Substitute Fail for a Lack of Complements?	77	Economic Surplus	116
<b>Apply the Concept:</b> Millennials Shake Up the Markets for Soda, Groceries, Big Macs, and Running Shoes	78	Deadweight Loss	117
A Change in Demand versus a Change in Quantity Demanded	81	Economic Surplus and Economic Efficiency	117
<b>Apply the Concept:</b> Forecasting the Demand for Premium Bottled Water	81	<b>4.3 Government Intervention in the Market: Price Floors and Price Ceilings</b>	<b>118</b>
<b>3.2 The Supply Side of the Market</b>	<b>82</b>	Price Floors: Government Policy in Agricultural Markets	118
Supply Schedules and Supply Curves	83	<b>Apply the Concept:</b> Price Floors in Labor Markets: The Debate over Minimum Wage Policy	119
The Law of Supply	83	Price Ceilings: Government Rent Control Policy in Housing Markets	121
Variables That Shift Market Supply	83	<b>Don't Let This Happen to You:</b> Don't Confuse "Scarcity" with "Shortage"	122
A Change in Supply versus a Change in Quantity Supplied	86	Black Markets and Peer-to-Peer Sites	122
<b>3.3 Market Equilibrium: Putting Demand and Supply Together</b>	<b>86</b>	<b>Solved Problem 4.3:</b> What's the Economic Effect of a Black Market in Renting Apartments?	123
How Markets Eliminate Surpluses and Shortages	87	The Results of Government Price Controls: Winners, Losers, and Inefficiency	124
Demand and Supply Both Count	88	<b>Apply the Concept:</b> Price Controls Lead to Economic Decline in Venezuela	124
<b>Solved Problem 3.3:</b> Demand and Supply Both Count: A Tale of Two Letters	88	Positive and Normative Analysis of Price Ceilings and Price Floors	126
<b>3.4 The Effect of Demand and Supply Shifts on Equilibrium</b>	<b>90</b>	<b>4.4 The Economic Effect of Taxes</b>	<b>126</b>
The Effect of Shifts in Demand on Equilibrium	90	The Effect of Taxes on Economic Efficiency	126
The Effect of Shifts in Supply on Equilibrium	90	Tax Incidence: Who Actually Pays a Tax?	127
The Effect of Shifts in Demand and Supply over Time	90	<b>Solved Problem 4.4:</b> When Do Consumers Pay All of a Sales Tax Increase?	128
<b>Apply the Concept:</b> Lower Demand for Orange Juice—But Higher Prices?	92	<b>Apply the Concept:</b> Is the Burden of the Social Security Tax Really Shared Equally between Workers and Firms?	130
<b>Solved Problem 3.4:</b> Can We Predict Changes in the Price and Quantity of Organic Corn?	94	<b>Conclusion</b>	<b>131</b>
Shifts in a Curve versus Movements along a Curve	95	<b>An Inside Look:</b> Will Uber Be Required to Pay British VAT?	132
<b>Don't Let This Happen to You:</b> Remember: A Change in a Good's Price Does <i>Not</i> Cause the Demand or Supply Curve to Shift	96	<b>Chapter Summary and Problems</b>	<b>134</b>
<b>Conclusion</b>	<b>97</b>	<b>Appendix: Quantitative Demand and Supply Analysis</b>	<b>141</b>
<b>An Inside Look:</b> McDonald's Looks for New Ways to Attract Customers	98	<b>Demand and Supply Equations</b>	<b>141</b>
<b>Chapter Summary and Problems</b>	<b>100</b>	<b>Calculating Consumer Surplus and Producer Surplus</b>	<b>142</b>
		Review Questions	144
		Problems and Applications	144

## PART 2 Markets in Action: Policy and Applications

<b>CHAPTER 5: Externalities, Environmental Policy, and Public Goods</b>	<b>146</b>
<b>Why Does ExxonMobil Want to Pay a Carbon Tax?</b>	<b>146</b>
<b>5.1 Externalities and Economic Efficiency</b>	<b>148</b>
The Effect of Externalities	148
Externalities and Market Failure	150
What Causes Externalities?	151
<b>5.2 Private Solutions to Externalities: The Coase Theorem</b>	<b>151</b>
The Economically Efficient Level of Pollution Reduction	152
<b>Apply the Concept:</b> The Clean Air Act: How a Government Policy Reduced Infant Mortality	152
The Basis for Private Solutions to Externalities	154
<b>Don't Let This Happen to You:</b> Remember That It's the Net Benefit That Counts	154
Do Property Rights Matter?	155
The Problem of Transactions Costs	156
The Coase Theorem	156
<b>Apply the Concept:</b> How Can You Defend Your Knees on a Plane Flight?	156
<b>5.3 Government Policies to Deal with Externalities</b>	<b>157</b>
Imposing a Tax When There Is a Negative Externality	157
Providing a Subsidy When There Is a Positive Externality	158
<b>Apply the Concept:</b> Should the Government Tax Cigarettes and Soda?	159
<b>Solved Problem 5.3:</b> Dealing with the Externalities of Car Driving	160
Command-and-Control versus Market-Based Approaches	162
The End of the Sulfur Dioxide Cap-and-Trade System	163
Are Tradable Emission Allowances Licenses to Pollute?	163
<b>Apply the Concept:</b> Should the United States Enact a Carbon Tax to Fight Global Warming?	163
<b>5.4 Four Categories of Goods</b>	<b>165</b>
The Demand for a Public Good	166
The Optimal Quantity of a Public Good	167
<b>Solved Problem 5.4:</b> Determining the Optimal Level of Public Goods	169
Common Resources	170
<b>Conclusion</b>	<b>173</b>
<b>Chapter Summary and Problems</b>	<b>174</b>

<b>CHAPTER 6: Elasticity: The Responsiveness of Demand and Supply</b>	<b>182</b>
<b>Do Soda Taxes Work?</b>	<b>182</b>
<b>6.1 The Price Elasticity of Demand and Its Measurement</b>	<b>184</b>
Measuring the Price Elasticity of Demand	184
Elastic Demand and Inelastic Demand	185
An Example of Calculating Price Elasticities	185
The Midpoint Formula	186
<b>Solved Problem 6.1:</b> Calculating the Price Elasticity of Demand	187
When Demand Curves Intersect, the Flatter Curve Is More Elastic	188
Polar Cases of Perfectly Elastic and Perfectly Inelastic Demand	188
<b>Don't Let This Happen to You:</b> Don't Confuse Inelastic with Perfectly Inelastic	190
<b>6.2 The Determinants of the Price Elasticity of Demand</b>	<b>190</b>
Availability of Close Substitutes	190
Passage of Time	191
Luxuries versus Necessities	191
Definition of the Market	191
Share of a Good in a Consumer's Budget	191
Some Estimated Price Elasticities of Demand	191
<b>6.3 The Relationship between Price Elasticity of Demand and Total Revenue</b>	<b>192</b>
Elasticity and Revenue with a Linear Demand Curve	193
<b>Solved Problem 6.3:</b> Price and Revenue Don't Always Move in the Same Direction	195
<b>Apply the Concept:</b> Why Does Amazon Care about Price Elasticity?	196
<b>6.4 Other Demand Elasticities</b>	<b>197</b>
Cross-Price Elasticity of Demand	197
Income Elasticity of Demand	198
<b>Apply the Concept:</b> Price Elasticity, Cross-Price Elasticity, and Income Elasticity in the Market for Alcoholic Beverages	199
<b>6.5 Using Elasticity to Analyze the Disappearing Family Farm</b>	<b>199</b>
<b>Solved Problem 6.5:</b> Using Price Elasticity to Analyze the Effects of a Soda Tax	200
<b>6.6 The Price Elasticity of Supply and Its Measurement</b>	<b>202</b>
Measuring the Price Elasticity of Supply	202
Determinants of the Price Elasticity of Supply	202
<b>Apply the Concept:</b> Why Are Oil Prices So Unstable?	203
Polar Cases of Perfectly Elastic and Perfectly Inelastic Supply	204
Using Price Elasticity of Supply to Predict Changes in Price	206
<b>Conclusion</b>	<b>207</b>
<b>Chapter Summary and Problems</b>	<b>209</b>

<b>CHAPTER 7: The Economics of Health Care</b>	218
<b>Where Will You Find Health Insurance?</b>	218
<b>7.1 The Improving Health of People in the United States</b>	220
Changes over Time in U.S. Health	221
Reasons for Long-Run Improvements in U.S. Health	221
<b>7.2 Health Care around the World</b>	222
The U.S. Health Care System	222
<b>Apply the Concept:</b> The Increasing Importance of Health Care in the U.S. Economy	224
The Health Care Systems of Canada, Japan, and the United Kingdom	225
Comparing Health Care Outcomes around the World	226
How Useful Are Cross-Country Comparisons of Health Outcomes?	227
<b>7.2 Information Problems and Externalities in the Market for Health Care</b>	228
Adverse Selection and the Market for “Lemons”	228
Asymmetric Information in the Market for Health Insurance	229
<b>Don’t Let This Happen to You:</b> Don’t Confuse Adverse Selection with Moral Hazard	230
Externalities in the Market for Health Care	231
Should the Government Run the Health Care System?	233
<b>7.3 The Debate over Health Care Policy in the United States</b>	234
The Rising Cost of Health Care	234
<b>Apply the Concept:</b> Are U.S. Firms Handicapped by Paying for Their Employees’ Health Insurance?	236
Explaining Increases in Health Care Spending	237
The Continuing Debate over Health Care Policy	240
<b>Solved Problem 7.4:</b> Recent Trends in U.S. Health Care	241
<b>Apply the Concept:</b> How Much Is That MRI Scan?	243
<b>Conclusion</b>	245
<b>Chapter Summary and Problems</b>	246

## PART 3 Firms in the Domestic and International Economies

<b>CHAPTER 8: Firms, the Stock Market, and Corporate Governance</b>	252
<b>Is Snapchat the Next Facebook . . . or the Next Twitter?</b>	252
<b>8.1 Types of Firms</b>	254
Who Is Liable? Limited and Unlimited Liability	254
Corporations Earn the Majority of Revenue and Profits	255

<b>Apply the Concept:</b> Why Are Fewer Young People Starting Businesses?	256
The Structure of Corporations and the Principal–Agent Problem	257
<b>8.2 How Firms Raise Funds</b>	258
Sources of External Funds	258
<b>Apply the Concept:</b> The Rating Game: Are the Federal Government or State Governments Likely to Default on Their Bonds?	259
Stock and Bond Markets Provide Capital—and Information	261
The Fluctuating Stock Market	262
<b>Don’t Let This Happen to You:</b> When Snap Shares Are Sold, Snap Doesn’t Get the Money	262
<b>Apply the Concept:</b> Why Are Many People Poor Stock Market Investors?	264
<b>Solved Problem 8.2:</b> Why Does Warren Buffett Like Mutual Funds?	265
<b>8.3 Using Financial Statements to Evaluate a Corporation</b>	266
The Income Statement	266
The Balance Sheet	267
<b>8.4 Recent Issues in Corporate Governance Policy</b>	268
The Accounting Scandals of the Early 2000s	268
Corporate Governance and the Financial Crisis of 2007–2009	268
Government Regulation in Response to the Financial Crisis	269
Did Principal–Agent Problems Help Cause the 2007–2009 Financial Crisis?	269
<b>Apply the Concept:</b> Should Investors Worry about Corporate Governance at Snapchat?	270
<b>Conclusion</b>	272
<b>Chapter Summary and Problems</b>	273
<b>Appendix: Tools to Analyze Firms’ Financial Information</b>	278
<b>Using Present Value to Make Investment Decisions</b>	278
<b>Solved Problem 8A.1:</b> How to Receive Your Contest Winnings	280
Using Present Value to Calculate Bond Prices	281
Using Present Value to Calculate Stock Prices	282
A Simple Formula for Calculating Stock Prices	282
<b>Going Deeper into Financial Statements</b>	283
Analyzing Income Statements	284
Analyzing Balance Sheets	284

Problems and Applications	286

<b>CHAPTER 9: Comparative Advantage and the Gains from International Trade</b>	288
<b>President Trump, Oreo Cookies, and Free Trade</b>	288
<b>9.1 The United States in the International Economy</b>	290
The Importance of Trade to the U.S. Economy	291
U.S. International Trade in a World Context	292

<b>9.2 Comparative Advantage in International Trade</b>	<b>292</b>
A Brief Review of Comparative Advantage	293
Comparative Advantage and Absolute Advantage	293
<b>9.3 How Countries Gain from International Trade</b>	<b>294</b>
Increasing Consumption through Trade	294
<b>Solved Problem 9.3:</b> The Gains from Trade	296
Why Don't We See Complete Specialization?	297
Does Anyone Lose as a Result of International Trade?	298
<b>Don't Let This Happen to You:</b> Remember That Trade Creates Both Winners and Losers	298
<b>Apply the Concept:</b> Who Gains and Who Loses from U.S. Trade with China?	298
Where Does Comparative Advantage Come From?	301
<b>9.4 Government Policies That Restrict International Trade</b>	<b>302</b>
Tariffs	303
Quotas and Voluntary Export Restraints	304
Measuring the Economic Effect of the Sugar Quota	304
<b>Solved Problem 9.4:</b> Measuring the Economic Effect of a Quota	306
The High Cost of Preserving Jobs with Tariffs and Quotas	307
<b>Apply the Concept:</b> Smoot-Hawley, the Politics of Tariffs, and the Cost of Protecting a Vanishing Industry	307
Gains from Unilateral Elimination of Tariffs and Quotas	309
Other Barriers to Trade	309
<b>9.5 The Debate over Trade Policies and Globalization</b>	<b>309</b>
Why Do Some People Oppose the World Trade Organization?	309
<b>Apply the Concept:</b> Protecting Consumer Health or Protecting U.S. Firms from Competition?	312
Dumping	313
Positive versus Normative Analysis (Once Again)	313
<b>Conclusion</b>	<b>314</b>
<b>Chapter Summary and Problems</b>	<b>315</b>

## PART 4 Microeconomic Foundations: Consumers and Firms

<b>CHAPTER 10: Consumer Choice and Behavioral Economics</b>	<b>324</b>
<b>J.C. Penney Customers Didn't Buy into "Everyday Low Prices"</b>	<b>324</b>
<b>10.1 Utility and Consumer Decision Making</b>	<b>326</b>
An Overview of the Economic Model of Consumer Behavior	326
Utility	326
The Principle of Diminishing Marginal Utility	327
The Rule of Equal Marginal Utility per Dollar Spent	327

<b>Solved Problem 10.1:</b> Finding the Optimal Level of Consumption	330
What if the Rule of Equal Marginal Utility per Dollar Does Not Hold?	331
<b>Don't Let This Happen to You:</b> Equalize Marginal Utilities per Dollar	332
The Income Effect and Substitution Effect of a Price Change	333
<b>10.2 Where Demand Curves Come From</b>	<b>334</b>
<b>Apply the Concept:</b> Are There Any Upward-Sloping Demand Curves in the Real World?	336
<b>10.3 Social Influences on Decision Making</b>	<b>337</b>
The Effects of Celebrity Endorsements	337
Network Externalities	338
Does Fairness Matter?	339
<b>Apply the Concept:</b> Who Made the Most Profit from the Broadway Musical <i>Hamilton</i> ?	341
<b>Solved Problem 10.3:</b> Why Doesn't Tesla Charge Its Employees to Park Their Cars?	343
<b>10.4 Behavioral Economics: Do People Make Rational Choices?</b>	<b>345</b>
Pitfalls in Decision Making	345
<b>Apply the Concept:</b> A Blogger Who Understands the Importance of Ignoring Sunk Costs	346
"Nudges": Using Behavioral Economics to Guide Behavior	347
The Behavioral Economics of Shopping	348
<b>Apply the Concept:</b> J.C. Penney Meets Behavioral Economics	349
<b>Conclusion</b>	<b>351</b>
<b>Chapter Summary and Problems</b>	<b>352</b>
<b>Appendix: Using Indifference Curves and Budget Lines to Understand Consumer Behavior</b>	<b>358</b>
<b>Consumer Preferences</b>	<b>358</b>
Indifference Curves	358
The Slope of an Indifference Curve	359
Can Indifference Curves Ever Cross?	359
<b>The Budget Constraint</b>	<b>360</b>
<b>Choosing the Optimal Consumption of Pizza and Coke</b>	<b>361</b>
<b>Apply the Concept:</b> Apple Determines the Optimal Mix of iPhone Features	362
Deriving the Demand Curve	363
<b>Solved Problem 10A.1:</b> When Does a Price Change Make a Consumer Better Off?	364
The Income Effect and the Substitution Effect of a Price Change	365
How a Change in Income Affects Optimal Consumption	367
<b>The Slope of the Indifference Curve, the Slope of the Budget Line, and the Rule of Equal Marginal Utility per Dollar Spent</b>	<b>367</b>
The Rule of Equal Marginal Utility per Dollar Spent Revisited	368
Review Questions	370
Problems and Applications	370

**CHAPTER 11: Technology, Production, and Costs** 372**Will the Cost of MOOCs Revolutionize Higher Education?** 372**11.1 Technology: An Economic Definition** 374  
**Apply the Concept:** Would You Please Be Quiet? Technological Change at Segment.com 374**11.2 The Short Run and the Long Run in Economics** 375

The Difference between Fixed Costs and Variable Costs 375

**Apply the Concept:** Fixed Costs in the Publishing Industry 376

Implicit Costs versus Explicit Costs 376

The Production Function 377

A First Look at the Relationship between Production and Cost 378

**11.3 The Marginal Product of Labor and the Average Product of Labor** 379

The Law of Diminishing Returns 379

Graphing Production 380

**Apply the Concept:** Adam Smith's Famous Account of the Division of Labor in a Pin Factory 381

The Relationship between Marginal Product and Average Product 381

An Example of Marginal and Average Values: College Grades 382

**11.4 The Relationship between Short-Run Production and Short-Run Cost** 383

Marginal Cost 383

Why Are the Marginal and Average Cost Curves U Shaped? 383

**Solved Problem 11.4:** Calculating Marginal Cost and Average Cost 385**11.5 Graphing Cost Curves** 386**11.6 Costs in the Long Run** 388

