• **Dynamic Study Modules** help students study chapter topics and the language of MIS on their own by continuously assessing their knowledge application and performance in real time. These are available as graded assignments prior to class, and are accessible on smartphones, tablets, and computers.

• **Learning Catalytics™** is a student response tool that helps you generate class discussion, customize your lecture, and promote peer-to-peer learning based on real-time analytics. Learning Catalytics uses students’ smartphones, tablets, or laptops to engage them in more interactive tasks.

• **The Gradebook** offers an easy way for you and your students to see their performance in your course.

  Item Analysis lets you quickly see trends by analyzing details like the number of students who answered correctly/incorrectly, time on task, and more.

  And because it’s correlated with the AACSB Standards, you can track students’ progress toward outcomes that the organization has deemed important in preparing students to be leaders.

• **Pearson eText** enhances learning — both in and out of the classroom. Students can take notes, highlight, and bookmark important content, or engage with interactive lecture and example videos that bring learning to life anytime, anywhere via MyLab or the app.

• **Accessibility (ADA)**—Pearson is working toward WCAG 2.0 Level AA and Section 508 standards, as expressed in the Pearson Guidelines for Accessible Educational Web Media. Moreover, our products support customers in meeting their obligation to comply with the Americans with Disabilities Act (ADA) by providing access to learning technology programs for users with disabilities.

  Please email our Accessibility Team at disability.support@pearson.com for the most up-to-date information.

• **With LMS Integration**, you can link your MyLab course from Blackboard Learn™, Brightspace® by D2L®, Canvas™, or Moodle®.

Dear Student,

Honestly, this is a fun class. It’s fun to take because you’ll learn about things that dominate news headlines every day. You’ll learn about things like self-driving cars, 3D printing, social media, Big Data, virtual reality, the cloud, and cyber security. No, it’s not a programming class. It’s not intended to be a class where you learn a bunch of boring technical terms and computer code. Not at all.

This class is about using technology to create value. For example, the smartphone sitting next to you is a piece of technology that is probably very valuable to you. It’s an amazing piece of hardware that contains software, databases, and artificial intelligent agents. You use it to browse the Web, collaborate with friends, take pictures, post to social media, and make online purchases. More than 85 percent of college students have a smartphone, and 46 percent say they can’t live without it. That’s value, and they’re willing to pay for it.

And that’s what information systems are all about. Innovators like Steve Jobs, Bill Gates, Larry Ellison, Mark Zuckerberg, Larry Page, Sergey Brin, and Jeff Bezos have used technology to create value for their customers. As a result, they have made billions of dollars, revolutionized commerce, and created some of the largest companies in the world. And you can do the same thing in your personal life.

You can use technology to get a great job, increase your earning potential, and become indispensable to your future employer. You may not be a superstar entrepreneur like Steve Jobs, but you can exceed beyond your expectations by applying the knowledge you learn in this class. Companies are becoming increasingly dependent on technology. They need people who understand how to use new technology to solve new types of problems. And that’s you.

Think about it. Over time, technology creates new jobs that didn’t exist before. Mobile application developers, social media analysts, information security specialists, business intelligence analysts, and data architects didn’t exist 20—even 10—years ago. Similarly, the best jobs 20 years from now probably don’t currently exist.

The trick to turning information systems to your advantage is being able to predict technological innovations and then get ahead of them. During your career, you will find many opportunities for the innovative application of information systems in business and government—but only if you know how to look for them.

Once found, those opportunities become your opportunities when you—as a skilled, creative, non-routine problem solver—apply emerging technology to facilitate your organization’s strategy. This is true whether your job is in marketing, operations, sales, accounting, finance, entrepreneurship, or another discipline.

Congratulations on deciding to study business. Use this course to help you obtain and then thrive in an interesting and rewarding career. Learn more than just the MIS terminology—understand the ways information systems are transforming business and the many, many ways you can participate in that transformation.

In this endeavor, we wish you, a future business professional, the very best success!

David Kroenke & Randy Boyle
Each chapter includes two unique guides that focus on current issues in information systems. In each chapter, one of the guides focuses on an ethical issue in business. The other guide focuses on careers in the field of information systems. The content of each guide is designed to stimulate thought, discussion, and active participation in order to help you develop your problem-solving skills and become a better business professional.

**Chapter 1**
*Ethics: Ethics and Professional Responsibility*, p. 20
*Career Guide: Five-Component Careers*, p. 22

**Chapter 2**
*Ethics: Big Brother Wearables*, p. 46
*Career Guide: Software Product Manager*, p. 48

**Chapter 3**
*Ethics: The Lure of Love Bots*, p. 74
*Career Guide: Director of Architecture*, p. 76

**Chapter 4**
*Ethics: Free Apps for Data*, p. 111
*Career Guide: Supportability Program Manager*, p. 114

**Chapter 5**
*Ethics: Querying Inequality?, p. 142
Career Guide: Senior Database Engineer*, p. 144

**Chapter 6**
*Ethics: Cloudy Profit?, p. 176
Career Guide: Senior Network Manager*, p. 178

**Chapter 7**
*Ethics: Paid Deletion*, p. 204
*C entre Guide: IT Technical Manager*, p. 206

**Chapter 8**
*Ethics: Synthetic Friends*, p. 238
*C areer Guide: Freelance Digital Marketer & Content Creator*, p. 240

**Chapter 9**
*Ethics: MIS-Diagnosis*, p. 270

**Chapter 10**
*Ethics: Exhaustive Cheating*, p. 308
*C areer Guide: Security Consultant*, p. 310

**Chapter 11**
*Ethics: Training Your Replacement*, p. 336
*C areer Guide: Senior Data Analyst*, p. 338

**Chapter 12**
*Ethics: Estimation Ethics*, p. 364
*C areer Guide: Developing Your Personal Brand*, p. 366

**Chapter Extension 16**
*C areer Guide: Director, Asian Operations*, p. 606
We have structured this book so you can maximize the benefit from the time you spend reading it. As shown in the table below, each chapter includes a series of learning aids to help you succeed in this course.

<table>
<thead>
<tr>
<th>Resource</th>
<th>Description</th>
<th>Benefit</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Question-Driven Chapter Learning Objectives</td>
<td>These queries, and the subsequent chapter sections written around them, focus your attention and make your reading more efficient.</td>
<td>Identify the main point of the section. When you can answer each question, you’ve learned the main point of the section.</td>
<td>Chapter 6, Q6-1: Why Is the Cloud the Future for Most Organizations?</td>
</tr>
<tr>
<td>Guides</td>
<td>Each chapter includes two guides that focus on current issues relating to information systems. One addresses ethics, and the other addresses information systems careers.</td>
<td>Stimulate thought and discussion. Learn about real-world IS jobs. Help you learn to respond to ethical dilemmas in business.</td>
<td>Chapter 5 Ethics Guide: Querying Inequality? Chapter 9 Career Guide: Manager, Data and Analytics</td>
</tr>
<tr>
<td>So What?</td>
<td>Each chapter of this text includes a feature called So What? This feature presents a current issue in IS that is relevant to the chapter content and asks you to consider why that issue matters to you as a future business professional.</td>
<td>Understand how the material in the chapter applies to everyday situations.</td>
<td>Chapter 2 So What?: Augmented Collaboration</td>
</tr>
<tr>
<td>How Does the Knowledge in This Chapter Help You? (near the end of each chapter)</td>
<td>This section revisits the opening scenario and discusses what the chapter taught you about it.</td>
<td>Summarizes the “takeaway” points from the chapter as they apply to the company or person in the story and to you.</td>
<td>Chapter 11 How Does the Knowledge in This Chapter Help You?</td>
</tr>
<tr>
<td>Active Review</td>
<td>Each chapter concludes with a summary-and-review section, organized around the chapter’s study questions.</td>
<td>Offers a review of important points in the chapter. If you can answer the questions posed, you understand the material.</td>
<td>Chapter 9 Active Review</td>
</tr>
<tr>
<td>Key Terms and Concepts</td>
<td>Highlight the major terms and concepts with their appropriate page references.</td>
<td>Provide a summary of key terms for review before exams.</td>
<td>Chapter 6 Key Terms and Concepts</td>
</tr>
<tr>
<td>Resource</td>
<td>Description</td>
<td>Benefit</td>
<td>Example</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>-----------------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Using Your Knowledge</td>
<td>These exercises ask you to take your new knowledge one step further by applying it to a practice problem.</td>
<td>Tests your critical-thinking skills and keeps reminding you that you are learning material that applies to the real world.</td>
<td>Chapter 4 Using Your Knowledge</td>
</tr>
<tr>
<td>Collaboration Exercise</td>
<td>A team exercise that focuses on the chapter’s topic.</td>
<td>Use Google Drive, Windows OneDrive, Microsoft SharePoint, or some other tool to collaborate on team answers.</td>
<td>Collaboration Exercise 3, which explores the use of information systems at a high-value bike rental service</td>
</tr>
<tr>
<td>Case Study</td>
<td>A case study closes each chapter. You will reflect on real organizations’ use of the technology or systems presented in the chapter and recommend solutions to business problems.</td>
<td>Requires you to apply newly acquired knowledge to real situations.</td>
<td>Case Study 6: FinQloud Forever . . . Well, at Least for the Required Interval . . .</td>
</tr>
<tr>
<td>Application Exercises (at the end of the book)</td>
<td>These exercises ask you to solve business situations using spreadsheet (Excel) or database (Access) applications and other Office applications.</td>
<td>Help develop your computer skills.</td>
<td>6-2, which builds on your knowledge from Chapter 6 by asking you to import spreadsheet data into Access and produce cost reports</td>
</tr>
<tr>
<td>SharePoint Hosting</td>
<td>Pearson will host Microsoft SharePoint site collections for your university. Students need access to MyMISLab and a browser to participate.</td>
<td>Enables students to collaborate using the world’s most popular collaboration software.</td>
<td></td>
</tr>

—Randy Boyle
Experiencing MIS offers basic topic coverage of MIS in its 12 chapters and more in-depth, expanded coverage in its chapter extensions. This modular organization allows you to pick and choose among those topics. Here chapter extensions are shown below the chapters to which they are related. You will preserve continuity if you use each of the 12 chapters in sequence. In most cases, a chapter extension can be covered any time in the course after its related chapter. You need not use any of the chapter extensions if time is short.

**Part 1  Why MIS?**

**Chapter 1  The Importance of MIS** 3  
**Chapter 2  Business Processes, Information Systems, and Information** 31

**CE 1  Collaboration Information Systems for Decision Making, Problem Solving, and Project Management** 373  
**CE 2  Collaborative Information Systems for Student Projects** 386

**Part 2  Information Technology**

**Chapter 4  Hardware and Software** 87  
**Chapter 5  Database Processing** 123

**CE 3  Mobile Systems** 407  
**CE 4  Introduction to Microsoft Excel 2016** 423  
**CE 5  Database Design** 442  
**CE 6  Using Microsoft Access 2016** 457

**Part 3  Using IS for Competitive Advantage**

**Chapter 7  Processes, Organizations, and Information Systems** 187  
**Chapter 8  Social Media Information Systems** 215

**CE 9  Enterprise Resource Planning (ERP) Systems** 522

Chapter 3  Organizational Strategy, Information Systems, and Competitive Advantage  59

Chapter 6  The Cloud  155

CE 7  Using Excel and Access Together  477
CE 8  Network and Cloud Technology  505

Chapter 9  Business Intelligence Systems  247

CE 12  Database Marketing  558
CE 13  Reporting Systems and OLAP  567
CE 14  Artificial Intelligence and Automation  578

Chapter 12  Information Systems Development  345

CE 18  Agile Development  635
CE 19  Business Process Management  645
PART 1 Why MIS?