Economies of Scale 388

Long-Run Average Cost Curves for Automobile Factories 389

**Solved Problem 11.6:** Using Long-Run Average Cost Curves to Understand Business Strategy 389**Apply the Concept:** The Colossal River Rouge: Diseconomies of Scale at Ford Motor Company 391**Don't Let This Happen to You:** Don't Confuse Diminishing Returns with Diseconomies of Scale 392**Conclusion** 393**Chapter Summary and Problems** 394**Appendix: Using Isoquants and Isocost Lines to Understand Production and Cost** 402**Isoquants** 402

An Isoquant Graph 402

The Slope of an Isoquant 403

**Isocost Lines** 403

Graphing the Isocost Line 403

The Slope and Position of the Isocost Line 403

**Choosing the Cost-Minimizing Combination of Capital and Labor** 405

Different Input Price Ratios Lead to Different Input Choices 405

**Solved Problem 11A.1:** Firms Responding to Differences in Input Price Ratios 406

Another Look at Cost Minimization 407

**Solved Problem 11A.2:** Determining the Optimal Combination of Inputs 408**Apply the Concept:** Do National Football League Teams Behave Efficiently? 409**The Expansion Path** 410

Review Questions 411

Problems and Applications 411

**PART 5 Market Structure and Firm Strategy****CHAPTER 12: Firms in Perfectly Competitive Markets** 414**Are Cage-Free Eggs the Road to Riches?** 414**12.1 Perfectly Competitive Markets** 417

A Perfectly Competitive Firm Cannot Affect the Market Price 417

The Demand Curve for the Output of a Perfectly Competitive Firm 418

**Don't Let This Happen to You:** Don't Confuse the Demand Curve for Farmer Parker's Wheat with the Market Demand Curve for Wheat 418**12.2 How a Firm Maximizes Profit in a Perfectly Competitive Market** 419

Revenue for a Firm in a Perfectly Competitive Market 420

Determining the Profit-Maximizing Level of Output 420

**12.3 Illustrating Profit or Loss on the Cost Curve Graph** 422

Showing Profit on a Graph 423

**Solved Problem 12.3:** Determining Profit-Maximizing Price and Quantity 424**Don't Let This Happen to You:** Remember That Firms Maximize Their Total Profit, Not Their Profit per Unit 426

Illustrating When a Firm Is Breaking Even or Operating at a Loss 426

**Apply the Concept:** Losing Money in the Restaurant Business 427**12.4 Deciding Whether to Produce or to Shut Down in the Short Run** 428

The Supply Curve of a Firm in the Short Run 429

**Solved Problem 12.4:** When to Shut Down a Farm 430

The Market Supply Curve in a Perfectly Competitive Industry 431

<b>12.5 “If Everyone Can Do It, You Can’t Make Money at It”: The Entry and Exit of Firms in the Long Run</b>	<b>432</b>	<b>13.5 How Marketing Differentiates Products</b>	<b>465</b>
Economic Profit and the Entry or Exit Decision	432	Brand Management	466
Long-Run Equilibrium in a Perfectly Competitive Market	434	Advertising	466
The Long-Run Supply Curve in a Perfectly Competitive Market	436	Defending a Brand Name	466
<b>Apply the Concept:</b> In the Apple App Store, Easy Entry Makes the Long Run Pretty Short	437	<b>13.6 What Makes a Firm Successful?</b>	<b>466</b>
Increasing-Cost and Decreasing-Cost Industries	438	<b>Apply the Concept:</b> Is Being the First Firm in the Market a Key to Success?	467
<b>12.6 Perfect Competition and Economic Efficiency</b>	<b>438</b>	<b>Conclusion</b>	<b>469</b>
Productive Efficiency	438	<b>Chapter Summary and Problems</b>	<b>470</b>
<b>Solved Problem 12.6:</b> How Productive Efficiency Benefits Consumers	439	<b>CHAPTER 14: Oligopoly: Firms in Less Competitive Markets</b>	<b>478</b>
Allocative Efficiency	440	<b>Apple, Spotify, and the Music Streaming Revolution</b>	<b>478</b>
<b>Conclusion</b>	<b>441</b>	<b>14.1 Oligopoly and Barriers to Entry</b>	<b>480</b>
<b>Chapter Summary and Problems</b>	<b>442</b>	Barriers to Entry	481
<b>CHAPTER 13: Monopolistic Competition: The Competitive Model in a More Realistic Setting</b>	<b>450</b>	<b>Apply the Concept:</b> Got a Great Recipe for Cookies? Don’t Try Selling Them in Wisconsin or New Jersey	483
<b>Will Panera’s “Pure Food” Advantage Last?</b>	<b>450</b>	<b>14.2 Game Theory and Oligopoly</b>	<b>484</b>
<b>13.1 Demand and Marginal Revenue for a Firm in a Monopolistically Competitive Market</b>	<b>452</b>	A Duopoly Game: Price Competition between Two Firms	485
The Demand Curve for a Monopolistically Competitive Firm	452	Firm Behavior and the Prisoner’s Dilemma	486
Marginal Revenue for a Firm with a Downward-Sloping Demand Curve	452	<b>Don’t Let This Happen to You:</b> Don’t Misunderstand Why Each Firm Ends Up Charging a Price of \$9.99	486
<b>13.2 How a Monopolistically Competitive Firm Maximizes Profit in the Short Run</b>	<b>454</b>	<b>Solved Problem 14.2:</b> Is Offering a College Student Discount a Prisoner’s Dilemma for Apple and Spotify?	487
<b>Solved Problem 13.2:</b> Does Minimizing Cost Maximize Profit at Apple?	456	Can Firms Escape the Prisoner’s Dilemma?	488
<b>13.3 What Happens to Profits in the Long Run?</b>	<b>457</b>	<b>Apply the Concept:</b> Are the Big Four Airlines Colluding?	489
How Does the Entry of New Firms Affect the Profits of Existing Firms?	457	Cartels: The Case of OPEC	491
<b>Don’t Let This Happen to You:</b> Don’t Confuse Zero Economic Profit with Zero Accounting Profit	458	<b>14.3 Sequential Games and Business Strategy</b>	<b>492</b>
<b>Apply the Concept:</b> Is “Clean Food” a Sustainable Market Niche for Panera?	460	Deterring Entry	492
Is Zero Economic Profit Inevitable in the Long Run?	461	<b>Solved Problem 14.3:</b> Is Deterring Entry Always a Good Idea?	494
<b>Solved Problem 13.3:</b> Red Robin Abandons an Experiment in Fast-Casual Restaurants	461	Bargaining	495
<b>13.4 Comparing Monopolistic Competition and Perfect Competition</b>	<b>462</b>	<b>14.4 The Five Competitive Forces Model</b>	<b>496</b>
Excess Capacity under Monopolistic Competition	463	Competition from Existing Firms	496
Is Monopolistic Competition Inefficient?	463	The Threat from Potential Entrants	497
How Consumers Benefit from Monopolistic Competition	464	Competition from Substitute Goods or Services	497
<b>Apply the Concept:</b> One Way to Differentiate Your Restaurant? Become a Ghost!	464	The Bargaining Power of Buyers	497
		The Bargaining Power of Suppliers	497
		<b>Apply the Concept:</b> Can We Predict Which Firms Will Continue to Be Successful?	498
		<b>Conclusion</b>	<b>499</b>
		<b>Chapter Summary and Problems</b>	<b>500</b>
		<b>CHAPTER 15: Monopoly and Antitrust Policy</b>	<b>506</b>
		<b>A Monopoly on Lobster Dinners in Maine?</b>	<b>506</b>
		<b>15.1 Is Any Firm Ever Really a Monopoly?</b>	<b>508</b>
		<b>Apply the Concept:</b> Is the NCAA a Monopoly?	508

<b>15.2 Where Do Monopolies Come From?</b>	<b>510</b>
Government Action Blocks Entry	510
<b>Apply the Concept:</b> Does Hasbro Have a Monopoly on Monopoly?	511
Control of a Key Resource	512
<b>Apply the Concept:</b> Are Diamond Profits Forever? The De Beers Diamond Monopoly	512
Network Externalities	513
Natural Monopoly	514
<b>15.3 How Does a Monopoly Choose Price and Output?</b>	<b>515</b>
Marginal Revenue Once Again	515
Profit Maximization for a Monopolist	516
<b>Solved Problem 15.3:</b> Finding the Profit-Maximizing Price and Output for a Cable Monopoly	518
<b>Don't Let This Happen to You:</b> Don't Assume That Charging a Higher Price Is Always More Profitable for a Monopolist	519
<b>15.4 Does Monopoly Reduce Economic Efficiency?</b>	<b>519</b>
Comparing Monopoly and Perfect Competition	519
Measuring the Efficiency Losses from Monopoly	520
How Large Are the Efficiency Losses Due to Monopoly?	521
Market Power and Technological Change	522
<b>15.5 Government Policy toward Monopoly</b>	<b>522</b>
Antitrust Laws and Antitrust Enforcement	522
<b>Apply the Concept:</b> Have Generic Drug Firms Been Colluding to Raise Prices?	523
Mergers: The Trade-off between Market Power and Efficiency	524
The Department of Justice and FTC Merger Guidelines	526
Regulating Natural Monopolies	528
<b>Solved Problem 15.5:</b> What Should Your College Charge for a MOOC?	529
<b>Conclusion</b>	<b>530</b>
<b>Chapter Summary and Problems</b>	<b>531</b>
 <b>CHAPTER 16: Pricing Strategy</b>	<b>538</b>
<b>Walt Disney Discovers the Magic of Big Data</b>	<b>538</b>
<b>16.1 Pricing Strategy, the Law of One Price, and Arbitrage</b>	<b>540</b>
Arbitrage	540
<b>Solved Problem 16.1:</b> Is Arbitrage Just a Rip-off?	541
Why Don't All Firms Charge the Same Price?	541
<b>16.2 Price Discrimination: Charging Different Prices for the Same Product</b>	<b>542</b>
The Requirements for Successful Price Discrimination	542
<b>Don't Let This Happen to You:</b> Don't Confuse Price Discrimination with Other Types of Discrimination	543

An Example of Price Discrimination	543
<b>Solved Problem 16.2:</b> How Apple Uses Price Discrimination to Increase Profits	544
Airlines: The Kings of Price Discrimination	545
<b>Apply the Concept:</b> Big Data and the Rise of Dynamic Pricing	546
Perfect Price Discrimination	548
Price Discrimination across Time	549
Can Price Discrimination Be Illegal?	551
<b>16.3 Other Pricing Strategies</b>	<b>551</b>
Odd Pricing: Why Is the Price \$2.99 Instead of \$3.00?	551
Why Do McDonald's and Other Firms Use Cost-Plus Pricing?	552
<b>Apply the Concept:</b> Cost-Plus Pricing in the Publishing Industry	552
How Can Using Two-Part Tariffs Increase a Firm's Profit?	553
<b>Conclusion</b>	<b>556</b>
<b>Chapter Summary and Problems</b>	<b>557</b>

## PART 6 Labor Markets, Public Choice, and the Distribution of Income

<b>CHAPTER 17: The Markets for Labor and Other Factors of Production</b>	<b>562</b>
<b>Rio Tinto Mines with Robots</b>	<b>562</b>
<b>17.1 The Demand for Labor</b>	<b>564</b>
The Marginal Revenue Product of Labor	564
<b>Solved Problem 17.1:</b> Hiring Decisions by a Firm That Is a Price Maker	566
The Market Demand Curve for Labor	567
Factors That Shift the Market Demand Curve for Labor	567
<b>17.2 The Supply of Labor</b>	<b>568</b>
The Market Supply Curve of Labor	569
Factors That Shift the Market Supply Curve of Labor	569
<b>17.3 Equilibrium in the Labor Market</b>	<b>570</b>
The Effect on Equilibrium Wages of a Shift in Labor Demand	571
<b>Apply the Concept:</b> Is Investing in a College Education a Good Idea?	571
The Effect of Immigration on the U.S. Labor Market	572
<b>Apply the Concept:</b> Will You Compete with a Robot for a Job—Or Work with One?	574
<b>17.4 Explaining Differences in Wages</b>	<b>577</b>
<b>Don't Let This Happen to You:</b> Remember That Prices and Wages Are Determined at the Margin	578
<b>Apply the Concept:</b> Technology and the Earnings of "Superstars"	578
Compensating Differentials	579
Discrimination	580

<b>Solved Problem 17.4:</b> Is Passing “Comparable Worth” Legislation a Good Way to Close the Gap between Men’s and Women’s Pay?	581
<b>Apply the Concept:</b> Does Greg Have an Easier Time Finding a Job Than Jamal?	583
Labor Unions	585
<b>17.5 Personnel Economics</b>	<b>585</b>
Should Workers’ Pay Depend on How Much They Work or on How Much They Produce?	586
<b>Apply the Concept:</b> A Better Way to Sell Contact Lenses	587
Other Considerations in Setting Compensation Systems	588
<b>17.6 The Markets for Capital and Natural Resources</b>	<b>588</b>
The Market for Capital	588
The Market for Natural Resources	589
Monopsony	590
The Marginal Productivity Theory of Income Distribution	591
<b>Conclusion</b>	<b>591</b>
<b>Chapter Summary and Problems</b>	<b>592</b>
 <b>CHAPTER 18: Public Choice, Taxes, and the Distribution of Income</b>	 <b>600</b>
<b>Should Your Small Business Be Taxed Like Apple?</b>	<b>600</b>
<b>18.1 Public Choice</b>	<b>602</b>
How Do We Know the Public Interest? Models of Voting	602
Government Failure?	604
Is Government Regulation Necessary?	606
<b>18.2 The Tax System</b>	<b>606</b>
An Overview of the U.S. Tax System	607
Progressive and Regressive Taxes	608
<b>Apply the Concept:</b> Which Groups Pay the Most in Federal Taxes?	609
Marginal and Average Income Tax Rates	610
The Corporate Income Tax	610
International Comparison of Corporate Income Taxes	610
Evaluating Taxes	611
<b>18.3 Tax Incidence Revisited: The Effect of Price Elasticity</b>	<b>614</b>
<b>Don’t Let This Happen to You:</b> Don’t Confuse Who Pays a Tax with Who Bears the Burden of the Tax	615
<b>Apply the Concept:</b> Do Corporations Really Bear the Burden of the Federal Corporate Income Tax?	615
<b>Solved Problem 18.3:</b> The Effect of Price Elasticity on the Excess Burden of a Tax	616
<b>18.4 Income Distribution and Poverty</b>	<b>617</b>
Measuring the Income Distribution and Measuring Poverty	617

Showing the Income Distribution with a Lorenz Curve	619
Problems in Measuring Poverty and the Distribution of Income	620
<b>Solved Problem 18.4:</b> What’s the Difference between Income Mobility and Income Inequality?	621
Explaining Income Inequality	623
Policies to Reduce Income Inequality	624
<b>Apply the Concept:</b> Who Are the 1 Percent, and How Do They Earn Their Incomes?	626
Income Distribution and Poverty around the World	627
<b>Conclusion</b>	<b>629</b>
<b>Chapter Summary and Problems</b>	<b>630</b>

## PART 7 Macroeconomic Foundations and Long-Run Growth

<b>CHAPTER 19: GDP: Measuring Total Production and Income</b>	<b>636</b>
<b>The Ford Motor Company Meets Macroeconomics</b>	<b>636</b>
<b>19.1 Gross Domestic Product Measures Total Production</b>	<b>639</b>
Measuring Total Production: Gross Domestic Product	639
<b>Solved Problem 19.1:</b> Calculating GDP	640
Production, Income, and the Circular-Flow Diagram	640
Components of GDP	642
<b>Don’t Let This Happen to You:</b> Remember What Economists Mean by <i>Investment</i>	643
An Equation for GDP and Some Actual Values	643
<b>Apply the Concept:</b> Microsoft’s Steve Ballmer Uses the U.S. Constitution to Reorganize Government Data	644
Measuring GDP Using the Value-Added Method	646
<b>19.2 Does GDP Measure What We Want It to Measure?</b>	<b>646</b>
Shortcomings in GDP as a Measure of Total Production	646
<b>Apply the Concept:</b> Why Do Many Developing Countries Have Such Large Underground Economies?	647
Shortcomings of GDP as a Measure of Well-Being	648
<b>19.3 Real GDP versus Nominal GDP</b>	<b>649</b>
Calculating Real GDP	649
<b>Solved Problem 19.3:</b> Calculating Real GDP	649
Comparing Real GDP and Nominal GDP	650
The GDP Deflator	651
<b>Apply the Concept:</b> Did the Standard of Living in Nigeria Almost Double Overnight?	652
<b>19.4 Other Measures of Total Production and Total Income</b>	<b>653</b>
Gross National Product	653

National Income	653
Personal Income	654
Disposable Personal Income	654
The Division of Income	654
<b>Conclusion</b>	<b>655</b>
<b>Chapter Summary and Problems</b>	<b>656</b>

## **CHAPTER 20: Unemployment and Inflation** 662

### **Why Would Boeing Cut Thousands of Jobs As the Economy Expands?** 662

#### **20.1 Measuring the Unemployment Rate, the Labor Force Participation Rate, and the Employment–Population Ratio** 664

The Household Survey 664

**Solved Problem 20.1:** What Happens if the BLS Includes the Military? 666

Problems with Measuring the Unemployment Rate 667

Trends in Labor Force Participation 668

Unemployment Rates for Different Groups 669

How Long Are People Typically Unemployed? 670

**Apply the Concept:** Eight Million Workers Are Missing! 670

The Establishment Survey: Another Measure of Employment 672

Revisions in the Establishment Survey 673

Employment Data: How Bad Was the 2007–2009 Recession? 673

Job Creation and Job Destruction over Time 673

#### **20.2 Types of Unemployment** 674

Frictional Unemployment and Job Search 674

Structural Unemployment 675

Cyclical Unemployment 675

Full Employment 676

**Apply the Concept:** How Should We Categorize the Unemployment Resulting from Boeing's Layoffs? 676

#### **20.3 Explaining Unemployment** 677

Government Policies and the Unemployment Rate 677

Labor Unions 678

Efficiency Wages 679

#### **20.4 Measuring Inflation** 679

The Consumer Price Index 679

Is the CPI Accurate? 681

**Don't Let This Happen to You:** Don't Miscalculate the Inflation Rate 681

The Producer Price Index 682

#### **20.5 Using Price Indexes to Adjust for the Effects of Inflation** 682

**Solved Problem 20.5:** What Has Been Happening to Real Wages in the United States? 683

#### **20.6 Nominal Interest Rates versus Real Interest Rates** 685

#### **20.7 Does Inflation Impose Costs on the Economy?** 686

Inflation Affects the Distribution of Income 687

The Problem with Anticipated Inflation 687

The Problem with Unanticipated Inflation 688

**Apply the Concept:** What's So Bad about Falling Prices? 688

**Conclusion** 690

**Chapter Summary and Problems** 691

## **CHAPTER 21: Economic Growth, the Financial System, and Business Cycles** 702

### **Economic Growth and the Business Cycle at Chevron Corporation** 702

#### **21.1 Long-Run Economic Growth** 704

**Apply the Concept:** The Connection between Economic Prosperity and Health 705

Calculating Growth Rates and the Rule of 70 707

What Determines the Rate of Long-Run Growth? 708

**Solved Problem 21.1:** Where Does Productivity Come From? 709

**Apply the Concept:** Can India Sustain Its Rapid Growth? 710

Potential GDP 712

#### **21.2 Saving, Investment, and the Financial System** 713

An Overview of the Financial System 713

The Macroeconomics of Saving and Investment 714

The Market for Loanable Funds 716

**Apply the Concept:** Ebenezer Scrooge: Accidental Promoter of Economic Growth? 717

**Solved Problem 21.2:** Are Future Budget Deficits a Threat to the Economy? 719

#### **21.3 The Business Cycle** 721

Some Basic Business Cycle Definitions 721

How Do We Know When the Economy Is in a Recession? 722

What Happens during the Business Cycle? 723

**Don't Let This Happen to You:** Don't Confuse the Price Level and the Inflation Rate 725

Will the U.S. Economy Return to Stability? 728

**Conclusion** 729

**Chapter Summary and Problems** 730

## **CHAPTER 22: Long-Run Economic Growth: Sources and Policies** 736

### **What Explains Slow Growth in Mexico?** 736

#### **22.1 Economic Growth over Time and around the World** 738

Economic Growth from 1,000,000 B.C.E. to the Present 738

**Apply the Concept:** Why Did the Industrial Revolution Begin in England? 739

Small Differences in Growth Rates Are Important 740

Why Do Growth Rates Matter? 741

**Don't Let This Happen to You:** Don't Confuse the Average Annual Percentage Change with the Total Percentage Change 741

“The Rich Get Richer and ...”	741
<b>Apply the Concept:</b> Is Income All That Matters?	742
<b>22.2 What Determines How Fast Economies Grow?</b>	<b>743</b>
The Per-Worker Production Function	744
Which Is More Important for Economic Growth: More Capital or Technological Change?	745
Technological Change: The Key to Sustaining Economic Growth	745
<b>Apply the Concept:</b> What Explains the Economic Failure of the Soviet Union?	746
<b>Solved Problem 22.2:</b> Using the Economic Growth Model to Analyze the Failure of the Soviet Economy	747
New Growth Theory	748
Joseph Schumpeter and Creative Destruction	750
<b>22.3 Economic Growth in the United States</b>	<b>750</b>
Economic Growth in the United States since 1950	750
Is the United States Headed for a Long Period of Slow Growth?	751
<b>22.4 Why Isn’t the Whole World Rich?</b>	<b>753</b>
Catch-up: Sometimes but Not Always	754
<b>Solved Problem 22.4:</b> The Economic Growth Model’s Prediction of Catch-Up	756
Why Haven’t Most Western European Countries, Canada, and Japan Caught Up to the United States?	757
Why Don’t More Low-Income Countries Experience Rapid Growth?	759
<b>Apply the Concept:</b> Why Hasn’t Mexico Grown as Fast as China?	760
The Benefits of Globalization	762
<b>22.5 Growth Policies</b>	<b>763</b>
Enhancing Property Rights and the Rule of Law	763
<b>Apply the Concept:</b> Will China’s Standard of Living Ever Exceed That of the United States?	763
Improving Health and Education	765
Policies That Promote Technological Change	765
Policies That Promote Saving and Investment	765
Is Economic Growth Good or Bad?	766
<b>Conclusion</b>	<b>767</b>
<b>Chapter Summary and Problems</b>	<b>768</b>

## PART 8 Short-Run Fluctuations

<b>CHAPTER 23: Aggregate Expenditure and Output in the Short Run</b>	<b>776</b>
<b>Fluctuating Demand Helps—and Hurts—Intel and Other Firms</b>	<b>776</b>
<b>23.1 The Aggregate Expenditure Model</b>	<b>778</b>
Aggregate Expenditure	778
The Difference between Planned Investment and Actual Investment	779
Macroeconomic Equilibrium	779
Adjustments to Macroeconomic Equilibrium	780

<b>23.2 Determining the Level of Aggregate Expenditure in the Economy</b>	<b>781</b>
Consumption	781
The Relationship between Consumption and National Income	784
Income, Consumption, and Saving	786
<b>Solved Problem 23.2:</b> Calculating the Marginal Propensity to Consume and the Marginal Propensity to Save	787
Planned Investment	788
<b>Apply the Concept:</b> Is Student Loan Debt Causing Fewer Young People to Buy Houses?	789
Government Purchases	791
Net Exports	792
<b>Apply the Concept:</b> The iPhone Is Made in China ... or Is It?	794
<b>23.3 Graphing Macroeconomic Equilibrium</b>	<b>794</b>
Showing a Recession on the 45°-Line Diagram	798
The Important Role of Inventories	799
A Numerical Example of Macroeconomic Equilibrium	799
<b>Don’t Let This Happen to You:</b> Don’t Confuse Aggregate Expenditure with Consumption Spending	800
<b>Solved Problem 23.3:</b> Determining Macroeconomic Equilibrium	800
<b>23.4 The Multiplier Effect</b>	<b>801</b>
<b>Apply the Concept:</b> The Multiplier in Reverse: The Great Depression of the 1930s	804
A Formula for the Multiplier	805
Summarizing the Multiplier Effect	806
<b>Solved Problem 23.4:</b> Using the Multiplier Formula	807
The Paradox of Thrift	808
<b>23.5 The Aggregate Demand Curve</b>	<b>808</b>
<b>Conclusion</b>	<b>810</b>
<b>Chapter Summary and Problems</b>	<b>811</b>
<b>Appendix: The Algebra of Macroeconomic Equilibrium</b>	<b>818</b>
Review Questions	819

<b>CHAPTER 24: Aggregate Demand and Aggregate Supply Analysis</b>	<b>820</b>
<b>The Fortunes of KB Home Follow the Business Cycle</b>	<b>820</b>
<b>24.1 Aggregate Demand</b>	<b>822</b>
Why Is the Aggregate Demand Curve Downward Sloping?	822
Shifts of the Aggregate Demand Curve versus Movements along It	824
The Variables That Shift the Aggregate Demand Curve	824
<b>Don’t Let This Happen to You:</b> Understand Why the Aggregate Demand Curve Is Downward Sloping	825

<b>Solved Problem 24.1:</b> Movements along the Aggregate Demand Curve or Shifts of the Curve?	826
<b>Apply the Concept:</b> Which Components of Aggregate Demand Changed the Most during the 2007–2009 Recession?	828
<b>24.2 Aggregate Supply</b>	<b>830</b>
The Long-Run Aggregate Supply Curve	830
The Short-Run Aggregate Supply Curve	831
<b>Apply the Concept:</b> How Sticky Are Wages?	832
Shifts of the Short-Run Aggregate Supply Curve versus Movements along It	834
Variables That Shift the Short-Run Aggregate Supply Curve	834
<b>24.3 Macroeconomic Equilibrium in the Long Run and the Short Run</b>	<b>836</b>
Recessions, Expansions, and Supply Shocks	837
<b>Apply the Concept:</b> Does It Matter What Causes a Decline in Aggregate Demand?	838
<b>Apply the Concept:</b> How Long Is the Long Run in Macroeconomics?	841
<b>24.4 A Dynamic Aggregate Demand and Aggregate Supply Model</b>	<b>843</b>
What Is the Usual Cause of Inflation?	844
The Recession of 2007–2009	844
<b>Solved Problem 24.4:</b> Showing the Oil Shock of 1974–1975 on a Dynamic Aggregate Demand and Aggregate Supply Graph	847
<b>Conclusion</b>	<b>848</b>
<b>Chapter Summary and Problems</b>	<b>849</b>
<b>Appendix: Macroeconomic Schools of Thought</b>	<b>858</b>
The Monetarist Model	858
The New Classical Model	859
The Real Business Cycle Model	859
The Austrian Model	860
<b>Apply the Concept:</b> Karl Marx: Capitalism's Severest Critic	860

## PART 9 Monetary and Fiscal Policy

<b>CHAPTER 25: Money, Banks, and the Federal Reserve System</b>	<b>862</b>
<b>Does India Need Paper Currency?</b>	<b>862</b>
<b>25.1 What Is Money, and Why Do We Need It?</b>	<b>864</b>
Barter and the Invention of Money	864
The Functions of Money	865
What Can Serve as Money?	866
<b>Apply the Concept:</b> Your Money Is No Good Here!	867
<b>25.2 How Is Money Measured in the United States Today?</b>	<b>868</b>
M1: A Narrow Definition of the Money Supply	868
M2: A Broad Definition of Money	869
<b>Don't Let This Happen to You:</b> Don't Confuse Money with Income or Wealth	870

<b>Solved Problem 25.2:</b> The Definitions of M1 and M2	870
What about Credit Cards and Debit Cards?	871
<b>Apply the Concept:</b> Are Bitcoins Money?	871
<b>25.3 How Do Banks Create Money?</b>	<b>872</b>
Bank Balance Sheets	872
<b>Apply the Concept:</b> Will Fintech Make It Easier for You to Borrow?	873
Using T-accounts to Show How a Bank Can Create Money	874
The Simple Deposit Multiplier	876
<b>Don't Let This Happen to You:</b> Don't Confuse Assets and Liabilities	877
<b>Solved Problem 25.3:</b> Showing How Banks Create Money	878
The Simple Deposit Multiplier versus the Real-World Deposit Multiplier	880
<b>25.4 The Federal Reserve System</b>	<b>881</b>
The Establishment of the Federal Reserve System	881
How the Federal Reserve Manages the Money Supply	882
The "Shadow Banking System" and the Financial Crisis of 2007–2009	885
<b>25.5 The Quantity Theory of Money</b>	<b>887</b>
Connecting Money and Prices: The Quantity Equation	888
The Quantity Theory Explanation of Inflation	888
How Accurate Are Forecasts of Inflation Based on the Quantity Theory?	889
High Rates of Inflation	890
<b>Apply the Concept:</b> The German Hyperinflation of the Early 1920s	890
<b>Conclusion</b>	<b>891</b>
<b>Chapter Summary and Problems</b>	<b>892</b>

<b>CHAPTER 26: Monetary Policy</b>	<b>900</b>
<b>Why Would a Bank Pay a Negative Interest Rate?</b>	<b>900</b>
<b>26.1 What Is Monetary Policy?</b>	<b>902</b>
The Goals of Monetary Policy	902
<b>26.2 The Money Market and the Fed's Choice of Monetary Policy Targets</b>	<b>904</b>
Monetary Policy Targets	904
The Demand for Money	904
Shifts in the Money Demand Curve	905
How the Fed Manages the Money Supply:	
A Quick Review	906
Equilibrium in the Money Market	906
A Tale of Two Interest Rates	908
Choosing a Monetary Policy Target	908
The Importance of the Federal Funds Rate	908
The Fed's New Policy Tools	909
<b>26.3 Monetary Policy and Economic Activity</b>	<b>910</b>
How Interest Rates Affect Aggregate Demand	910
The Effects of Monetary Policy on Real GDP and the Price Level	911

<b>Apply the Concept:</b> Too Low for Zero: Central Banks, Quantitative Easing, and Negative Interest Rates	912	A Summary of How Fiscal Policy Affects Aggregate Demand	953
Can the Fed Eliminate Recessions?	914	<b>27.3 Fiscal Policy in the Dynamic Aggregate Demand and Aggregate Supply Model</b>	<b>954</b>
Fed Forecasts	915	<b>27.4 The Government Purchases and Tax Multipliers</b>	<b>955</b>
<b>Apply the Concept:</b> Trying to Hit a Moving Target: Making Policy with “Real-Time Data”	916	The Effect of Changes in the Tax Rate	958
A Summary of How Monetary Policy Works	917	Taking into Account the Effects of Aggregate Supply	958
<b>Don’t Let This Happen to You:</b> Remember That with Monetary Policy, It’s the Interest Rates—Not the Money—That Counts	918	The Multipliers Work in Both Directions	959
<b>26.4 Monetary Policy in the Dynamic Aggregate Demand and Aggregate Supply Model</b>	<b>918</b>	<b>Solved Problem 27.4:</b> Fiscal Policy Multipliers	959
The Effects of Monetary Policy on Real GDP and the Price Level: A More Complete Account	919	<b>27.5 The Limits to Using Fiscal Policy to Stabilize the Economy</b>	<b>960</b>
Using Monetary Policy to Fight Inflation	920	<b>Apply the Concept:</b> Why Was the Recession of 2007–2009 So Severe?	961
<b>Solved Problem 26.4:</b> The Effects of Monetary Policy	921	Does Government Spending Reduce Private Spending?	962
<b>26.5 A Closer Look at the Fed’s Setting of Monetary Policy Targets</b>	<b>923</b>	Crowding Out in the Short Run	962
Should the Fed Target the Money Supply?	923	Crowding Out in the Long Run	964
Why Doesn’t the Fed Target Both the Money Supply and the Interest Rate?	923	Fiscal Policy in Action: Did the Stimulus Package of 2009 Succeed?	964
The Taylor Rule	924	<b>27.6 Deficits, Surpluses, and Federal Government Debt</b>	<b>967</b>
<b>Solved Problem 26.5:</b> Applying the Taylor Rule	925	How the Federal Budget Can Serve as an Automatic Stabilizer	968
Inflation Targeting	926	<b>Apply the Concept:</b> Did Fiscal Policy Fail during the Great Depression?	969
<b>Apply the Concept:</b> Should the Fed Worry about the Prices of Food and Gasoline?	927	Should the Federal Budget Always Be Balanced?	970
<b>26.6 Fed Policies during the 2007–2009 Recession</b>	<b>928</b>	<b>Solved Problem 27.6:</b> The Greek Government Confronts a Budget Deficit	971
The Inflation and Deflation of the Housing Market Bubble	928	The Federal Government Debt	972
The Changing Mortgage Market	930	Is Government Debt a Problem?	973
The Role of Investment Banks	930	<b>27.7 Long-Run Fiscal Policy and Economic Growth</b>	<b>973</b>
<b>Apply the Concept:</b> The Wonderful World of Leverage	931	Explaining Long-Run Increases in Real GDP	973
The Fed and the Treasury Department Respond	932	How Can Fiscal Policy Affect Long-Run Economic Growth? The Long-Run Effects of Tax Policy	974
<b>Conclusion</b>	<b>934</b>	Tax Simplification	975
<b>Chapter Summary and Problems</b>	<b>935</b>	The Economic Effects of Tax Reform	976
<b>CHAPTER 27: Fiscal Policy</b>	<b>944</b>	How Large Are Supply-Side Effects?	977
<b>Can Fiscal Policy Increase Economic Growth?</b>	<b>944</b>	<b>Apply the Concept:</b> Will President Trump’s Policy Proposals Raise the Rate of Economic Growth?	978
<b>27.1 What Is Fiscal Policy?</b>	<b>946</b>	<b>Conclusion</b>	<b>980</b>
What Fiscal Policy Is and What It Isn’t	946	<b>Chapter Summary and Problems</b>	<b>981</b>
Automatic Stabilizers versus Discretionary Fiscal Policy	946	<b>Appendix: A Closer Look at the Multiplier</b>	<b>989</b>
An Overview of Government Spending and Taxes	946	<b>An Expression for Equilibrium Real GDP</b>	<b>989</b>
<b>Apply the Concept:</b> Is Spending on Social Security and Medicare a Fiscal Time Bomb?	949	<b>A Formula for the Government Purchases Multiplier</b>	<b>990</b>
<b>27.2 The Effects of Fiscal Policy on Real GDP and the Price Level</b>	<b>951</b>	<b>A Formula for the Tax Multiplier</b>	<b>991</b>
Short-Run Expansionary and Contractionary Fiscal Policy	951	<b>The “Balanced Budget” Multiplier</b>	<b>991</b>
<b>Don’t Let This Happen to You:</b> Don’t Confuse Fiscal Policy and Monetary Policy	953	<b>The Effects of Changes in Tax Rates on the Multiplier</b>	<b>992</b>
		<b>The Multiplier in an Open Economy</b>	<b>992</b>
		Problems and Applications	993