CHAPTER 1: THE IMPORTANCE OF MIS P. 3

   - The Digital Revolution p. 5
   - Evolving Capabilities p. 5
   - Moore’s Law p. 6
   - Metcalfe’s Law p. 7
   - Other Forces Pushing Digital Change p. 7
   - This is the Most Important Class in the School of Business p. 8

   - How Can Intro to MIS Help You Learn Nonroutine Skills? p. 10

3. Why Are MIS-Related Jobs in High Demand? p. 11
   - What is the Bottom Line? p. 13
   - So What?: A Is for Alphabet p. 14

   - Components of an Information System p. 15
   - Management and use of Information Systems p. 16
   - Achieving Strategies p. 17

   - Strong Passwords p. 18
   - Password Etiquette p. 18

How does the knowledge in this chapter help you? p. 19

Ethics Guide Ethics and Professional Responsibility p. 20
Career Guide Five-Component Careers p. 22

CASE STUDY 1: zulily p. 26

CHAPTER 2: BUSINESS PROCESSES, INFORMATION SYSTEMS, AND INFORMATION P. 31

1. Why Does the Falcon Security Team Need to Understand Business Processes? p. 33

   - How Best Bikes Works p. 33
   - The Existing Best Bikes Process p. 34
   - How Best Bikes Processes Must Change to Support 3D Printing p. 36

   - Using Information Systems to Improve Process Quality p. 39

   - Definitions Vary p. 40
   - Where Is Information? p. 41
   - So What?: Augmented Collaboration p. 42

5. What Data Characteristics are Necessary for Quality Information? p. 43
   - Accurate p. 43
   - Timely p. 43
   - Relevant p. 44
   - Just Barely Sufficient p. 44
   - Worth Its Cost p. 44

How does the knowledge in this chapter help you? p. 45

Ethics Guide Big Brother Wearables p. 46
Career Guide Software Product Manager p. 48

CASE STUDY 2: Eating Our Own Dog Food p. 52

CHAPTER 3: ORGANIZATIONAL STRATEGY, INFORMATION SYSTEMS, AND COMPETITIVE ADVANTAGE P. 59

   - Primary Activities in the Value Chain p. 64
   - Support Activities in the Value Chain p. 65
   - Value Chain Linkages p. 65

6. How Do Information Systems Provide Competitive Advantages?  p. 67
   So What?: The Autonomous Race p. 68
   Competitive Advantage Via Products p. 69
   Competitive Advantage VIA Business Processes p. 69
   How Can an Organization Use is to Create Competitive Advantages? p. 70
   How Does this System Create a Competitive Advantage? p. 72

How does the knowledge in this chapter help you? p. 73

Ethics Guide The Lure of Love Bots p. 74
Career Guide Director of Architecture p. 76
CASE STUDY 3: The Amazon of Innovation p. 80

PART 2 Information Technology

CHAPTER 4: HARDWARE AND SOFTWARE  p. 87
1. What Do Business Professionals Need To Know About Computer Hardware? p. 89
   Hardware Components p. 89
   Types of Hardware p. 89
   Computer Data p. 91
   The Internet of Things p. 92
   Digital Reality Devices p. 94
   Self-Driving Cars p. 96
   So What?: New from CES 2017 p. 99
   What Are The Major Operating Systems? p. 102
   Virtualization p. 104
   Owning Versus Licensing p. 106
   What Types of Applications Exist, and How Do Organizations Obtain Them? p. 107
   What Is Firmware? p. 108
   Why Do Programmers Volunteer Their Services? p. 109
   How Does Open Source Work? p. 109
   So, Is Open Source Viable? p. 110
   How does the knowledge in this chapter help you? p. 110

Ethics Guide Free Apps for Data p. 111
Career Guide Supportability Account Manager p. 114
CASE STUDY 4: The Apple of Your i p. 119

CHAPTER 5: DATABASE PROCESSING  p. 123
1. Why Do you need to Know About Databases? p. 125
   Reasons for Learning Database Technology p. 125
   What Is the Purpose of a Database? p. 125
2. What Is a Database? p. 127
   Relationships Among Rows p. 128
   Metadata p. 129
3. What Is a Database Management System (DBMS)? p. 130
   So What?: Slick Analytics p. 131
   Traditional Forms, Queries, Reports, and Applications p. 134
   Browser Forms, Reports, Queries, and Applications p. 135
   Multiuser Processing p. 138
6. What Are Nontraditional DBMS Products? p. 139
   Need to Store New Data Types Differently p. 139
   Need for Faster Processing Using Many Servers p. 140
   Nontraditional DBMS Types p. 140
   Will these New Products Replace the Relational Model? p. 140
   What Do Nonrelational DBMS Mean for you? p. 141

How does the knowledge in this chapter help you? p. 141

Ethics Guide Querying Inequality? p. 142
Career Guide Senior Database Engineer p. 144
CASE STUDY 5: Searching for Pianos . . . p. 149

CHAPTER 6: THE CLOUD  p. 155
1. Why Is the Cloud the Future for Most Organizations? p. 157
   Cloud Computing p. 157
   Why do Organizations Prefer the Cloud? p. 159
   When Does the Cloud Not Make Sense? p. 161
PART 3 Using IS for Competitive Advantage

CHAPTER 7: PROCESSES, ORGANIZATIONS, AND INFORMATION SYSTEMS  p. 187

1. How Do Information Systems Vary by scope?  p. 189
   Personal Information Systems  p. 189
   Workgroup Information Systems  p. 189
   Enterprise Information Systems  p. 190
   Inter-Enterprise Information Systems  p. 190

2. How Do Enterprise Systems Solve the Problems of departmental Silos?  p. 190
   What Are the Problems of Information Silos?  p. 191
   How Do Organizations Solve the Problems of Information Silos?  p. 193
   An Enterprise System for Patient Discharge  p. 193
   Business Process Reengineering  p. 194

   Customer Relationship Management (CRM)  p. 195
   Enterprise Resource Planning (ERP)  p. 198
   Enterprise Application Integration (EAI)  p. 198
   What are the Challenges when Implementing and Upgrading Enterprise Systems?  p. 199