<b>CHAPTER 28: Inflation, Unemployment, and Federal Reserve Policy</b>	<b>994</b>
<b>The Fed Tries for a “Soft Landing,” while General Motors and Toll Brothers Look On</b>	<b>994</b>
<b>28.1 The Discovery of the Short-Run Trade-off between Unemployment and Inflation</b>	<b>996</b>
Explaining the Phillips Curve with Aggregate Demand and Aggregate Supply Curves	997
Is the Phillips Curve a Policy Menu?	998
Is the Short-Run Phillips Curve Stable?	998
The Long-Run Phillips Curve	998
The Role of Expectations of Future Inflation	999
<b>Apply the Concept:</b> Do Workers Understand Inflation?	1000
<b>28.2 The Short-Run and Long-Run Phillips Curves</b>	<b>1001</b>
Shifts in the Short-Run Phillips Curve	1002
How Does a Vertical Long-Run Phillips Curve Affect Monetary Policy?	1003
<b>Apply the Concept:</b> Does the Natural Rate of Unemployment Ever Change?	1004
<b>Solved Problem 28.2:</b> Changing Views of the Phillips Curve	1005
<b>28.3 Expectations of the Inflation Rate and Monetary Policy</b>	<b>1006</b>
The Implications of Rational Expectations for Monetary Policy	1006
Is the Short-Run Phillips Curve Really Vertical?	1007
Real Business Cycle Models	1008
<b>28.4 Federal Reserve Policy from the 1970s to the Present</b>	<b>1008</b>
The Effect of a Supply Shock on the Phillips Curve	1009
Paul Volcker and Disinflation	1010
<b>Don't Let This Happen to You:</b> Don't Confuse Disinflation with Deflation	1011
<b>Solved Problem 28.4:</b> Using Monetary Policy to Lower the Inflation Rate	1011
Alan Greenspan, Ben Bernanke, Janet Yellen, and the Crisis in Monetary Policy	1013
<b>Apply the Concept:</b> Should the Fed Attempt to Guide the Expectations of Investors?	1015
The Debate over the Fed's Future	1017
<b>Conclusion</b>	<b>1020</b>
<b>Chapter Summary and Problems</b>	<b>1021</b>

## PART 10 The International Economy

<b>CHAPTER 29: Macroeconomics in an Open Economy</b>	<b>1028</b>
<b>Amazon Deals with the Effects of a Strong Dollar</b>	<b>1028</b>
<b>29.1 The Balance of Payments: Linking the United States to the International Economy</b>	<b>1030</b>
The Current Account	1030

The Financial Account	1032
The Capital Account	1032
Why Is the Balance of Payments Always Zero?	1032
<b>Don't Let This Happen to You:</b> Don't Confuse the Balance of Trade, the Current Account Balance, and the Balance of Payments	1033
<b>Solved Problem 29.1:</b> Understanding the Arithmetic of the Balance of Payments	1034
<b>29.2 The Foreign Exchange Market and Exchange Rates</b>	<b>1034</b>
<b>Apply the Concept:</b> Exchange Rate Listings	1035
Equilibrium in the Market for Foreign Exchange	1036
How Do Shifts in Demand and Supply Affect the Exchange Rate?	1037
Some Exchange Rates Are Not Determined by the Market	1038
How Movements in the Exchange Rate Affect Exports and Imports	1039
<b>Apply the Concept:</b> Is a Strong Currency Good for a Country?	1039
<b>Don't Let This Happen to You:</b> Don't Confuse What Happens When a Currency Appreciates with What Happens When It Depreciates	1041
<b>Solved Problem 29.2:</b> Toyota Rides the Exchange Rate Rollercoaster	1041
The Real Exchange Rate	1042
<b>29.3 The International Sector and National Saving and Investment</b>	<b>1043</b>
Net Exports Equal Net Foreign Investment	1043
Domestic Saving, Domestic Investment, and Net Foreign Investment	1044
<b>Solved Problem 29.3:</b> Arriving at the Saving and Investment Equation	1044
<b>29.4 The Effect of a Government Budget Deficit on Investment</b>	<b>1046</b>
<b>Apply the Concept:</b> Why Is the United States Called the “World's Largest Debtor”?	1047
<b>29.5 Monetary Policy and Fiscal Policy in an Open Economy</b>	<b>1048</b>
Monetary Policy in an Open Economy	1049
Fiscal Policy in an Open Economy	1049
<b>Conclusion</b>	<b>1050</b>
<b>Chapter Summary and Problems</b>	<b>1051</b>

<b>CHAPTER 30: The International Financial System</b>	<b>1058</b>
<b>Bayer and the Great European Currency Experiment</b>	<b>1058</b>
<b>30.1 Exchange Rate Systems</b>	<b>1060</b>
<b>Don't Let This Happen to You:</b> Remember That Modern Currencies Are Fiat Money	1061
<b>30.2 The Current Exchange Rate System</b>	<b>1061</b>
The Floating Dollar	1061
What Determines Exchange Rates in the Long Run?	1062

<b>Apply the Concept:</b> The Big Mac Theory of Exchange Rates	1063	<b>Appendix: The Gold Standard and the Bretton Woods System</b>	<b>1081</b>
<b>Solved Problem 30.2:</b> Calculating Purchasing Power Parity Exchange Rates Using Big Macs	1064	<b>The Gold Standard</b>	<b>1081</b>
The Euro	1066	<b>The End of the Gold Standard</b>	<b>1081</b>
<b>Apply the Concept:</b> Greece and Germany: Diverse Economies, Common Currency	1067	<b>The Bretton Woods System</b>	<b>1082</b>
Pegging against the Dollar	1069	<b>The Collapse of the Bretton Woods System</b>	<b>1083</b>
<b>Apply the Concept:</b> The Chinese Yuan: The World's Most Controversial Currency	1071	Review Questions	1085
<b>30.3 International Capital Markets</b>	<b>1073</b>	Problems and Applications	1085
<b>Conclusion</b>	<b>1075</b>	<b>Glossary</b>	<b>G-1</b>
<b>Chapter Summary and Problems</b>	<b>1076</b>	<b>Company Index</b>	<b>I-1</b>
		<b>Subject Index</b>	<b>I-3</b>

	<b>Chapter 30 Appendix:</b> The Gold Standard and the Bretton Woods System	

# PREFACE

Our approach in this new edition remains what it was in the first edition, published nearly 15 years ago: to provide students and instructors an economics text that delivers complete economics coverage with many real-world business examples. Our goal has been to teach economics in a “widget-free” way by using real-world business and policy examples. We are gratified by the enthusiastic response from students and instructors who have used the first six editions of this book and who have made it a best-selling economics textbook.

Much has happened in the U.S. and world economies since we prepared the previous edition, including the election of a U.S. president with a distinctive approach to economic policy. We have incorporated many of these developments in the new real-world examples and policy discussions in this edition and also in the digital resources.

## New to This Edition

We are grateful to the many instructors and students who made suggestions for improvements in the previous edition. We have done our best to incorporate as many of those suggestions as possible. Here is an overview of the revisions, followed by a more detailed description.

### Overview of Changes

- All the chapter openers feature either new companies or have updated information. Students can visit MyLab Economics to watch a brief video that summarizes the key points of each chapter opener.
- Chapters 1–4, include new *An Inside Look* features to help students apply economic thinking to current events and policy debates as they are presented in news articles. Additional news articles and analyses appear weekly on MyLab Economics.
- There are 20 new *Apply the Concept* features (formerly titled *Making the Connection*) to help students tie economic concepts to current events and policy issues. The *Apply the Concept* features that were retained from the previous edition are updated. Students can visit MyLab Economics to watch more than 100 videos in which we summarize the key points in each feature. Related assessment accompanies each video, so students can test their understanding before moving on to a new section of the chapter.
- There are 5 new *Solved Problems* and 12 heavily revised *Solved Problems*. This feature helps students break down and answer economic problems step by step. There are additional Interactive *Solved Problems* on MyLab Economics, where students can receive feedback and tutorial help.
- There is a new category of end-of-chapter material titled *Critical Thinking Exercises*. We were motivated to add this new category of exercises because many instructors have told us that students need help building skills in the following areas: (1) analyzing and interpreting information; (2) applying reasoning and logic to new or unfamiliar ideas and situations; (3) examining ideas and concepts from multiple perspectives; and (4) clearly communicating their findings in a brief paper or class presentation. Students can complete these exercises on MyLab Economics and receive feedback and tutorial help.
- All the figures and tables are updated with the latest data available. Video animations of all the numbered figures and select tables are located on MyLab Economics. Graded practice exercises are included with these animations.

- We have replaced or updated many of the end-of-chapter *Problems and Applications*. In most chapters, one or two problems include graphs or tables for students to analyze. Select chapters have a category titled *Real-Time Data Exercises*, and we updated some of these exercises. Students can complete these exercises on MyLab Economics and receive feedback and tutorial help.

## New Content and Features by Chapter

Here is a description of key changes by chapter.

Chapter 1, “Economics: Foundations and Models,” opens with a new discussion of why Ford Motor Company manufactures cars in both the United States and Mexico. *An Inside Look* at the end of the chapter presents a news article and analysis of how likely it is that significant numbers of manufacturing jobs will return to the United States from overseas. New *Solved Problem 1.1* analyzes the marginal benefit and marginal cost of speed limits on highways. A new *Apply the Concept* examines why countries trade with each other and how economic concepts can help us evaluate policy debates about tariffs on imports. Taking a principles of economics class requires students to learn different terms, models, and a new way of analyzing real-world events. It can be challenging for students, especially non-majors, to appreciate how this course can help them in a career in business or government or in a nonprofit organization. We therefore decided to add to Chapter 1 a new section that describes economics as a career and highlights the key skills students of any major can gain from studying economics.

Chapter 2, “Trade-offs, Comparative Advantage, and the Market System,” opens with an updated discussion of the resource allocation decisions managers at Tesla Motors face. *An Inside Look* at the end of the chapter discusses Tesla’s decision to build a factory in Nevada to mass produce lithium-ion batteries for its electric cars. A new *Apply the Concept* illustrates how managers at the nonprofit organization Feeding America use the market mechanism to more efficiently allocate food based on the needs of food programs around the country.

Chapter 3, “Where Prices Come From: The Interaction of Demand and Supply,” opens with a new discussion of how Coca-Cola and Pepsi-Cola responded to a fall in demand for sodas by introducing premium bottled water, sometimes called smart water. We use the market for premium bottled water to develop the demand and supply model. *An Inside Look* at the end of the chapter examines how McDonald’s responded to shifts in consumer demand by serving breakfast all day and offering online ordering and home delivery. There are three new *Apply the Concepts*: “Virtual Reality Headsets: Will a Substitute Fail for a Lack of Complements?”; “Millennials Shake Up the Markets for Soda, Groceries, Big Macs, and Running Shoes”; and “Forecasting the Demand for Premium Bottled Water.”

Chapter 4, “Economic Efficiency, Government Price Setting, and Taxes,” opens with a new discussion about the economic link between food riots in Venezuela and the rise in popularity of Uber in the United States. At the end of the chapter, *An Inside Look* examines problems Uber has encountered in attempting to expand its services in the United Kingdom. There are two new *Apply the Concepts*: “The Consumer Surplus from Uber” and “Price Controls Lead to Economic Decline in Venezuela.”

Chapter 5, “Externalities, Environmental Policy, and Public Goods,” opens with a new discussion of ExxonMobil’s support of a carbon tax. Two *Apply the Concepts* in the chapter now incorporate the latest information about government policies toward air pollution and global warming.

Chapter 6, “Elasticity: The Responsiveness of Demand and Supply,” opens with a new discussion of how to evaluate the success of the soda tax enacted by several cities, including San Francisco and Philadelphia, in improving people’s health and increasing tax revenue.

Chapter 7, “The Economics of Health Care,” opens with a new discussion of how insurance companies are dealing with the effects of the Patient Protection and Affordable Care Act of 2010. There is also a discussion of the 2017 debate in Congress over whether that act should be extensively revised.

Chapter 8, “Firms, the Stock Market, and Corporate Governance,” opens with a new comparison of the initial public offerings of Snapchat, Twitter, and Facebook. A new *Apply the Concept* explores why investors are concerned about potential corporate governance issues at Snap and other social media firms.

Chapter 9, “Comparative Advantage and the Gains from International Trade,” opens with the decision by Mondelez to move production of Oreo cookies to Mexico to provide context for a new discussion of recent debates about the North American Free Trade Agreement (NAFTA) and the Trans-Pacific Partnership (TPP). A new *Apply the Concept* analyzes who gains and who loses from U.S. trade with China.

Chapter 10, “Consumer Choice and Behavioral Economics,” opens with an updated discussion of the problems plaguing the JCPenney department store chain. A new *Apply the Concept* discusses why ticket scalpers have made a larger profit from the hit Broadway musical *Hamilton* than have the show’s producers or stars. New *Solved Problem 10.3* analyzes why Tesla doesn’t charge workers to park in the lot at its California factory even though the lot has a severe shortage of spaces.

Chapter 11, “Technology, Production, and Costs,” opens with an updated discussion of the effects of massive open online courses (MOOCs) on the costs of higher education. A new *Apply the Concept* examines how software company Segment.com rearranged work areas to increase employee output.

Chapter 12, “Firms in Perfectly Competitive Markets,” opens with an updated discussion of the difficulty farmers have making an economic profit selling cage-free eggs. A new *Solved Problem* analyzes why a wheat farmer decided to take 170 acres out of production and plant grass, and a new *Apply the Concept* discusses competition in the Asian restaurant market in New York City.

Chapter 13, “Monopolistic Competition: The Competitive Model in a More Realistic Setting,” opens with a new discussion of Panera Bread’s strategy of differentiating its restaurants by serving only “clean food.” A new *Apply the Concept* continues the discussion of that company’s strategy. Another new *Apply the Concept* discusses a new phenomenon in the restaurant industry: ghost restaurants that exist only online. New *Solved Problem 13.3* analyzes why Red Robin abandoned its experiment in fast-casual restaurants.

Chapter 14, “Oligopoly: Firms in Less Competitive Markets,” opens with an updated discussion of competition in the music streaming business. A new *Apply the Concept* discusses how some bakeries have tried to use government regulations to eliminate competition from home bakers. A new *Solved Problem 14.2* uses game theory to analyze why Spotify and Apple Music offer student discounts.

Chapter 15, “Monopoly and Antitrust Policy,” includes a new *Apply the Concept* discussing the reasons for the high prices of some generic drugs.

Chapter 16, “Pricing Strategy,” opens with an updated discussion of how Disney uses big data to improve its theme park pricing. A new *Apply the Concept* discusses how firms ranging from airlines to zoos use big data and dynamic pricing to maximize profit.

Chapter 17, “The Markets for Labor and Other Factors of Production,” opens with an updated discussion of whether Rio Tinto’s extensive use of robots to mine ore in Australia is an indicator of future automation in other industries. Immigration has become a particularly contentious political issue, which led us to add the new section “The Effect of Immigration on the U.S. Labor Market,” including new Figure 17.6, which shows annual legal immigration into the United States as a percentage of the U.S. population.

Chapter 18, “Public Choice, Taxes, and the Distribution of Income,” opens with a new discussion of proposals to dramatically change how the federal government taxes businesses. We have updated the chapter’s discussion to highlight the key points in this debate.

Chapter 19, “GDP: Measuring Total Production and Income,” opens with an updated discussion of how Ford and other car companies deal with the business cycle. A new *Apply the Concept* discusses an innovative Web site created by Steve Ballmer, former CEO of Microsoft, that uses the preamble to the U.S. Constitution as a framework for reorganizing macroeconomic data.

Chapter 20, “Unemployment and Inflation,” opens with a new discussion of Boeing’s decision in 2017 to lay off workers, despite a growing U.S. economy. The chapter includes an updated analysis of the reasons for the decline in labor force participation among prime-aged males. A new *Apply the Concept* discusses how to characterize the unemployment resulting from Boeing’s layoffs.

Chapter 21, “Economic Growth, the Financial System, and Business Cycles,” opens with a new discussion of whether peak oil demand threatens the long-run growth of Chevron Corporation.

Chapter 22, “Long-Run Economic Growth: Sources and Policies,” begins with a new opener that uses Wisconsin-based Rexnord Corporation’s decision to relocate some production to Mexico to frame the discussion of whether that country is capable of increasing its growth rate.

Chapter 23, “Aggregate Expenditure and Output in the Short Run,” contains thoroughly updated graphs and tables.

Chapter 24, “Aggregate Demand and Aggregate Supply Analysis,” opens with a new discussion of the effect of the business cycle on KB Home and other home builders.

Chapter 25, “Money, Banks, and the Federal Reserve System,” opens with a new discussion of why many people in India are using Paytm, an app that allows users to make payments at retail stores or online. A new *Apply the Concept* continues the analysis of this topic by discussing why some businesses in the United States and Europe no longer accept cash.

Chapter 26, “Monetary Policy,” opens with an updated account of why interest rates on some mortgages in Europe are negative. An important new section describes the policy tools the Federal Reserve uses to manage its target for the federal funds rate, now that banks hold \$2 trillion in excess reserves.

Chapter 27, “Fiscal Policy,” opens with a new discussion of the effects of federal government infrastructure spending on Vulcan Materials and other construction firms, as well as on the wider economy. A centerpiece of President Trump’s economic plan is using changes to the federal tax code, as well as other policies, to increase the annual growth rate of real GDP to 3 percent. We discuss what would be required

to achieve this goal in a new section, “Explaining Long-Run Increases in Real GDP,” and in a new *Apply the Concept*. New Table 27.4 summarizes how the Congressional Budget Office forecast real GDP growth for 2017–2027.

Chapter 28, “Inflation, Unemployment, and Federal Reserve Policy,” opens with a new discussion of how the Fed’s attempts to bring the economy in for a soft landing will affect General Motors, Toll Brothers, and other firms.

Chapter 29, “Macroeconomics in an Open Economy,” opens with a new discussion of the effect of fluctuations in exchange rates on Amazon’s profit. New *Solved Problem* 29.2 analyzes how fluctuations in the value of the yen affect Toyota, and an updated *Apply the Concept* considers how the Trump administration has reacted to fluctuations in the value of the dollar.

Chapter 30, “The International Financial System,” contains updated coverage of the struggles of the euro and the pressure the Trump administration has faced to label China a currency manipulator.

To make room for the new content described earlier, we have cut approximately 20 *Apply the Concepts* and 5 *Solved Problems* from the previous edition and transferred some of them to the book’s *Instructor’s Manual*, where they are available for instructors who wish to continue using them.

## Solving Teaching and Learning Challenges

Many students who take a principles of economics course have difficulty seeing the relevance of the key concepts of opportunity cost, trade-offs, scarcity, and demand and supply to their lives and their careers. This reduces the willingness of some students to prepare for class and to be engaged during class. We address this challenge with contextual learning, a modern organization of content, and an extensive selection of digital assets available on MyLab Economics.

### The Foundation:

#### Contextual Learning and Modern Organization

We believe a course is successful if students can apply what they have learned to both their personal lives and their careers, and if they have developed the analytical skills to understand what they read in the media. That’s why we explain economic concepts by using many real-world business examples and applications in the chapter openers, graphs, *Apply the Concept* features, *An Inside Look* features, and end-of-chapter problems. This approach helps majors from all disciplines become educated consumers, voters, and citizens. In addition to our widget-free approach, we have a modern organization and place interesting policy topics early in the book to pique student interest.

#### Microeconomics

We are convinced that students learn to apply economic principles best if they are taught in a familiar context. Whether they become artists, social workers, engineers, bankers, or government employees, students benefit from understanding economics. We therefore use many diverse real-world business and policy examples to illustrate economic concepts. Here are a few highlights of our approach to microeconomics:

- **A strong set of introductory chapters.** The introductory chapters provide students with a solid foundation in the basics. We emphasize the key ideas of marginal analysis

and economic efficiency. In Chapter 4, “Economic Efficiency, Government Price Setting, and Taxes,” we use the concepts of consumer and producer surplus to measure the economic effects of price ceilings and price floors as they relate to the familiar examples of rental properties and the minimum wage. (We revisit consumer and producer surplus in Chapter 9, “Comparative Advantage and the Gains from International Trade,” where we discuss outsourcing and analyze government policies that affect trade; in Chapter 15, “Monopoly and Antitrust Policy,” where we examine the effect of market power on economic efficiency; and in Chapter 16, “Pricing Strategy,” where we examine the effect of firm pricing policy on economic efficiency.) In Chapter 8, “Firms, the Stock Market, and Corporate Governance,” we provide students with a basic understanding of how firms are organized, raise funds, and provide information to investors. We also illustrate how in a market system entrepreneurs meet consumer wants and efficiently organize production.

- **Early coverage of policy issues.** To expose students to policy issues early in the course, we discuss trade policy in Chapter 1, “Economics: Foundations and Models”; rent control and the minimum wage in Chapter 4, “Economic Efficiency, Government Price Setting, and Taxes”; air pollution, global warming, and public goods in Chapter 5, “Externalities, Environmental Policy, and Public Goods”; government policy toward soda and other sweetened beverages in Chapter 6, “Elasticity: The Responsiveness of Demand and Supply”; and health care policy in Chapter 7, “The Economics of Health Care.”
- **Complete coverage of monopolistic competition.** We devote a full chapter, Chapter 13, “Monopolistic Competition: The Competitive Model in a More Realistic Setting,” to monopolistic competition prior to covering oligopoly and monopoly in Chapter 14, “Oligopoly: Firms in Less Competitive Markets,” and Chapter 15, “Monopoly and Antitrust Policy.” Although many instructors cover monopolistic competition very briefly or dispense with it entirely, we think it is an overlooked tool for reinforcing the basic message of how markets work in a context that is much more familiar to students than are the agricultural examples that dominate discussions of perfect competition. We use the monopolistic competition model to introduce the downward-sloping demand curve material usually introduced in a monopoly chapter. This approach helps students grasp the important point that nearly all firms—not just monopolies—face downward-sloping demand curves. Covering monopolistic competition directly after perfect competition also allows for early discussion of topics such as brand management and sources of competitive success. Nevertheless, we wrote the chapter so that instructors who prefer to cover monopoly (Chapter 15, “Monopoly and Antitrust Policy”) directly after perfect competition (Chapter 12, “Firms in Perfectly Competitive Markets”) can do so without loss of continuity.
- **Extensive, realistic game theory coverage.** In Chapter 14, “Oligopoly: Firms in Less Competitive Markets,” we use game theory to analyze competition among oligopolists. Game theory helps students understand how companies with market power make strategic decisions in many competitive situations. We use familiar companies such as Apple, Amazon, Dell, Spotify, and Walmart in our game theory applications.
- **Unique coverage of pricing strategy.** In Chapter 16, “Pricing Strategy,” we explore how firms use pricing strategies to increase profits. Students encounter pricing strategies everywhere—when they buy a movie ticket, book a flight for spring break, or research book prices online. We use these relevant, familiar examples to illustrate how companies use strategies such as price discrimination, cost-plus pricing, and two-part tariffs.

## Macroeconomics

Students come to study macroeconomics with a strong interest in understanding events and developments in the economy. We capture that interest and develop students’ economic intuition and understanding by presenting macroeconomics in a way that is modern and based in the real world of business and economic policy. And we believe

we achieve this presentation without making the analysis more difficult. We avoid the recent trend of using simplified versions of intermediate models, which are often more detailed and complex than what students need to understand the basic macroeconomic issues. Instead, we use a more realistic version of the familiar aggregate demand and aggregate supply model to analyze short-run fluctuations and monetary and fiscal policy. We also avoid the “dueling schools of thought” approach often used to teach macroeconomics at the principles level. We emphasize the many areas of macroeconomics where most economists agree. And we present throughout real business and policy situations to develop students’ intuition. Here are a few highlights of our approach to macroeconomics:

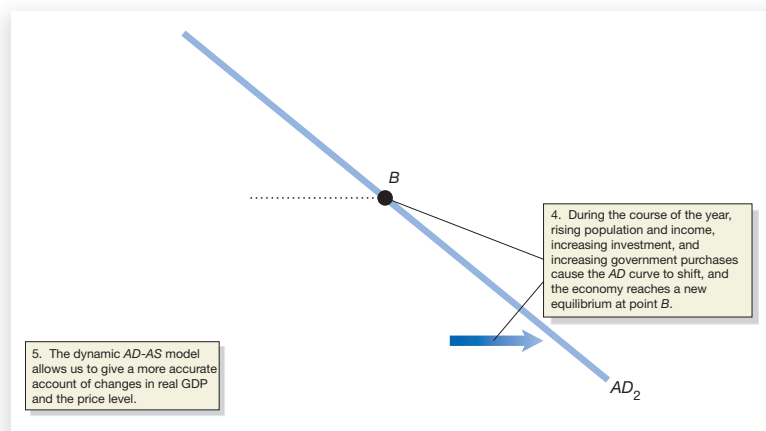

- **A careful discussion of macro statistics.** Many students pay some attention to the financial news and know that the release of statistics by federal agencies can cause movements in stock and bond prices. A background in macroeconomic statistics helps clarify some of the policy issues encountered in later chapters. In Chapter 19, “GDP: Measuring Total Production and Income,” and Chapter 20, “Unemployment and Inflation,” we provide students with an understanding of the uses and potential shortcomings of the key macroeconomic statistics, without getting bogged down in the minutiae of how the statistics are constructed. So, for instance, we discuss the important differences between the payroll survey and the household survey for understanding conditions in the labor market. We explain why financial markets react more strongly to news from the payroll survey. We provide a discussion of the employment–population ratio, which is not covered in some other texts but which many economists regard as a key measure of labor market performance.
- **Early coverage of long-run topics.** We place key macroeconomic issues in their long-run context in Chapter 21, “Economic Growth, the Financial System, and Business Cycles,” and Chapter 22, “Long-Run Economic Growth: Sources and Policies.” Chapter 21 puts the business cycle in the context of underlying long-run growth and discusses what actually happens during the phases of the business cycle. We believe this material is important if students are to have the understanding of business cycles they will need to interpret economic events; this material is often discussed only briefly or omitted entirely in other books. We know that many instructors prefer to have a short-run orientation to their macro courses, with a strong emphasis on policy. Accordingly, we have structured Chapter 21 so that its discussion of long-run growth is sufficient for instructors who want to move quickly to short-run analysis. Chapter 22 uses a simple neoclassical growth model to explain important growth issues. We apply the model to topics such as the decline of the Soviet economy, the long-run prospects for growth in China, the implications of the slowdown in productivity growth for the U.S. economy, and the failure of many developing countries to sustain high growth rates. *And* we challenge students with the discussion “Why Isn’t the Whole World Rich?”
- **A dynamic model of aggregate demand and aggregate supply.** We take a fresh approach to the standard aggregate demand and aggregate supply (AD–AS) model. We realize there is no good, simple alternative to using the AD–AS model when explaining movements in the price level and in real GDP. But we know that more instructors are dissatisfied with the AD–AS model than with any other aspect of the macro principles course. The key problem, of course, is that AD–AS is a static model that attempts to account for dynamic changes in real GDP and the price level. Our approach retains the basics of the AD–AS model but makes it more accurate and useful by making it more dynamic. We emphasize two points: (1) Changes in the position of the short-run (upward-sloping) aggregate supply curve depend mainly on the state of expectations of the inflation rate; and (2) the existence of growth in the economy means that the long-run (vertical) aggregate supply curve shifts to the right every year. This “dynamic” AD–AS model provides students with a more accurate understanding of the causes and consequences of fluctuations in real GDP and the price level. Chapter 24, “Aggregate

The first acetate overlay adds the shifts in the long- and short-run aggregate supply curves.

The second acetate overlay adds the shifts in the aggregate demand curve to complete the dynamic model.

Demand and Aggregate Supply Analysis,” includes a three-layer, full-color acetate for the key introductory dynamic  $AD-AS$  graph (Figure 24.8, “A Dynamic Aggregate Demand and Aggregate Supply Model,” on page 844 and reproduced on the left). We created this acetate to help students see how the graph builds step by step and to help make the graph easier for instructors to present. The acetate will help instructors who want to use dynamic  $AD-AS$  in class but believe the model needs to be developed carefully. We introduce this model in Chapter 24 and use it to discuss monetary policy in Chapter 26, “Monetary Policy,” and fiscal policy in Chapter 27, “Fiscal Policy.” The material on dynamic  $AD-AS$  is presented in self-contained sections in Chapters 24, 26, and 27, so instructors may safely omit the sections on the dynamic  $AD-AS$  model without any loss in continuity to the discussion of macroeconomic theory and policy.

- **Extensive coverage of monetary policy.** Because of the central role monetary policy plays in the economy and in students’ curiosity about business and financial news, we devote two chapters—Chapter 26, “Monetary Policy,” and Chapter 28, “Inflation, Unemployment, and Federal Reserve Policy”—to the topic. We emphasize the issues involved in the Fed’s choice of monetary policy targets, and we include coverage of the Taylor rule. We also cover the new Fed’s new policy tools and the debate over whether the Fed’s policies during and after the 2007–2009 financial crisis were consistent with its mandate under the Federal Reserve Act.
- **Coverage of both the demand-side and supply-side effects of fiscal policy.** Our discussion of fiscal policy in Chapter 27, “Fiscal Policy,” carefully distinguishes between automatic stabilizers and discretionary fiscal policy. We also provide significant coverage of the supply-side effects of fiscal policy. A new section discusses the requirements for the Trump administration to hit its goal of restoring the long-run annual growth rate of real GDP to 3 percent.
- **A self-contained but thorough discussion of the Keynesian income-expenditure approach.** The Keynesian income-expenditure approach (the “45°-line diagram,” or “Keynesian cross”) is useful for introducing students to the short-run relationship between spending and production. Many instructors, however, prefer to omit this material. Therefore, we use the 45°-line diagram only in Chapter 23, “Aggregate Expenditure and Output in the Short Run.” The discussions of monetary and fiscal policy in Chapter 26, “Monetary Policy,” and Chapter 27, “Fiscal Policy,” respectively, use only the  $AD-AS$  model, making it possible to omit Chapter 23.

- **Extensive international coverage.** We include three chapters devoted to international topics: Chapter 9, “Comparative Advantage and the Gains from International Trade,” Chapter 29, “Macroeconomics in an Open Economy,” and Chapter 30, “The International Financial System.” Having a good understanding of the international trading and financial systems is essential to understanding the macroeconomy and to satisfying students’ curiosity about the economic world around them. In addition to the material in our three international chapters, we weave international comparisons into the narratives of several other chapters, including our discussion of labor market policies in Chapter 28, “Inflation, Unemployment, and Federal Reserve Policy,” and central banking in Chapter 25, “Money, Banks, and the Federal Reserve System.”
- **Flexible chapter organization.** Because we realize that there are a variety of approaches to teaching principles of macroeconomics, we have structured our chapters for maximum flexibility. For example, our discussion of long-run economic growth in Chapter 21, “Economic Growth, the Financial System, and Business Cycles,” makes it possible for instructors to omit the more thorough discussion of these issues in Chapter 22, “Long-Run Economic Growth: Sources and Policies.” Our discussion of the Keynesian 45°-line diagram is confined to Chapter 23, “Aggregate Expenditure and Output in the Short Run,” so that instructors who do not use this approach can proceed directly to aggregate demand and aggregate supply analysis in Chapter 24, “Aggregate Demand and Aggregate Supply Analysis.” While we devote two chapters to monetary policy, the first of these—Chapter 26, “Monetary Policy”—is a self-contained discussion, so instructors may safely omit the material in Chapter 28, “Inflation, Unemployment, and Federal Reserve Policy,” if they choose to. Finally, instructors may choose to omit all three of the international chapters (Chapter 9, “Comparative Advantage and the Gains from International Trade,” Chapter 29, “Macroeconomics in an Open Economy,” and Chapter 30, “The International Financial System”), cover just Chapter 9 on international trade, cover just Chapter 29, or cover Chapters 29 and 30 while omitting Chapter 9. Please refer to the flexibility chart shown earlier on pages xxvi–xxvii to help select the chapters and order best suited to your classroom needs.

## MyLab Economics

### OVERVIEW

#### Reach every student by pairing this text with MyLab Economics

MyLab is the teaching and learning platform that empowers you to reach *every* student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. Learn more about MyLab Economics at [www.pearson.com/mylab/economics](http://www.pearson.com/mylab/economics).

#### Deliver trusted content

You deserve teaching materials that meet your own high standards for your course. That’s why we partner with highly respected authors to develop interactive content and course-specific resources that you can trust—and that keep your students engaged.

#### Empower each learner

Each student learns at a different pace. Personalized learning pinpoints the precise areas where each student needs practice, giving all students the support they need—when and where they need it—to be successful.

#### Teach your course your way

Your course is unique. So whether you’d like to build your own assignments, teach multiple sections, or set prerequisites, MyLab gives you the flexibility to easily create *your* course to fit *your* needs.

Improve student results

When you teach with MyLab, student performance improves. That’s why instructors have chosen MyLab for over 15 years, touching the lives of over 50 million students.

FEATURES IN THE BOOK AND SUPPORTING RESOURCES ON MYLAB ECONOMICS

Students and instructors will find the following features in the seventh edition and supporting online resources on MyLab Economics.

Business Cases and An Inside Look News Articles

Each chapter-opening case provides a real-world context for learning, sparks students’ interest in economics, and helps unify the chapter. The case describes an actual company facing a real situation. The company is integrated in the narrative, graphs, and pedagogical features of the chapter. Some of the chapter openers focus on the role of entrepreneurs in developing new products and bringing them to market. For example, Chapter 2 features Elon Musk of Tesla Motors; Chapter 24 features KB Home founders Donald Kaufman and Eli Broad; Chapter 25 features Paytm founder Vijay Shekhar Sharma; and Chapter 29 features Jeff Bezos of Amazon.

Students can visit MyLab Economics to watch a brief video we developed and filmed to summarize the key points of each chapter opener.

Where Prices Come From:  
The Interaction of Demand  
and Supply

### How Smart Is Your Water?

What does a firm do when its primary product starts to fall out of fashion? The Coca-Cola Company and PepsiCo, Inc., have faced that question in recent years. Between 2004 and 2016, measured by volume, sales in the United States of carbonated beverages like Coke and Pepsi declined by more than 25 percent, while sales of bottled water increased by more than 50 percent. In 2016, sales of bottled water were greater than sales of carbonated beverages for the first time. This change resulted from a shift in consumer tastes as many people, particularly millennials, increased their demand for healthier beverages that don't contain sugar or artificial sweeteners.

In 1994, Pepsi responded to increased consumer demand for bottled water by introducing Aquafina water, and in 1999, Coke responded by introducing Dasani water. Neither company, though, had found selling bottled water to be as profitable as selling soda. As a result of decades of advertising, Coke and Pepsi are two of the most recognizable brand names in the world. The companies also have networks of bottling plants and commitments from supermarkets to provide them with extensive shelf space. Other companies have had trouble competing with Coke and Pepsi, which together account for nearly 75 percent of the market for carbonated beverages. The Aquafina and Dasani brands are not nearly as well known, however, so other companies have been better able to compete in the bottled water market, limiting Coke and Pepsi to less than 20 percent of that market.

By 2017, Coke and Pepsi were attempting to increase their profits in the bottled water market by introducing premium water or smart water brands. With regular bottled water, firms filter tap water or spring water to remove impurities. With premium water, like Pepsi's LIFEWTR and Coke's smartwater, firms also add ingredients, typically electrolytes. Although many nutritionists are skeptical that premium water is any better for you than regular bottled water, demand for premium bottled water has been increasing rapidly. Both Coke and Pepsi have been able to

charge higher prices for their premium water brands than they do for their carbonated beverages. But the firms were facing determined competition from Nestlé's Perrier brand and Danone's Evian brand, among many others.

Although premium water was a hot product in 2017, there are no guarantees in a market system. Will Coke and Pepsi and their competitors be able to continue charging higher prices for premium water than for regular bottled water, or will competition force down prices and make selling premium bottled water no more profitable than selling regular bottled water? Although competition is not always good news for firms trying to sell products, it is great news for consumers because it increases the choice of available products and lowers the prices consumers pay for those products.

**AN INSIDE LOOK** on page 98 discusses how McDonald's has responded to shifts in consumer demand by serving breakfast all day, allowing customers to order food online, and offering home delivery.