4. How Do Inter-enterprise IS Solve the Problems of Enterprise Silos?  p. 201

5. What Does the Cloud Mean for Your Future?  p. 174

CHAPTER 8: SOCIAL MEDIA INFORMATION SYSTEMS  p. 215

1. What Is a Social Media Information System (SMIS)?  p. 217
   Three SMIS Roles  p. 217
   SMIS COMPONENTS  p. 220

2. How Do SMIS Advance Organizational Strategy?  p. 221
   Social Media and The Sales and Marketing Activity  p. 222
   Social Media and Customer Service  p. 223
   Social Media and Inbound and Outbound Logistics  p. 223
   Social Media and Manufacturing and Operations  p. 224
   Social Media and Human Resources  p. 224
   So What?: Enhanced Golf Fan  p. 225

   How Do Social Networks Add Value to Businesses?  p. 227
   Using Social Networking to Increase The Number of Relationships  p. 227
   Using Social Networks to Increase the Strength of Relationships  p. 229
   Using Social Networks to Connect to Those with More Resources  p. 229

4. How Do (Some) Companies Earn Revenue from Social Media?  p. 230
   You Are the Product  p. 231
   Revenue Models for Social Media  p. 231
   Does Mobility Reduce Online Ad Revenue?  p. 232

5. How Can Organizations Address SMIS Security Concerns?  p. 233
   Managing the Risk of Employee Communication  p. 233
   Managing the Risk of Inappropriate Content  p. 234
How does the knowledge in this chapter help you?  p. 237
Ethics Guide Synthetic Friends  p. 238
Career Guide Freelance Marketer & Content Creator  p. 240
CASE STUDY 8: Sedona Social  p. 243

CHAPTER 9: BUSINESS INTELLIGENCE SYSTEMS  P. 247
1. How Do Organizations Use Business Intelligence (BI) Systems?  p. 249
   How Do Organizations Use BI?  p. 249
   What Are Typical Uses for Business Intelligence?  p. 250
2. What Are the Three Primary Activities in the BI Process?  p. 251
   Using Business Intelligence to Find Candidate Parts  p. 252
3. How Do Organizations Use Data Warehouses and Data Marts to Acquire Data?  p. 257
   Problems with Operational Data  p. 258
   Data Warehouses Versus Data Marts  p. 260
4. What Are Three Techniques for Processing BI Data?  p. 261
   Reporting Analysis  p. 261
   Data Mining Analysis  p. 261
   Big Data  p. 263
5. What Are the Alternatives for Publishing BI?  p. 265
   Characteristics of BI Publishing Alternatives  p. 265
   So What?: BI for Securities Trading?  p. 266
   What Are the Two Functions of a BI Server?  p. 267
How does the knowledge in this chapter help you?  p. 268
Ethics Guide MIS-diagnosis  p. 270
Career Guide Senior Technical Analyst  p. 272
CASE STUDY 9: Hadoop the Cookie Cutter  p. 275

PART 4 Information Systems Management

CHAPTER 10: INFORMATION SYSTEMS SECURITY  P. 281
   The IS Security Threat/Loss Scenario  p. 283
   What Are the Sources of Threats?  p. 284
   Goal of Information Systems Security  p. 288
   So What?: New from Black Hat 2016  p. 293
   Identification and Authentication  p. 294
   Single Sign-on for Multiple Systems  p. 295
   Encryption  p. 295
   Firewalls  p. 296
   Malware Protection  p. 297
   Design for Secure Applications  p. 299
   Human Safeguards for Employees  p. 300
   Human Safeguards for Nonemployee Personnel  p. 302
   Account Administration  p. 303
   Systems Procedures  p. 304
   Security Monitoring  p. 305
How does the knowledge in this chapter help you?  p. 307
Ethics Guide Exhaustive Cheating  p. 308
Career Guide Security Consultant  p. 310
CASE STUDY 10: Hitting the Target  p. 314

CHAPTER 11: INFORMATION SYSTEMS MANAGEMENT  P. 317
1. What Are the Functions and Organization of the IS Department?  p. 319
   How Is the IS Department Organized?  p. 319
   Security Officers  p. 321
   What IS-related Job Positions Exist?  p. 321
2. How Do Organizations Plan the Use of IS?  p. 323
   Align Information Systems with Organizational Strategy  p. 323
   Communicate IS Issues to the Executive Group  p. 323
   Develop Priorities and Enforce Them Within the IS Department  p. 324
   Sponsor the Steering Committee  p. 324
3. What Are the Advantages and Disadvantages of Outsourcing?  p. 325
   - Outsourcing Information Systems  p. 325
   - So What?: Managing the IS Department  p. 326
   - International Outsourcing  p. 328
   - What Are the Outsourcing Alternatives?  p. 329
   - What Are the Risks of Outsourcing?  p. 330

   - Your User Rights  p. 333
   - Your User Responsibilities  p. 333

How does the knowledge in this chapter help you?  p. 335

Ethics Guide  Training Your Replacement  p. 336
Career Guide  Senior Data Analyst  p. 338

CASE STUDY 11: Automating Labor  p. 341

CHAPTER 12: INFORMATION SYSTEMS DEVELOPMENT  p. 345

   - The Difficulty of Requirements Determination  p. 349
   - Changes in Requirements  p. 349
   - Scheduling and Budgeting Difficulties  p. 349
   - Changing Technology  p. 349
   - Diseconomies of Scale  p. 350
   - Is It Really So Bleak?  p. 350

3. What Are the Five Phases of the SDLC?  p. 350

   - Define System Goals and Scope  p. 352
   - Assess Feasibility  p. 352
   - Form a Project Team  p. 353

5. What Is the Users' Role in the Requirements Phase?  p. 353
   - Determine Requirements  p. 353
   - Approve Requirements  p. 354
   - Role of a Prototype  p. 355

   - So What?: Banking on IoT  p. 356
   - Hardware Design  p. 357
   - Software Design  p. 357
   - Database Design  p. 357
   - Procedure Design  p. 358
   - Design of Job Descriptions  p. 358