Chapter Outline & Learning Objectives

3.1

The Demand Side of the Market, page 74  
List and describe the variables that influence demand.

3.2

The Supply Side of the Market, page 82  
List and describe the variables that influence supply.

3.3

Market Equilibrium: Putting Demand and Supply Together, page 86  
Use a graph to illustrate market equilibrium.

3.4

The Effect of Demand and Supply Shifts on Equilibrium, page 90  
Use demand and supply graphs to predict changes in prices and quantities.

Economics in Your Life & Career

Can You Forecast the Future Demand for Premium Bottled Water?

Firms face many challenges in responding to changes in consumer demand. Firms selling premium bottled water need to forecast future demand in order to determine how much production capacity they will need. If you were a manager for Coca-Cola, PepsiCo, Nestlé, Bai, or another firm selling premium bottled water, what factors would you take into account in forecasting future demand? As you read this chapter, try to answer this question. You can check your answers against those we provide on page 97 at the end of this chapter.

72

73

An Inside Look is a two-page feature that shows students how to apply the concepts from the chapter to the analysis of a news article. The feature appears at the end of Chapters 1–4. An Inside Look presents an excerpt from an article, analysis of the article, a graph(s), and critical thinking questions. Additional articles that are continuously updated are located on MyLab Economics.

### AN INSIDE LOOK

## McDonald's Looks for New Ways to Attract Customers

CNBC.COM

**4 ways McDonald's is about to change**

McDonald's has one major goal for 2017: win back customers. The burger chain's multi-year turnaround effort, which found success with its All-Day Breakfast promotion, hasn't quite come to fruition... yet.

During its investor day in Chicago on Wednesday, the company's executives issued several big changes that the chain will be making to win back the more than 500 million visits it lost since 2012.

"To deliver sustained growth, we have to attract more customers, more often," CEO Steve Easterbrook said.

McDonald's focus will be on four pillars: menu innovation, store renovations, digital ordering and delivery.

"McDonald's appears to [have] found their focus on profitability through disciplined efforts to reduce costs and focus on the consumer experience including convenience in payment and delivery and value to drive more customer visits throughout the day," Darren Tristano, president of Technomic, told CNBC.

"For the world's largest restaurant company, this means playing catch up with younger consumer expectations while continuing to engage older generations of consumers that grew up with McDonald's," Tristano said.

"Clearing alternatives for customization, delivery, payment and ordering processes provides challenges but they are necessary to adapt to the evolving consumer foodservice experience."

**New Items on the Menu**

Expect to see McDonald's "step up" its menu innovation in the U.S., said Chris Kempczinski, McDonald's USA President.

The company recently launched three different sizes of its classic Big Mac, and will continue to add new items to its domestic stores, including a nationwide roll out of its "Signature Sandwiches"—customizable and more upscale burgers and chicken sandwiches—later this year.

**Renovated Restaurants**

Say goodbye to the white metal chairs and bold red and yellow colors. The chain's stores will also be getting an update.

McDonald's is committed to becoming a "modern and progressive burger company" and will be adding self-service ordering kiosks and table service to some of its stores. Employees will now spend more time in the front of the restaurant, delivering food directly to the tables and offering traditional dining hospitality.

McDonald's "experience of the future" is coming to about 600 restaurants this year, bringing the chain's number of these stores to nearly 2,500.

**Original Ordering**

The Golden Arches will continue to expand its mobile order and pay platform. While late to the game, the company is expected to launch the product in 20,000 restaurants by the end of 2017.

Easterbrook noted back in November that McDonald's is focused on how customers order, what they order, how they pay and how they want to be served. Customers can pay with cash, credit, debit, Apple pay and Android pay and will soon be able to order through the company's mobile service.

**Delivery**

Delivery is also an avenue that McDonald's is exploring. The company, which has a large delivery presence in Asia—which accounts for 10 percent of system sales in that market—is hoping to capitalize on the growing industry demand by offering delivery in America. It is currently testing out several models, both in-house and via third-party providers.

The company said 75 percent of the population in its top five markets—America, France, the U.K., Germany and Canada—are within three miles of a McDonald's and 85 percent are within five miles of a chain.

Source: Sarah Whitten, "4 ways McDonald's is about to change," CNBC.com, March 1, 2017.

**Key Points in the Article**

McDonald's is in the highly competitive fast-food market. The firm has seen a decline in sales for five straight years. Searching for additional ways to increase its sales, McDonald's plans to focus on customer experience. The company recently introduced an all-day breakfast promotion, and in March 2017 announced it will begin to focus on new menu items, restaurant renovations, digital ordering, and delivery. With these changes, McDonald's hopes to win back younger consumers who have come to expect these services while at the same time continuing to appeal to its long-time customers.

**Analyzing the News**

In the 5-year period beginning with 2012, customer trips to McDonald's fell by more than 500 million. Chief Executive Officer Steve Easterbrook stated that attracting more visits per customer is needed for the company to sustain growth. The company has chosen to focus on four elements to achieve this growth: menu innovation, store renovations, digital ordering, and delivery. Each of these ideas for growth is designed to help increase demand for McDonald's menu items by increasing its customer base and the frequency of customer visits to its restaurants.

McDonald's has recently added new items to its menu, including more customizable and upscale burger and sandwich options. Adding self-service ordering kiosks and table service to its restaurants will make it faster and easier for customers to place orders as well as providing them with a more comfortable, traditional restaurant-like setting while waiting for their orders. If successful, these changes will increase consumers' willingness to buy McDonald's menu items at every price, shifting the demand curve for them to the right.

As consumers have reduced their demand for hamburgers at lunch and dinner, McDonald's has had success offering breakfast items, such as its popular Egg McMuffin, throughout the day. Competing firms, such as Burger King and Wendy's, have followed this strategy as well. Suppose Figure 1 below illustrates the market for fast food breakfast sandwiches. The demand for breakfast sandwiches has increased, shifting the demand curve to the right from  $D_1$  to  $D_2$ , resulting in an increase in both the equilibrium price ( $P_1$  to  $P_2$ ) and equilibrium quantity ( $Q_1$  to  $Q_2$ ). Figure 2 illustrates the market for hamburgers. The decline in demand is shown by the demand curve shifting to the left from  $D_1$  to  $D_2$ , resulting in a decrease in both the equilibrium price ( $P_1$  to  $P_2$ ) and equilibrium quantity ( $Q_1$  to  $Q_2$ ). This result is a typical one when demand shifts between two goods that are substitutes.

McDonald's plans to continue the separation of its mobile order-and-pay system, with the intention of launching the service in 20,000 restaurants by the end of 2017. The company is also exploring delivery options for the U.S. market, a strategy that has been successful for McDonald's in Asia. Expanding its mobile order and pay system would appeal to the younger generation of tech-savvy consumers who like to order and pay for products via smartphone apps. A delivery option would appeal to a wide variety of consumers who either do not have time or do not want to take the time to go to a McDonald's location to buy food. Both of these options will likely increase demand for McDonald's menu items.

**Thinking Critically**

- Why is it particularly important for a firm like McDonald's to stay ahead of trends such as consumers' desire to eat breakfast food throughout the day or younger consumers wanting to order online?
- Suppose that McDonald's and its competitors successfully implemented self-service kiosks in their U.S. restaurants, and this investment in technology allows the firms to reduce the number of employees at each location. How would this change affect the market for breakfast sandwiches? Draw a demand and supply graph to illustrate this situation, and explain what happens to equilibrium price and equilibrium quantity.

Figure 1: An increase in demand for breakfast sandwiches shifts the demand curve to the right, increasing both equilibrium price and equilibrium quantity.

Figure 2: A decrease in the demand for hamburgers, a substitute good for breakfast sandwiches, shifts the demand curve to the left, decreasing both equilibrium price and equilibrium quantity.

## Solved Problems

Many students have great difficulty handling applied economics problems. We help students overcome this hurdle by including in each chapter two or three worked-out problems that analyze real-world economic issues they hear and read about in the news. Our goals are to keep students focused on the main ideas of each chapter and give them a model of how to solve an economic problem by breaking it down step by step. We tie additional exercises in the end-of-chapter *Problems and Applications* section to every *Solved Problem*. Additional *Solved Problems* appear in the *Instructor's Manuals*. In addition, the Test Banks include problems tied to the *Solved Problems* in the main book. Each of the 61 *Solved Problems* in the printed text is accompanied by a similar Interactive *Solved Problem* on MyLab Economics, so students can have more practice and build their problem-solving skills. These interactive tutorials help students learn to think like economists and apply basic problem-solving skills to homework, quizzes, and exams. Each *Solved Problem* on MyLab Economics and in the digital eText also includes at least one additional graded practice exercise for students.

94 CHAPTER 3 Where Prices Come From: The Interaction of Demand and Supply

### Solved Problem 3.4

#### Can We Predict Changes in the Price and Quantity of Organic Corn?

A news article discussed how U.S. consumers have been increasing their demand for organically grown corn and other produce, which is grown using only certain government-approved pesticides and fertilizers. At the same time, imports of corn and other varieties of organic produce from foreign countries have increased the available supply. Use demand and supply graphs to illustrate your answers to the following questions.

**Solving the Problem**

**Step 1: Review the chapter material.** This problem is about how shifts in demand and supply curves affect the equilibrium price, so you may want to review the section "The Effect of Shifts in Demand and Supply over Time," which begins on page 90.

**Step 2: Answer part (a) using demand and supply analysis.** The problem gives you the information that consumer tastes have changed, leading to an increase in the demand for organically grown corn. So, the demand curve has shifted to the right. The problem also gives you the information that imports of organically grown corn have increased. So, the supply curve has also shifted to the right. The following graph shows both of these shifts.

At Table 3.3 on page 92 summarizes, if the demand curve and the supply curve both shift to the right, the equilibrium quantity must increase. Therefore, we can answer part (a) by stating that we are certain that the equilibrium quantity of organically grown corn will increase.

**Step 3: Answer part (b) using demand and supply analysis.** The graph we drew in step 2 shows the equilibrium price of organically grown corn increasing. But given the information provided, the following graph would also be correct.

The Effect of Demand and Supply Shifts on Equilibrium 95

Unlike the graph in step 2, which shows the equilibrium price increasing, this graph shows the equilibrium price decreasing. The uncertainty about whether the equilibrium price will increase or decrease is consistent with what Table 3.3 indicates happens when the demand curve and the supply curve both shift to the right. Therefore, the answer to part (b) is that we cannot be certain whether the equilibrium price of organically grown corn will increase or decrease.

**Extra Credit:** During 2016, the equilibrium quantity of organically grown corn increased, while the equilibrium price decreased by 30 percent. We can conclude that both the increase in demand for organically grown corn and the increase in the supply contributed to the increase in consumption of organically grown corn. That the price of organically grown corn fell indicates that the increase in supply had a larger effect on equilibrium in the organically grown corn market than did the increase in demand.

Source: Sarah Rango, "Organic Food Sales Are Booming: Why Are Americans Crying Crying Food?" Wall Street Journal, February 21, 2017, and U.S. Department of Agriculture data.

**Your Turn:** For more practice, do related problems 4.7 and 4.8 on pages 104–105 at the end of this chapter.

**Shifts in a Curve versus Movements along a Curve**

When analyzing markets using demand and supply curves, remember that when a shift in a demand or supply curve causes a change in equilibrium price, the change in price does not cause a further shift in demand or supply. Suppose that an increase in supply causes the price of a good to fall, while everything else that affects the willingness of consumers to buy the good is constant. The result will be an increase in the quantity demanded but not an increase in demand. For demand to increase, the whole curve must shift. The point is the same for supply: If the price of the good falls but everything else that affects the willingness of sellers to supply the good is constant, the quantity supplied decreases, but the supply does not. For supply to decrease, the whole curve must shift.

Apply the Concept

Each chapter includes two to four *Apply the Concept* features that provide real-world reinforcement of key concepts and help students learn how to interpret what they read on the Web and in newspapers. Most of the 100 *Apply the Concept* features use relevant, stimulating, and provocative news stories focused on businesses and policy issues. One-third of them are new to this edition, and most others have been updated. Several discuss health care and trade, which have been at the forefront of recent policy discussions. Each *Apply the Concept* has at least one supporting end-of-chapter problem to allow students to test their understanding of the topic discussed. We prepared and filmed a two- or three-minute video to explain the key point of each *Apply the Concept*. These videos are located on MyLab Economics. We include related assessment with each video, so students can test their understanding. The goal of these videos is to summarize key content and bring the applications to life. In our experience, many students benefit from this type of online learning and assessment.

Apply the Concept

MyLab Economics Video

Forecasting the Demand for Premium Bottled Water

It's important for managers to forecast the demand for their products accurately because doing so helps them determine how much of a good to produce. Firms typically set manufacturing schedules at least a month ahead of time. Premium bottled water is a rapidly growing market, and firms need to carefully plan increases in productive capacity. Firms that fail to produce a large enough quantity to keep pace with increasing demand can lose out to competitors. But will the demand for premium bottled water continue to grow at such a rapid pace?

Richard Tedlow of the Harvard Business School has developed a theory of the "three phases of marketing" that can provide some insight into how the markets for many consumer products develop over time. The first phase often has a very large number of firms, each producing a relatively small volume of goods and charging high prices. This phase corresponds to the carbonated soft drink industry in the late nineteenth century, the automobile industry in the early twentieth century, and the personal computer industry in the late 1970s. In the second phase, the market consolidates, with one or a few brands attaining high market shares by selling a large number of units at lower prices. This phase corresponds to the soft drink industry during the middle of the twentieth century, the automobile industry during the 1920s, and the personal computer industry during the 1980s.

Managers at beverage firms will have to take into account a number of factors when estimating the future demand for premium bottled water. Factors that will tend to lead to higher demand for premium bottled water include the popularity of the product with millennials, the trend toward healthier eating habits that has led to declining consumption of carbonated beverages, the taxes on soda that cities have been imposing to both fight obesity and raise tax revenue, and the possibility of attracting consumers who now prefer energy drinks such as Red Bull and sports drinks such as Gatorade. But an obstacle to the rapid growth of demand for premium bottled water comes from doubts raised by some analysts about the benefits from the electrolytes and other ingredients it contains that are not in regular bottled water. If consumers come to believe that these ingredients serve no useful purpose, they may prefer to buy regular bottled water, which typically has a lower price.

As we saw in Chapter 1, economists can use formal models to forecast future values of economic variables. In this case, an economist forecasting the demand for premium bottled water would want to include the factors mentioned in the previous paragraphs as well as other data, including changes over time in demographics and projected income growth.

**Sources:** Jennifer Maloney, "PepsiCo Gives Its 'Premium' Water a Super Bowl Push," *Wall Street Journal*, January 24, 2017; Quentin Fottrell, "Bottled Water Overtakes Soda as America's No. 1 Drink—Why You Should Avoid Both," *marketwatch.com*, March 12, 2017; and Richard Tedlow, *New and Improved: The Story of Mass Marketing in America*, Cambridge, MA: Harvard Business School Press, 1996.

**Your Turn:** Test your understanding by doing related problem 1.17 on page 102 at the end of this chapter.

Sara Stathas/Alamy Stock Photo

How will changes in demographics, income, and tastes shape the market for premium bottled water?

## Don't Let This Happen to You

We know from many years of teaching which concepts students find most difficult. We include in each chapter a box feature called *Don't Let This Happen to You* that alerts students to the most common pitfalls in that chapter's material. We follow up with a related question in the end-of-chapter *Problems and Applications* section. The questions are also available on MyLab Economics, where students can receive instant feedback and tutorial help.

## Concept Checks

Each section of each learning objective concludes with a Concept Check on MyLab Economics that contains one or two multiple-choice, true/false, or fill-in questions. These checks act as “speed bumps” that encourage students to stop and check their understanding of fundamental terms and concepts before moving on to the next section. The goal of this digital resource is to help students assess their progress on a section-by-section basis so they can be better prepared for homework, quizzes, and exams.

## Graphs and Summary Tables

Graphs are an indispensable part of a principles of economics course but are a major stumbling block for many students. Every chapter except Chapter 1 includes end-of-chapter problems that require students to draw, read, and interpret graphs. Interactive graphing exercises appear on the book's supporting Web site. We use four devices to help students read and interpret graphs:

1. Detailed captions
2. Boxed notes
3. Color-coded curves
4. Summary tables with graphs (see pages 80, 85, and 828 for examples)

### Don't Let This Happen to You

**Remember:** A Change in a Good's Price Does Not Cause the Demand or Supply Curve to Shift

Suppose a student is asked to draw a demand and supply graph to illustrate how an increase in the price of oranges would affect the market for apples, with other variables being constant. He draws the graph on the left and explains it as follows: “Because apples and oranges are substitutes, an increase in the price of oranges will cause an initial shift to the right in the demand curve for apples, from  $D_1$  to  $D_3$ . However, because this initial shift in the demand curve for apples results in a higher price for apples,  $P_2$ , consumers will find apples less desirable, and the demand curve will shift to the left, from  $D_3$  to  $D_2$ , resulting in a final equilibrium price of  $P_3$ .” Do you agree or disagree with the student's analysis?

You should disagree. The student has correctly understood that an increase in the price of oranges will cause the demand curve for apples to shift to the right. But, the second demand curve shift the student describes, from  $D_3$  to

$D_2$ , will not take place. Changes in the price of a product do not result in shifts in the product's demand curve. Changes in the price of a product result only in movements along a demand curve.

The graph on the right shows the correct analysis. The increase in the price of oranges causes the demand curve for apples to increase from  $D_1$  to  $D_2$ . At the original price,  $P_1$ , the increase in demand initially results in a shortage of apples equal to  $Q_3 - Q_1$ . But, as we have seen, a shortage causes the price to increase until the shortage is eliminated. In this case, the price will rise to  $P_2$ , where both the quantity demanded and the quantity supplied are equal to  $Q_2$ . Notice that the increase in price causes a decrease in the quantity demanded, from  $Q_3$  to  $Q_2$ , but does not cause a decrease in demand.

**MyLab Economics Study Plan**

**Your Turn:** Test your understanding by doing related problems 4.13 and 4.14 on page 106 at the end of this chapter.

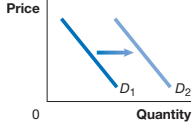

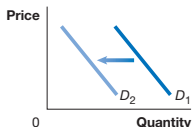

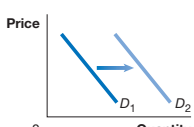

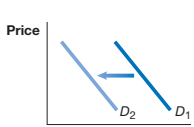

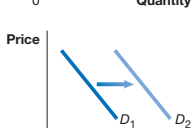

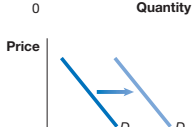

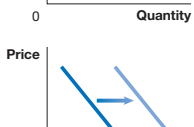

**MyLab Economics Animation**

Figure 3.3

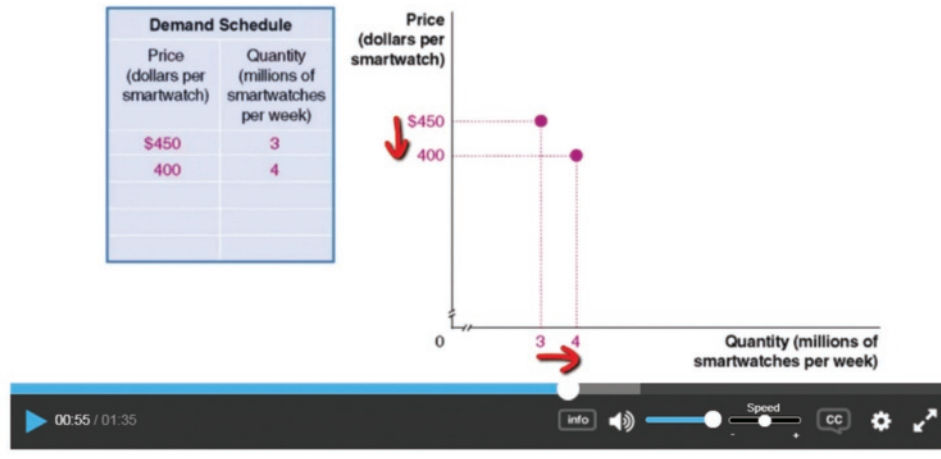

### A Change in Demand versus a Change in Quantity Demanded

If the price of premium bottled water falls from \$2.50 to \$2.00, the result will be a movement along the demand curve from point A to point B—an increase in quantity demanded from 3 million bottles to 4 million. If consumers' incomes increase, or if another factor changes that makes consumers want more of the product at every price, the demand curve will shift to the right—an increase in demand. In this case, the increase in demand from  $D_1$  to  $D_2$  causes the quantity of premium bottled water demanded at a price of \$2.50 to increase from 3 million bottles at point A to 5 million at point C.

Table 3.1			
Variables That Shift Market Demand Curves			
An increase in ...	shifts the demand curve ...	because ...	
income (and the good is normal)		consumers spend more of their higher incomes on the good.	
income (and the good is inferior)		consumers spend less of their higher incomes on the good.	
the price of a substitute good		consumers buy less of the substitute good and more of this good.	
the price of a complementary good		consumers buy less of the complementary good and less of this good.	
taste for the good		consumers are willing to buy a larger quantity of the good at every price.	
population		additional consumers result in a greater quantity demanded at every price.	
the expected price of the good in the future		consumers buy more of the good today to avoid the higher price in the future.	

Each of the 272 numbered figures in the text has a supporting animated version on MyLab Economics. The goal of this digital resource is to help students understand shifts in curves, movements along curves, and changes in equilibrium values. Having an animated version of a graph helps students who have difficulty interpreting the static version in the printed text. We include graded practice exercises with the animations. In our experience, many students benefit from this type of online learning.

Figure Animation 3.1 A Demand Schedule and Demand Curve

Approximately 35 graphs are continuously updated online with the latest available data from FRED (Federal Reserve Economic Data), which is a comprehensive, up-to-date data set maintained by the Federal Reserve Bank of St. Louis. Students can display a pop-up graph that shows new data. The goal of this digital feature is to help students understand how to work with data and understand how including new data affects graphs.

### Review Questions and Problems and Applications—Grouped by Learning Objective to Improve Assessment

We group the main end-of-chapter material—*Summary*, *Review Questions*, and *Problems and Applications*—under learning objectives. The goals of this organization are to make it easier for instructors to assign problems based on learning objectives, both in the book and on MyLab Economics, and to help students efficiently review material that they find difficult. If students have difficulty with a particular learning objective, an instructor can easily identify which end-of-chapter questions and problems support that objective and assign them as homework or discuss them in class. Every exercise in a chapter's *Problems and Applications* section is available on MyLab Economics. Using MyLab Economics, students can complete these and many other exercises online, get tutorial help, and receive instant feedback and assistance on exercises they answer incorrectly. Also, student learning will be enhanced by having the summary material and problems grouped together by learning objective, which allows them to focus on the parts of the chapter they find most challenging. Each major section of the chapter, paired with a learning objective, has at least two review questions and three problems.

As in the previous editions, we include one or more end-of-chapter problems that test students' understanding of the content presented in the *Solved Problem*, *Apply the Concept*, and *Don't Let This Happen to You* special features in the chapter. Instructors can cover a feature in class and assign the corresponding problem(s) for homework. The Test Bank Files also include test questions that pertain to these special features.

Real-Time Data Exercises

We end select chapters with at least two *Real-Time Data Exercises* that help students become familiar with a key data source, learn how to locate data, and develop skills in interpreting data. *Real-Time Data Analysis (RTDA) Exercises*, marked with , allow students and instructors to use the very latest data from FRED, the Federal Reserve Bank of St. Louis.

Developing Career Skills

Learning key economic terms, concepts, and models are all important. For a course to be successful, students need to develop the skills and confidence to apply what they’ve learned outside the classroom. Chapter 1, “Economics: Foundations and Models,” now includes a new section that describes economics as a career and the key skills students of any major can gain from studying economics. As described earlier, features such as chapter-opening business cases, *Apply the Concepts*, *Solved Problems*, and end-of-chapter problems provide a real-world context for learning that exposes students to economics as applied in a variety of large and small businesses, government agencies, and nonprofit organizations. *Critical Thinking Exercises*, a new end-of-chapter category in this edition, help build student skills to analyze and interpret information and apply reasoning and logic to new or unfamiliar ideas and situations.

Economics in Your Life & Career

After the chapter-opening real-world business case, we have a feature titled *Economics in Your Life & Career* that adds a personal dimension to the chapter opener by asking students to consider how economics affects their lives and careers. The feature piques the interest of students and emphasizes the connection between the material they are learning and their personal and career decisions

Economics in Your Life & Career

Can You Forecast the Future Demand for Premium Bottled Water?

Firms face many challenges in responding to changes in consumer demand. Firms selling premium bottled water need to forecast future demand in order to determine how much production capacity they will need. If you were a manager for Coca-Cola, PepsiCo, Nestlé, Bai, or another firm selling premium bottled water, what factors would you take into account in forecasting future demand? As you read this chapter, try to answer this question. You can check your answers against those we provide on **page 97** at the end of this chapter.

At the end of the chapter, we use the chapter concepts to answer the questions asked at the beginning of the chapter.

Economics in Your Life & Career

Can You Forecast the Future Demand for Premium Bottled Water?

At the beginning of this chapter, we asked what variables you would take into account in forecasting future demand if you were a manager for a firm selling premium bottled water. In Section 3.1, we discussed the factors that affect the demand for a product and provided a list of the most important variables. In the *Apply the Concept* on page 81, we discussed how economists often use formal models to forecast future demand for a product.

In forecasting demand for premium bottled water, you should take into account factors such as changing demographics, as millennials become a larger fraction of prime-age consumers, and the likelihood that the demand for competing goods, such as carbonated sodas, will decline as consumers turn toward buying healthier products and as more cities impose soda taxes. You may also need to consider whether increased advertising of premium bottled water by large firms such as Coca-Cola and PepsiCo will raise consumer awareness of the product and increase demand for the premium bottled water being sold by other firms as well.

The factors discussed in this chapter provide you with the basic information needed to forecast demand for premium bottled water, although arriving at numerical forecasts requires using statistical analysis that you can learn in more advanced courses.

# Instructor Teaching Resources

The authors and Pearson Education have worked together to integrate the text, print, and media resources to make teaching and learning easier.

Supplements Available to Instructors for Download at <a href="http://www.pearsonhighered.com">www.pearsonhighered.com</a>	Features of the Supplement
<b>Instructor's Manuals</b> Authored by Edward Scahill of the University of Scranton	<ul style="list-style-type: none"><li>• Chapter-by-chapter summaries organized by learning objectives</li><li>• Extended examples and class exercises</li><li>• Teaching outlines incorporating key terms and definitions, teaching tips, topics for class discussion</li><li>• New <i>Solved Problems</i></li><li>• New <i>Apply the Concept</i> features</li><li>• Solutions to all review questions, problems, and real-time data exercises in the book</li></ul>
<b>Two Test Banks for <i>Microeconomics</i> and for <i>Macroeconomics</i></b> Authored by Randy Methenitis of Richland College	<ul style="list-style-type: none"><li>• Each volume includes 4,000 multiple-choice, true/false, short-answer, and graphing questions.</li><li>• Test questions are annotated with the following categories: <b>Difficulty</b>—1 for straight recall; 2 for some analysis; and 3 for complex analysis <b>Type</b>—multiple-choice, true/false, short-answer, essay <b>Topic</b>—the term or concept the question supports <b>Learning outcome</b> <b>Page number</b> in the main book <b>Special feature</b> in the main book <b>The Association to Advance Collegiate Schools of Business (AACSB) Guidelines</b> (see description on the next page)</li></ul>
<b>Computerized TestGen</b>	<ul style="list-style-type: none"><li>• Allows instructors to customize, save, and generate classroom tests.</li><li>• Instructors can edit, add, or delete questions from the Test Banks; analyze test results; and organize a database of tests and student results.</li><li>• Many options are available for organizing and displaying tests, along with search and sort features.</li><li>• The software and the Test Banks can be downloaded from <a href="http://www.pearsonhighered.com">www.pearsonhighered.com</a>.</li></ul>
<b>Three Sets of PowerPoint Lecture Presentations</b> Authored by Paul Holmes of Ashland University	<ul style="list-style-type: none"><li>• A comprehensive set of PowerPoint slides can be used by instructors for class presentations or by students for lecture preview or review. These slides include all the graphs, tables, and equations in the textbook. Two versions are available—step-by-step mode, in which you can build graphs as you would on a blackboard, and automated mode, in which you use a single click per slide.</li><li>• A comprehensive set of PowerPoint slides have Classroom Response Systems (CRS) questions built in so that instructors can incorporate CRS “clickers” into their classroom lectures.</li><li>• Student versions of the PowerPoint slides are available as .pdf files. This version allows students to print the slides and bring them to class for note taking.</li></ul>

## What Is the AACSB?

The Association to Advance Collegiate Schools of Business (AACSB) is a not-for-profit corporation of educational institutions, corporations, and other organizations devoted to the promotion and improvement of higher education in business administration and accounting. A collegiate institution offering degrees in business administration or accounting may volunteer for AACSB accreditation review. The AACSB expects a curriculum to include learning experiences in the following categories of Assurance of Learning Standards: Written and Oral Communication; Ethical Understanding and Reasoning; Analytical Thinking; Information Technology; Interpersonal Relations and Teamwork, Diverse and Multicultural Work; Reflective Thinking; and Application of Knowledge. Test Bank questions that test skills relevant to these standards are tagged with the appropriate standard. For example, a question testing the moral questions associated with externalities would receive the Ethical Understanding and Reasoning tag.

## Acknowledgements

The guidance and recommendations of the following instructors helped us develop the revision plans for the seventh edition and the supplements package. While we could not incorporate every suggestion from every consultant board member, reviewer, or accuracy checker, we do thank each and every one of you and acknowledge that your feedback was indispensable in developing this text. We greatly appreciate your assistance in making this the best text it could be; you have helped a whole new generation of students learn about the exciting world of economics.

### Accuracy Review Board

Our accuracy checkers did a particularly painstaking and thorough job of helping us proof the graphs, equations, and features of the text and supplements. We are grateful for their time and commitment:

Fatma Abdel-Raouf, Goldey-Beacom College  
 Gbenga Ajilore, The University of Toledo  
 Harry Ellis, University of North Texas  
 Robert Gillette, University of Kentucky  
 Anthony Gyapong, Pennsylvania State University—  
 Abington  
 Randy Methenitis, Richland College  
 Brian Rosario, University of California—Davis  
 Edward Scahill, University of Scranton

### Reviewers

The guidance and thoughtful recommendations of many instructors helped us develop and implement a revision plan that improved the book's content, enhanced the figures, and strengthened the assessment features. We extend special thanks to Edward Scahill of the University of Scranton for helping us revise the chapter openers and the solutions to the end-of-chapter questions and problems, to Randy Methenitis of Richland College for helping us revise the *An Inside Look* feature in Chapters 1–4, and to Fernando Quijano for creating all

the figures in the book and supplements. We are grateful for the comments and many helpful suggestions received from the following reviewers:

Mark Abajian, University of San Diego

## Previous Edition Class Testers, Accuracy Reviewers, and Consultants

The guidance and recommendations of the following instructors helped us shape the previous editions.

### Class Testers

We are grateful to both the instructors who class-tested manuscript of the first edition and their students for providing useful

recommendations on how to make chapters more interesting, relevant, and accurate:

Charles A. Bennett, Gannon University  
 Anne E. Bresnock, University of California, Los Angeles,  
 and California State Polytechnic University–Pomona  
 Linda Childs-Leatherbury, Lincoln University, Pennsylvania  
 John Eastwood, Northern Arizona University  
 David Eaton, Murray State University  
 Paul Elgatian, St. Ambrose University  
 Patricia A. Freeman, Jackson State University  
 Robert Godby, University of Wyoming  
 Frank Gunter, Lehigh University  
 Ahmed Ispahani, University of La Verne  
 Brendan Kennelly, Lehigh University and National  
 University of Ireland–Galway  
 Ernest Massie, Franklin University  
 Carol McDonough, University of Massachusetts–Lowell  
 Shah Mehrabi, Montgomery College  
 Sharon Ryan, University of Missouri–Columbia  
 Bruce G. Webb, Gordon College  
 Madelyn Young, Converse College  
 Susan Zumas, Lehigh University

## Accuracy Review Boards

We are grateful to the following accuracy checkers of the previous editions for their hard work on the book and supplements:

Fatma Abdel-Raouf, Goldey-Beacom College

 Nancy Jianakoplos, Colorado State University  
 Jay Kaplan, University of Colorado–Boulder  
 William G. Mertens, University of Colorado–Boulder  
 Rachael Small, University of Colorado–Boulder  
 Stephen Weiler, Colorado State University

## CONNECTICUT

Christopher P. Ball, Quinnipiac University  
 Mark Gius, Quinnipiac University  
 Mark Jablonowski, University of Hartford  
 Donn M. Johnson, Quinnipiac University  
 Robert Martel, University of Connecticut  
 Charles Meyrick, Housatonic Community College  
 Judith Mills, Southern Connecticut State University  
 Matthew Rafferty, Quinnipiac University  
 Christian Zimmermann, University of Connecticut

## DELAWARE

Fatma Abdel-Raouf, Goldey-Beacom College  
 Ali Ataiifar, Delaware County Community College  
 Andrew T. Hill, University of Delaware

## FLORIDA

Frank Albritton, Seminole State College  
 Herman Baine, Broward Community College  
 Robert L. Beekman, University of Tampa  
 William Browning, Florida Gulf Coast University  
 Eric P. Chiang, Florida Atlantic University  
 Martine Duchatelet, Barry University  
 Hadley Hartman, Santa Fe Community College  
 Richard Hawkins, University of West Florida  
 Brad Kamp, University of South Florida  
 Brian Kench, University of Tampa  
 Carrie B. Kerekes, Florida Gulf Coast University  
 Thomas McCaleb, Florida State University  
 Barbara A. Moore, University of Central Florida  
 Augustine Nelson, University of Miami  
 Jamie Ortiz, Florida Atlantic University  
 Deborah Paige, Santa Fe Community College  
 Robert Pennington, University of Central Florida

Bob Potter, University of Central Florida  
 Jerry Schwartz, Broward Community College–North  
 William Stronge, Florida Atlantic University  
 Nora Underwood, University of Central Florida  
 Zhiguang Wang, Florida International University  
 Joan Wiggenghorn, Barry University

## GEORGIA

Greg Brock, Georgia Southern University  
 Donna Fisher, Georgia Southern University  
 Shelby Frost, Georgia State University  
 John King, Georgia Southern University  
 Constantin Ogloblin, Georgia Southern University  
 Dr. Greg Okoro, Georgia Perimeter College–Clarkston  
 Michael Reksulak, Georgia Southern University  
 Bill Yang, Georgia Southern University

## IDAHO

Cynthia Hill, Idaho State University  
 Don Holley, Boise State University  
 Tesa Stegner, Idaho State University

## ILLINOIS

Teshome Abebe, Eastern Illinois University  
 Ali Akarca, University of Illinois–Chicago  
 Zsolt Becsi, Southern Illinois University–Carbondale  
 James Bruehler, Eastern Illinois University  
 Louis Cain, Loyola University and Northwestern University  
 Rosa Lea Danielson, College of DuPage  
 Kevin Dunagan, Oakton Community College  
 Scott Gilbert, Southern Illinois University  
 Rajeev K. Goel, Illinois State University  
 David Gordon, Illinois Valley Community College  
 Alan Grant, Eastern Illinois University  
 Rik Hafer, Southern Illinois University–Edwardsville  
 Alice Melkumian, Western Illinois University  
 Christopher Mushrush, Illinois State University  
 Jeff Reynolds, Northern Illinois University  
 Helen Roberts, University of Illinois–Chicago  
 Thomas R. Sadler, Western Illinois University  
 Eric Schulz, Northwestern University  
 Dennis Shannon, Southwestern Illinois College  
 Charles Sicotte, Rock Valley Community College  
 Neil T. Skaggs, Illinois State University  
 Kevin Sylwester, Southern Illinois University–  
 Carbondale  
 Wendine Thompson-Dawson, Monmouth College  
 Tara Westerhold, Western Illinois University  
 Mark Witte, Northwestern University  
 Laurie Wolff, Southern Illinois University–Carbondale  
 Paula Worthington, Northwestern University