   - System Testing  p. 358
   - System Conversion  p. 359

8. What Are the Tasks for System Maintenance?  p. 361

9. What Are Some of the Problems with the SDLC?  p. 362
   - The SDLC Waterfall  p. 362
   - Requirements Documentation Difficulty  p. 362
   - Scheduling and Budgeting Difficulties  p. 362

How does the knowledge in this chapter help you?  p. 363

Ethics Guide  Estimation Ethics  p. 364
Career Guide  Developing Your Personal Brand  p. 366

CASE STUDY 12: When Will We Learn?  p. 370
CHAPTER EXTENSIONS

CHAPTER EXTENSION 1: COLLABORATION INFORMATION SYSTEMS FOR DECISION MAKING, PROBLEM SOLVING, AND PROJECT MANAGEMENT P. 373

1. What Are the Two Key Characteristics of Collaboration? p. 373
   Importance of Constructive Criticism p. 373
   Guidelines for Giving and Receiving Constructive Criticism p. 375
   Warning! p. 375

2. What Are Three Criteria for Successful Collaboration? p. 376
   Successful Outcome p. 376
   Growth in Team Capability p. 376
   Meaningful and Satisfying Experience p. 377

3. What Are the Four Primary Purposes of Collaboration? p. 377
   Becoming Informed p. 377
   Making Decisions p. 378
   Solving Problems p. 379
   Managing Projects p. 380

4. What Are the Components and Functions of a Collaboration Information System? p. 381
   The Five Collaboration System Components p. 382
   Primary Functions: Communication and Content Sharing p. 382

CHAPTER EXTENSION 2: COLLABORATIVE INFORMATION SYSTEMS FOR STUDENT PROJECTS P. 386

1. What Are the IS Requirements for Student Project Collaborations? p. 386
   Required Features p. 386
   Nice-to-Have Features p. 387
   Collaboration Tool Characteristics p. 387

   Shared Content with no Control p. 392
   Shared Content with Version Management on Google Drive p. 392
   Shared Content with Version Control p. 395

   Sharing a Task List on Google Drive p. 398
   Sharing a Task List Using Microsoft Sharepoint p. 398

5. Which Collaboration Information System Is Right for Your Team? p. 400
   The Minimal Collaboration Tool Set p. 401
   The Good Collaboration Tool Set p. 401
   The Comprehensive Collaboration Tool Set p. 401
   Choosing the Set For Your Team p. 402
   Don’t Forget Procedures and People! p. 403

CHAPTER EXTENSION 3: MOBILE SYSTEMS P. 407

   Hardware p. 408
   Software p. 408
   Data p. 409
   Procedures p. 409
   People p. 410

   Developing Native Mobile Applications p. 410
   Developing Web Mobile Applications p. 412
   Which Is Better? p. 413

   Feature Content p. 414
   Use Context-Sensitive Chrome p. 414
   Provide Animation and Lively Behavior p. 414
   Design to Scale and Share p. 415
   Use the Cloud p. 416

5. What Are the Challenges of Personal Mobile Devices at Work? p. 418
   Advantages and Disadvantages of Employee Use of Mobile Systems at Work p. 418
   Survey of Organizational BYOD Policy p. 419
CHAPTER EXTENSION 4: INTRODUCTION TO MICROSOFT EXCEL 2016 P. 423

1. What Is a Spreadsheet? p. 423
3. How Can You Enter Data? p. 426
   Key in the Data p. 426
   Let Excel add the Data Using a Pattern p. 428
6. How Can You Create a (Simple) Formula? p. 434
7. How Can You Print Results? p. 437

CHAPTER EXTENSION 5: DATABASE DESIGN P. 442

1. Who Will Volunteer? p. 442
2. How Are Database Application Systems Developed? p. 442
3. What are the Components of the Entity-Relationship Data Model? p. 443
   Entities p. 443
   Relationships p. 444
4. How Is a Data Model Transformed into a Database Design? p. 447
   Normalization p. 447
   Representing Relationships p. 448
5. What Is the Users’ Role? p. 450

CHAPTER EXTENSION 6: USING MICROSOFT ACCESS 2016 P. 457

1. How Do You Create Tables? p. 457
   Starting Access p. 458
   Creating Tables p. 458
2. How Do You Create Relationships? p. 462
3. How Do You Create a Data Entry Form? p. 464
4. How Do You Create Queries Using the Query Design Tool? p. 468
5. How Do You Create a Report? p. 470

CHAPTER EXTENSION 7: USING EXCEL AND ACCESS TOGETHER P. 477

   Import/Export of Text Data p. 478
   Import/Export of Excel and Access Data p. 481
   Creating a Pie Chart p. 481
   Creating a Column Chart p. 483
5. How Can You Use Excel to Graph Access Data? p. 490

CHAPTER EXTENSION 8: NETWORK AND CLOUD TECHNOLOGY P. 505

2. What Are the Components of a LAN? p. 506
   Connecting Your LAN to the Internet p. 507
3. How Does the Internet Work? p. 509
   The Internet and the U.S. Postal System p. 509
   Step 1: Assemble Package (Packets) p. 509
   Step 2: Put Name on Package (Domain Names) p. 510
   Step 3: Look Up Address (IP Address) p. 510
   Step 4: Put Address on Package (IP Address on Packet) p. 510
   Step 5: Put Registered Mail Sticker on Package (TCP) p. 511
   Step 6: Ship Package (Packets Transported by Carriers) p. 511
4. How Do Web Servers Support the Cloud? p. 513
   Three-Tier Architecture p. 513
   Watch the Three Tiers in Action! p. 514
   Service-Oriented Architecture (SOA) p. 514
   Internet Protocols p. 517
   TCP/IP Protocol Architecture p. 517

CHAPTER EXTENSION 9: ENTERPRISE RESOURCE PLANNING (ERP) SYSTEMS P. 522

1. What Is the Purpose of ERP Systems? p. 522
2. What Are the Elements of an ERP Solution? p. 525
   Hardware p. 525
   Software: ERP Application Programs p. 526
   Data: ERP Databases p. 526
   Procedures: Business Process Procedures p. 526
   People: Training and Consulting p. 528
3. How Are ERP Systems Implemented and Upgraded? p. 528
   ERP by Industry Type p. 529
   ERP by Organization Size p. 530
   International ERP p. 530
5. How Do the Major ERP Vendors Compare? p. 531
   ERP Market Leaders p. 531
   ERP Products p. 531
   ERP in the Future p. 533

CHAPTER EXTENSION 10: SUPPLY CHAIN MANAGEMENT P. 537
1. What Are Typical Inter-Enterprise Processes? p. 537
2. What Is a Supply Chain? p. 537
3. What Factors Affect Supply Chain Performance? p. 539
4. How Does Supply Chain Profitability Differ from Organizational Profitability? p. 540
5. What Is the Bullwhip Effect? p. 541

CHAPTER EXTENSION 11: ENTERPRISE SOCIAL NETWORKS AND KNOWLEDGE MANAGEMENT P. 545
1. How Do Organizations Develop an Effective SMIS? p. 545
   Step 1: Define Your Goals p. 545
   Step 2: Identify Success Metrics p. 546
   Step 3: Identify the Target Audience p. 547
   Step 4: Define Your Value p. 547
   Step 5: Make Personal Connections p. 548
   Step 6: Gather and Analyze Data p. 548
2. What Is an Enterprise Social Network (ESN)? p. 548
   Enterprise 2.0 p. 549
   Changing Communication p. 549
   Deploying Successful Enterprise Social Networks p. 550
3. What Are the Benefits of Knowledge Management? p. 551
5. What Are Content Management Systems? p. 553
   What Are the Challenges Of Content Management? p. 553
   What Are Content Management Application Alternatives? p. 554

CHAPTER EXTENSION 12: DATABASE MARKETING P. 558
1. What Is a Database Marketing Opportunity? p. 558
2. How Does RFM Analysis Classify Customers? p. 558
3. How Does Market-Basket Analysis Identify Cross-Selling Opportunities? p. 559
   A Decision Tree for Student Performance p. 561
   A Decision Tree for Loan Evaluation p. 563

CHAPTER EXTENSION 13: REPORTING SYSTEMS AND OLAP P. 567
1. How Do Reporting Systems Enable People to Create Information? p. 567
2. What Are the Components and Characteristics of Reporting Systems? p. 567
   Report Type p. 570
   Report Media p. 571
   Report Mode p. 571
3. How Are Reports Authored, Managed, and Delivered? p. 572
   Report Authoring p. 572
   Report Management p. 572
   Report Delivery p. 573

CHAPTER EXTENSION 14: ARTIFICIAL INTELLIGENCE AND AUTOMATION P. 578
1. Why Is Artificial Intelligence Important? p. 578
   Advances in AI p. 578
   Benefits of Automated Labor p. 580
3. How Will AI Affect Me? p. 583
   Unwanted Dirty Jobs p. 583
   Retraining and Retooling p. 583
   Surviving a Shifting Workplace p. 584
   Integrated Enabler of Other Technology p. 586
5. How Does AI Work? p. 586
   Machine Learning p. 587
   IBM’s Watson p. 588

CHAPTER EXTENSION 15: DATA BREACHES P. 593
1. What Is a Data Breach? p. 593
   Why Do Data Breaches Happen? p. 594
Chapter Extensions

2. How Do Data Breaches Happen? p. 594
   Hitting Target p. 595
   How Did they Do It? p. 595
   The Damage p. 595

3. How Should Organizations Respond to Data Breaches? p. 596
   Respond Quickly p. 597
   Plan for a Data Breach p. 597
   Be Honest about the Breach p. 597

4. What Are the Legal Consequences of a Data Breach? p. 598

5. How Can Data Breaches be Prevented? p. 599

CHAPTER EXTENSION 16:
INTERNATIONAL MIS P. 604

   How Does the Global Economy Change the Competitive Environment? p. 605
   How Does the Emerging Global Economy Change Competitive Strategy? p. 606

2. What Are the Characteristics of International Components? p. 608
   What’s Required to Localize Software? p. 608
   IBM’s Watson Learns Korean p. 609
   What Are the Problems and Issues of Global Databases? p. 610
   What Are the Challenges of International Enterprise Applications? p. 611

3. How Do Inter-Enterprise is Facilitate Globalization? p. 612
   How Do Global Information Systems Affect Supply Chain Profitability? p. 612
   How Does Social Media Affect International Business? p. 613

   Legal Environment p. 613
   Encryption p. 614
   Distribution of Content p. 614
   Personal Privacy p. 614
   Physical Security p. 615
   Cultural Norms p. 615

5. What Are the Challenges of International is Management? p. 616
   What Are the Challenges of International Project Management? p. 617
   What Are the Challenges of International is Management? p. 618

CHAPTER EXTENSION 17:
SYSTEMS DEVELOPMENT PROJECT MANAGEMENT P. 623

2. What Are the Trade-Offs in Requirements, Cost, and Time? p. 624
3. What Are the Dimensions of Project Management? p. 625
5. What Is the Biggest Challenge for Planning a Systems Development Project? p. 629
6. What Are the Biggest Challenges for Managing a Systems Development Project? p. 630

CHAPTER EXTENSION 18: AGILE DEVELOPMENT P. 636

1. Why Is the SDLC Losing Credibility? p. 636
2. What Are the Principles of Agile Development Methodologies? p. 637
   SCRUM Essentials p. 639
   When Are We Done? p. 640
   Key Roles p. 639
4. How Do Requirements Drive the Scrum Process? p. 641
   Creating Requirements Tasks p. 641
   Scheduling Tasks p. 641
   Committing to Finish Tasks p. 642
   Hocus-Pocus? p. 642

CHAPTER EXTENSION 19:
BUSINESS PROCESS MANAGEMENT P. 646

1. Why Do Organizations Need to Manage Business Processes? p. 646
   A Sample Ordering Business Process p. 646
   Why Does this Process Need Management? p. 646
2. What Are the Stages of Business Process Management (BPM)? p. 648
   Business Processes First p. 651
   Information System First p. 652
   Another Factor: Off-the-Shelf Software p. 652
   And the Answer Is . . . p. 653
   Defining the Process Problem p. 654
   Designing the New Process p. 656
   Create Process Components p. 656
   Implement New Processes p. 656

Application Exercises p. 660
Glossary p. 675
Index p. 693
PREFACE

In Chapter 1, we claim that MIS is the most important class in the business curriculum. That’s a bold statement, and every year we ask whether it remains true. Is there any discipline having a greater impact on contemporary business and government than IS? We continue to doubt there is. Every year brings important new technology to organizations, and many of these organizations respond by creating innovative applications that increase productivity and help them accomplish their strategies.