## INDIANA

Kelly Blanchard, Purdue University  
 Cecil Bohanon, Ball State University  
 Kirk Doran, University of Notre Dame  
 Eva Dziadula, University of Notre Dame  
 Mary Flannery, University of Notre Dame

Thomas Gresik, University of Notre Dame  
 Robert B. Harris, Indiana University–Purdue University  
 Indianapolis  
 Fred Herschede, Indiana University–South Bend  
 Tom Lehman, Indiana Wesleyan University  
 Abraham Mathew, Indiana University–Purdue University  
 Indianapolis  
 John Pomery, Purdue University  
 Curtis Price, University of Southern Indiana  
 Rob Rude, Ivy Tech Community College  
 James K. Self, Indiana University–Bloomington  
 Esther-Mirjam Sent, University of Notre Dame  
 Virginia Shingleton, Valparaiso University  
 Martin C. Spechler, Indiana University–Purdue University  
 Indianapolis  
 Arun K. Srinivasan, Indiana University–Southeast  
 Campus  
 Geetha Suresh, Purdue University

## IOWA

Terry Alexander, Iowa State University  
 Paul Elgatian, St. Ambrose University  
 Jennifer Fuhrman, University of Iowa  
 Ken McCormick, University of Northern Iowa  
 Andy Schuchart, Iowa Central Community College  
 John Solow, University of Iowa  
 Jonathan Warner, Dordt College

## KANSAS

Guatam Bhattacharya, University of Kansas  
 Amanda Freeman, Kansas State University  
 Dipak Ghosh, Emporia State University  
 Alan Grant, Baker University  
 Wayne Oberle, St. Ambrose University  
 Jodi Messer Pelkowski, Wichita State University  
 Martin Perline, Wichita State University  
 Joel Potter, Kansas State University  
 Joshua Rosenbloom, University of Kansas  
 Shane Sanders, Kansas State University  
 Dosse Toulaboe, Fort Hays State University  
 Bhavneet Walia, Kansas State University

## KENTUCKY

Tom Cate, Northern Kentucky University  
 Nan-Ting Chou, University of Louisville  
 David Eaton, Murray State University  
 Ann Eike, University of Kentucky  
 Robert Gillette, University of Kentucky  
 Barry Haworth, University of Louisville  
 Gail Hoyt, University of Kentucky  
 Donna Ingram, Eastern Kentucky University  
 Waithaka Iraki, Kentucky State University  
 Hak Youn Kim, Western Kentucky University  
 Martin Milkman, Murray State University  
 Jenny Minier, University of Kentucky  
 David Shideler, Murray State University  
 John Vahaly, University of Louisville

## LOUISIANA

Lara Gardner, Southeastern Louisiana University  
 Jay Johnson, Southeastern Louisiana University  
 Faik Koray, Louisiana State University  
 Paul Nelson, University of Louisiana–Monroe  
 Sung Chul No, Southern University and A&M College  
 Tammy Parker, University of Louisiana–Monroe  
 Wesley A. Payne, Delgado Community College  
 Nancy Rumore, University of Louisiana at Lafayette

## MARYLAND

Carey Borkoski, Anne Arundel Community College  
 Kathleen A. Carroll, University of Maryland–Baltimore  
 County  
 Jill Caviglia-Harris, Salisbury University  
 Dustin Chambers, Salisbury University  
 Karl Einolf, Mount Saint Mary's University  
 Marsha Goldfarb, University of Maryland–Baltimore City  
 Bruce Madariaga, Montgomery College  
 Shah Mehrabi, Montgomery College  
 Gretchen Mester, Anne Arundel Community College  
 David Mitch, University of Maryland–Baltimore County  
 John Neri, University of Maryland  
 Henry Terrell, University of Maryland

## MASSACHUSETTS

William L. Casey, Jr., Babson College  
 Arthur Schiller Casimir, Western New England College  
 Michael Enz, Western New England College  
 Can Erbil, Brandeis University  
 Lou Foglia, Suffolk University  
 Gerald Friedman, University of Massachusetts  
 Todd Idson, Boston University  
 Aaron Jackson, Bentley College  
 Russell A. Janis, University of Massachusetts–Amherst  
 Anthony Laramie, Merrimack College  
 Carol McDonough, University of Massachusetts–Lowell  
 William O'Brien, Worcester State College  
 Ahmad Saranjam, Bridgewater State College  
 Howard Shore, Bentley College  
 Janet Thomas, Bentley College  
 John Tommasi, University of Massachusetts–Lowell  
 Gregory H. Wassall, Northeastern University  
 Bruce G. Webb, Gordon College  
 Gilbert Wolpe, Newbury College  
 Jay Zagorsky, Boston University

## MICHIGAN

Eric Beckman, Delta College  
 Jared Boyd, Henry Ford Community College  
 Victor Claar, Hope College  
 Dr. Sonia Dalmia, Grand Valley State University  
 Daniel Giedeman, Grand Valley State University  
 Allen C. Goodman, Wayne State University  
 Steven Hayworth, Eastern Michigan University  
 Gregg Heidebrink, Washtenaw Community College  
 Carol Hogan, University of Michigan–Dearborn

Marek Kolar, Delta College  
 Susan J. Linz, Michigan State University  
 James Luke, Lansing Community College  
 Ilir Miteza, University of Michigan–Dearborn  
 John Nader, Grand Valley State University  
 Norman P. Obst, Michigan State University  
 Laudo M. Ogura, Grand Valley State University  
 Robert J. Rossana, Wayne State University  
 Michael J. Ryan, Western Michigan University  
 Charles A. Stull, Kalamazoo College  
 Michael J. Twomey, University of Michigan–Dearborn  
 Mark Wheeler, Western Michigan University  
 Wendy Wysocki, Monroe County Community College

## MINNESOTA

Mary Edwards, Saint Cloud State University  
 Phillip J. Grossman, Saint Cloud State University  
 Monica Hartman, University of St. Thomas  
 Matthew Hyle, Winona State University  
 David J. O'Hara, Metropolitan State University–  
 Minneapolis  
 Kwang Woo (Ken) Park, Minnesota State University–  
 Mankato  
 Artatrana Ratha, Saint Cloud State University  
 Ken Rebeck, Saint Cloud State University  
 Katherine Schmeiser, University of Minnesota

## MISSISSIPPI

Becky Campbell, Mississippi State University  
 Randall Campbell, Mississippi State University  
 Patricia A. Freeman, Jackson State University  
 Arlena Sullivan, Jones County Junior College

## MISSOURI

Chris Azevedo, University of Central Missouri  
 Ariel Belasen, Saint Louis University  
 Catherine Chambers, University of Central Missouri  
 Paul Chambers, University of Central Missouri  
 Kermit Clay, Ozarks Technical Community College  
 Ben Collier, Northwest Missouri State University  
 John R. Crooker, University of Central Missouri  
 Jo Durr, Southwest Missouri State University  
 Julie H. Gallaway, Southwest Missouri State University  
 Terrel Gallaway, Southwest Missouri State University  
 Mark Karscig, Central Missouri State University  
 Nicholas D. Peppes, Saint Louis Community College–  
 Forest Park  
 Steven T. Petty, College of the Ozarks  
 Sharon Ryan, University of Missouri–Columbia  
 Ben Young, University of Missouri–Kansas City

## MONTANA

Agnieszka Bielinska-Kwapisz, Montana State University–  
 Bozeman  
 Jeff Bookwalter, University of Montana–Missoula

## NEBRASKA

John Dogbey, University of Nebraska–Omaha  
 Ward Hooker, Central Community College

Allan Jenkins, University of Nebraska–Kearney  
 James Knudsen, Creighton University  
 Craig MacPhee, University of Nebraska–Lincoln  
 Kim Sosin, University of Nebraska–Omaha  
 Mark E. Wohar, University of Nebraska–Omaha

## NEVADA

Michael H. Lampert, Truckee Meadows Community College  
 Bernard Malamud, University of Nevada–Las Vegas  
 Sheri Perez, College of Southern Nevada  
 Bill Robinson, University of Nevada–Las Vegas

## NEW HAMPSHIRE

Evelyn Gick, Dartmouth College  
 Neil Niman, University of New Hampshire

## NEW JERSEY

Len Anyanwu, Union County College  
 Maharuk Bhiladwalla, Rutgers University–New Brunswick  
 Giuliana Campanelli-Andreopoulos, William Paterson University  
 Gary Gigliotti, Rutgers University–New Brunswick  
 John Graham, Rutgers University–Newark  
 Berch Haroian, William Paterson University  
 Paul Harris, Camden County College  
 Jeff Rubin, Rutgers University  
 Henry Ryder, Gloucester County College  
 Laura Storino, Rowan University  
 Donna Thompson, Brookdale Community College

## NEW MEXICO

Donald Coes, University of New Mexico  
 Kate Krause, University of New Mexico  
 Curt Shepherd, University of New Mexico

## NEW YORK

Seemi Ahmad, Dutchess Community College  
 Chris Annala, State University of New York–Geneseo  
 Erol Balkan, Hamilton College  
 John Bockino, Suffolk County Community College–Ammerman  
 Charles Callahan III, State University of New York–Brockport  
 Michael Carew, Baruch College  
 Sean Corcoran, New York University  
 Ranjit S. Dighe, City University of New York–Bronx Community College  
 Debra Dwyer, Stony Brook University  
 Glenn Gerstner, Saint John's University–Queens  
 Susan Glanz, Saint John's University–Queens  
 Wayne A. Grove, LeMoyne College  
 Nancy Howe, Hudson Valley Community College  
 Christopher Inya, Monroe Community College  
 Ghassan Karam, Pace University  
 Clifford Kern, State University of New York–Binghamton  
 Mary Lesser, Iona College  
 Anna Musatti, Columbia University

Theodore Muzio, St. John's University, New York  
 Emre Ozsoz, Fashion Institute of Technology  
 Howard Ross, Baruch College  
 Ed Steinberg, New York University  
 Leonie Stone, State University of New York–Geneseo  
 Ganti Subrahmanyam, University of Buffalo  
 Jogindar S. Uppal, State University of New York–Albany  
 Susan Wolcott, Binghamton University

## NORTH CAROLINA

Rita Balaban, University of North Carolina  
 Otilia Boldea, North Carolina State University  
 Robert Burrus, University of North Carolina–Wilmington  
 Lee A. Craig, North Carolina State University  
 Alexander Deshkovski, North Carolina Central University  
 Kathleen Dorsainvil, Winston–Salem State University  
 Lydia Gan, School of Business, University of North Carolina–Pembroke  
 Michael Goode, Central Piedmont Community College  
 Salih Hakeem, North Carolina Central University  
 Melissa Hendrickson, North Carolina State University  
 Haiyong Liu, East Carolina University  
 Kosmas Marinakis, North Carolina State University  
 Todd McFall, Wake Forest University  
 Shahriar Mostashari, Campbell University  
 Jonathan Phillips, North Carolina State University  
 Bobby Puryear, North Carolina State University  
 Jeff Sarbaum, University of North Carolina–Greensboro  
 Peter Schuhmann, University of North Carolina–Wilmington  
 Robert Shoffner, Central Piedmont Community College  
 Catherine Skura, Sandhills Community College  
 Carol Stivender, University of North Carolina–Charlotte  
 Vera Tabakova, East Carolina University  
 Eric Taylor, Central Piedmont Community College  
 Julianne Treme, University of North Carolina–Wilmington  
 Hui-Kuan Tseng, University of North Carolina at Charlotte  
 Robert Whaples, Wake Forest University  
 John Whitehead, Appalachian State University  
 Gary W. Zinn, East Carolina University  
 Rick Zuber, University of North Carolina at Charlotte

## OHIO

Olugbenga Ajilore, The University of Toledo  
 Benjamin Blair, Columbus State University  
 John P. Blair, Wright State University  
 Bolong Cao, Ohio University–Athens  
 Kyongwook Choi, Ohio University  
 James D'Angelo, University of Cincinnati  
 Darlene DeVera, Miami University  
 Rudy Fichtenbaum, Wright State University  
 Tim Fuerst, Bowling Green University  
 Harley Gill, Ohio State University  
 Leroy Gill, Ohio State University  
 Steven Heubeck, Ohio State University  
 Daniel Horton, Cleveland State University

Michael Jones, University of Cincinnati  
 Kristen Keith, University of Toledo  
 Janice Kinghorn, Miami University  
 Jean Kujawa, Lourdes College  
 Ernest Massie, Franklin University  
 Ida A. Mirzaie, Ohio State University  
 Jay Mutter, University of Akron  
 Mike Nelson, University of Akron  
 Nicholas Noble, Miami University  
 Dennis C. O'Neill, University of Cincinnati  
 Joseph Palardy, Youngstown State University  
 Charles Reichheld, Cuyahoga Community College  
 Teresa Riley, Youngstown State University  
 Rochelle Ruffer, Youngstown State University  
 Kate Sheppard, University of Akron  
 Richard Stratton, University of Akron  
 Albert Sumell, Youngstown State University  
 Steve Szeghi, Wilmington College  
 Melissa Thomasson, Miami University  
 Yaqin Wang, Youngstown State University  
 Bert Wheeler, Cedarville University  
 Kathryn Wilson, Kent State University  
 Sourushe Zandvakili, University of Cincinnati

#### OKLAHOMA

David Hudgins, University of Oklahoma  
 Bill McLean, Oklahoma State University  
 Denny Myers, Oklahoma City Community College  
 Ed Price, Oklahoma State University  
 Abdulhamid Sukar, Cameron University  
 Zhen Zhu, University of Central Oklahoma

#### OREGON

Bill Burrows, Lane Community College  
 Tom Carroll, Central Oregon Community College  
 Tim Duy, University of Oregon  
 Alan S. Fudge, Linn-Benton Community College  
 B. Starr McMullen, Oregon State University  
 Ted Scheinman, Mount Hood Community College  
 Larry Singell, University of Oregon  
 Ayca Tekin-Koru, Oregon State University

#### PENNSYLVANIA

Bradley Andrew, Juniata College  
 Mohammad Bajwa, Northampton Community College  
 Gustavo Barboza, Mercyhurst College  
 Charles A. Bennett, Gannon University  
 Cynthia Benzing, West Chester University  
 Howard Bodenhorn, Lafayette College  
 Milica Bookman, St. Joseph's University  
 Robert Brooker, Gannon University

Richard Agesa, Marshall University  
Robin S. McCutcheon, Marshall University College of  
Business

WISCONSIN

Peng Huang, Ripon College  
Marina Karabelas, Milwaukee Area Technical College  
Elizabeth Sawyer Kelly, University of Wisconsin–  
Madison  
Pascal Ngoboka, University of Wisconsin–River Falls  
Kevin Quinn, St. Norbert College  
John R. Stoll, University of Wisconsin–Green Bay

WYOMING

Robert Godby, University of Wyoming

DISTRICT OF COLUMBIA

Leon Battista, American Enterprise Institute

Robert Berman, American University  
Michael Bradley, George Washington University  
Colleen M. Callahan, American University  
Eliane P. Catilina, Graduate School USA  
Robert Feinberg, American University  
Walter Park, American University  
Ralph Sonenshine, American University

INTERNATIONAL

Minh Quang Dao, Carleton University–Ottawa, Canada

## A Word of Thanks

---

Once again, we benefited greatly from the dedication and professionalism of the Pearson Economics team. Portfolio Manager David Alexander's energy and support were indispensable. David helped mold the presentation and provided words of encouragement whenever our energy flagged. Content Editor Lena Buonanno worked tirelessly to ensure that this text was as good as it could be and to coordinate the many moving parts involved in a project of this magnitude. This new edition posed particular challenges, and we remain astonished at the amount of time, energy, and unfailing good humor she brings to this project. As we worked on the first edition, former Director of Key Markets David Theisen provided invaluable insight into how best to structure a principles text. His advice helped shape nearly every chapter. We extend our thanks to Tricia Murphy, our Product Marketing Manager, and Carlie Marvel, our Field Marketer, for their energy and creativity in presenting our book and digital products to both professors and students.

Christine Donovan managed the entire production process and the extensive supplement package that accompanies the book. Editorial Assistant Nicole Nedwidek assisted the team in completing several tasks, including review surveys and summaries, to help produce both the book and media resources.

We received excellent research assistance on previous editions from Dante DeAntonio, Ed Timmons, Matthew Saboe, David Van Der Goes, and Jason Hockenberry. We thank Elena Zeller, Jennifer Brailsford, Ellen Vandevort Wolf, Emily Webster, Mollie Sweet, Jayme Wagner, and Rebecca Barney for their careful proofreading of first- and second-round page proofs. Over all editions of our books, we received helpful feedback and recommendations from Lehigh University faculty colleagues Frank R. Gunter, Thomas J. Hyclak, and Robert J. Thornton.

As instructors, we recognize how important it is for students to view graphs that are clear and accessible. We are fortunate to have Fernando Quijano render all the figures in our books and also our supplements. Market feedback on the figures continues to be positive. We extend our thanks to Fernando not only for collaborating with us and creating the best figures possible but also for his patience with our demanding schedule.

This seventh edition has several media components, which required skilled and patient creators and developers. We extend special thanks to Andy Taylor of Hodja Media for preparing the video clips and to Paul Graf of the University of Indiana–Bloomington for preparing the graph animations. These videos and animations are an important part of our revision.

A good part of the burden of an undertaking on this scale is borne by our families. We appreciate the patience, support, and encouragement of our wives and children.