Over the past year, we’ve seen long-discussed innovations take big leaps forward. Digital reality (sometimes called virtual reality) really took off. Microsoft (HoloLens), Meta (Meta 2), and Facebook (Oculus Rift) released their digital reality devices. The reviews for these devices from early adopters were glowing. These devices will create entirely new types of companies and could change the way people live, work, shop, and entertain themselves.

Smart devices dominated the annual Consumer Electronics Show (CES) again this year. Self-balancing motorcycles, ultra-thin (2.5 mm) TVs, and Bluetooth-enabled smart cycles were a hit at the annual display of the latest innovative products. Businesses see the potential value in smart devices. They also recognize the need to collect, store, and analyze the data these devices will generate. As a result, job candidates with skills in analytics, business intelligence, and Big Data are all in high demand right now.

In addition to changing the ways we live and gather data, recent innovations are changing the way companies work, too. For example, over the past year Amazon experienced tremendous success using Kiva robots in its fulfillment centers. It expanded their use to 20 warehouses around the world. These 45,000 Kiva robots have reduced operating costs by 20 percent ($2.2 million per warehouse); they have also reduced click-to-ship times from 60 minutes to just 15 minutes. If Amazon rolls out these robots to all of its 110 warehouses, it could save billions. Technology—in this case, an automated workforce—is fundamentally changing the way organizations operate. It’s enabling them to be more productive, innovative, and adaptable.

Another technological advancement that made huge strides over the past year was self-driving cars. Tesla Motors turned a regular car into a self-driving car by simply pushing out a software update. The nearly autonomous vehicles have logged more than 1.3 billion miles on autopilot (with a few minor traffic incidents). Google, Mercedes Benz, and nearly all other automobile manufacturers are running full tilt to turn their traditional cars into fully autonomous smart cars. A recent study by Intel estimates the self-driving vehicle services to be worth $7 trillion by 2050. Consider what would happen if Amazon started using self-driving trucks. It could reduce shipping costs by 80 percent!

Of course, not all of this year’s technology news has been good. Large-scale data breaches continue to be a major problem. Friend Finder Networks (412 million), Dailymotion (85 million), Fling (40 million), and MySpace (164 million) all suffered enormous data losses. In fact, this year we found out about the largest data breaches ever. Yahoo announced that it experienced data breaches in 2013 (1 billion) and again in 2014 (500 million). Unfortunately, it chose not notify users about these data breaches for years.

And these are just a fraction of the total number of organizations affected this year. Organizations saw a jump in the number of attacks from highly organized international hacking groups. The world saw the largest coordinated attack of critical systems using cryptographic ransomware ever. WannaCry malware crippled hundreds of corporate systems including but not limited to UK’s National Health Service, FedEx, Nissan, Russian railway systems, Hitachi, and Renault.

This edition of the text has been updated for these developments as well as normal revisions that address emergent technologies like cloud-based services, artificial intelligence, machine learning, and so on.
All of these changes highlight the fact that more sophisticated and demanding users push organizations into a rapidly changing future—one that requires continual adjustments in business planning. In order to participate in this business environment, our graduates need to know how to apply emerging technologies to better achieve their organizations’ strategies. Knowledge of MIS is critical to this endeavor. And this pace continues to remind us of Carrie Fisher’s statement “The problem with instantaneous gratification is that it’s just not fast enough.”

**WHY THIS EIGHTH EDITION?**

To reiterate the preface of earlier editions, we believe it is exceedingly important to make frequent adaptations to this text because of the delays associated with long textbook revision cycles. Text materials we develop in April of one year are published in January of the next year and are first used by students in September—a minimum 17-month delay.

For some areas of study, a year and a half may not seem long because little changes in that amount of time. But in MIS, entire companies can be founded and then sold for billions of dollars in just a few years. YouTube, for example, was founded in February 2005 and then sold in November 2006 to Google for $1.65B (21 months). And that wasn’t just a one-time fluke. Facebook Inc. started in 2004, led the social media revolution, and became a public company currently (as of mid-2016) valued at $341B. That’s a whopping $28B in growth per year for 12 years! MIS changes fast—very fast. We hope this new edition is the most up-to-date MIS textbook available.

The changes in this eighth edition are listed in Table 1. Substantial changes were made in Chapter 6 and Chapter Extension 8 to provide some context about where the cloud came from and how it differs from previous architectures. New discussion about scalability and the advantages of cloud-based services is included as well as new graphics that more clearly differentiate between IaaS, PaaS, and SaaS. Chapter content was reorganized around an example that explains how the Internet works by comparing it to the U.S. postal system. Hopefully, this new example ties abstract and unfamiliar networking concepts to real-world experiences that students have experienced.

**Table 1 Changes in the Seventh Edition**

</table>
| 6       | Reorganized chapter content for Q1 and Q2  
          | New Q1 discussion about the origin of the cloud  
          | New Q1 cloud adoption examples statistics  
          | New discussion about scalability  
          | Expanded cloud versus in-house comparison  
          | New Q2 example using transportation as a service  
          | New Q2 graphics to illustrate differences between IaaS, PaaS, and SaaS  
          | New Q2 example and graphics for CDNs  
          | Updated Active Review questions  
          | Expanded Q5 discussion to include AaaS and BaaS  
          | New So What? Feature: Quantum Learning  
          | New Career Guide: Senior Network Manager  
          | Updated industry statistics throughout the chapter |
| 7       | New ARES introduction  
          | New Career Guide: IT Technical Manager  
          | New Ethics Guide: Paid Deletion  
          | Updated Q7-4 for ARES Example |
| 8       | New ARES introduction  
          | New So What? Feature: Enhanced Golf Fan  
          | New Career Guide: Freelance Marketer & Content Creator  
          | Updated industry statistics throughout the chapter  
          | New Social Media chapter examples |
| 9       | New ARES Systems introduction  
          | New Career Guide: Senior Technical Analyst  
          | New Ethics Guide: MIS-diagnosis  
          | Updated chapter examples using ARES  
          | Updated Office 2016 figures |
| 10      | New ARES Systems introduction  
          | New Career Guide: Security Consultant  
          | New industry statistics and charts throughout the chapter  
          | New Ethics Guide: Exhaustive Cheating  
          | Discussion of packet sniffers and global ransomware attack (WannaCry) |
| 11      | New ARES Systems introduction  
          | New Career Guide: Director of Architecture  
          | New Ethics Guide: Training Your Replacement  
          | New industry statistics and charts throughout the chapter  
          | Expanded discussion on outsourcing specialized tech skills  
          | New Automated Labor case study |
| 12      | New ARES Systems Introduction  
          | New So What? Feature: Banking on IoT  
<pre><code>      | New Career Guide: Developing Your Personal Brand |
</code></pre>

| **CE1**            | Discussion of constructive criticism and groupthink |
|                    | New examples of providing and receiving constructive criticism |

| **CE2**            | Expanded discussion of real-time surveying software (Socrative) |
|                    | Updated SharePoint images |

| **CE3**            | Updated mobile statistics |

| **CE4**            | Chapter content and images updated to Microsoft Excel 2016 |

| **CE5**            | Chapter content and images updated to Microsoft Access 2016 |

| **CE6**            | Chapter content and images updated to Microsoft Access 2016 and Microsoft Excel 2016 |

| **CE7**            | Chapter content and images updated to Microsoft Access 2016 and Microsoft Excel 2016 |

| **CE8**            | Reorganized Chapter content for Q1-Q4 |
|                    | New Q4 example comparing the Internet and the U.S. postal system |
|                    | New Q4 content about DNS, TCP IP addresses, Carriers, and IXPs |
|                    | Updated industry statistics throughout the chapter |

| **CE9**            | Updated discussion about ERP leaders and market share statistics |
|                    | New discussion of Epicor ERP |
|                    | Updated discussion of the future of ERP systems |

| **CE11**           | Updated chapter statistics |

| **CE12**           | Updated RFM scoring |

| **CE13**           | Chapter content and images updated to Microsoft Access 2016 and Microsoft Excel 2016 |

| **CE14**           | New chapter extension on AI and machine learning |
|                    | Discussion of why AI is important |
|                    | Discussion of how AI will affect organizations |
|                    | Discussion of how AI will affect you |
|                    | Discussion of the goals of AI |
|                    | Example of how AI works using machine learning and IBM’s Watson |

| **CE15**           | Updated chapter statistics and data breach examples |

| **CE16**           | Updated section on localization using IBM Watson |
|                    | New examples in Q4 Legal Environment |
|                    | New statistics and discussion about international Internet access (fixed and mobile) |
|                    | New Career Guide: Director, Asian Operations |

| **CE18**           | New statistics and discussion of agile methodologies and scrum use |
This edition also includes a new chapter extension about artificial intelligence (AI) that focuses on the impacts of AI on organizations and workers. It looks at why AI has become so important within the last few years, and explores the long-term goals of this technology. We’ve included a simple machine learning example focused on spam filtering and a high-level look at IBM’s Watson.

In addition, we’ve introduced a new “Career Guide” in this edition that lets students read firsthand accounts from people working in information systems jobs. Each of these guides is written by a MIS graduate and answers questions like “How did you get this type of job?” and “What does a typical workday look like for you?” Students taking an introductory course in MIS are often interested in majoring in MIS but aren’t sure what it would be like to work in the field. These new guides answer some of the common questions students may have about working in the field.

Also, a secondary goal of these new Career Guides is to encourage female students not to be daunted by gender imbalances in a field that is 70 percent male and 30 percent female. Half of the new Career Guides are written by men and the other half by women. Hopefully, hearing from successful women working in MIS jobs will inspire female students considering a career in MIS.

Chapters 7 through 12 begin with a new discussion of ARES Systems, a cloud-based augmented-reality exercise startup. Chapters 1–6 continue to be introduced by Falcon Security, a privately owned company that provides surveillance and inspection services for companies using flying drones. In addition to motivating the chapter material, both case scenarios provide numerous opportunities for students to practice one of Chapter 1’s key skills: “Assess, evaluate, and apply emerging technology to business.”

This edition also continues to focus on teaching ethics. Every Ethics Guide asks students to apply Immanuel Kant’s categorical imperative, Bentham and Mill’s utilitarianism, or both to the business situation described in the guide. We hope you find the ethical considerations rich and deep with these exercises. The categorical imperative is introduced in the Ethics Guide in Chapter 1 (pages 20–21), and utilitarianism is introduced in the Ethics Guide in Chapter 2 (pages 46–47).

As shown in Table 1, additional changes were made to every chapter, including eight new So What? features, six new Ethics Guides, eleven new Career Guides, and updated chapter cases. Additional figures, like the one showing how CDNs work in Chapter 6, were added to make the text more accessible. Numerous changes were made throughout the chapters in an attempt to keep them up-to-date. MIS moves fast, and to keep the text current, we checked every fact, data point, sentence, and industry reference for obsolescence and replaced them as necessary.

**STRUCTURE, ORGANIZATION, AND APPEARANCE OF THIS TEXT**

Teaching today is a very different endeavor than it was years ago. Students have many more distractions and demands on their time. They are quick to tune in and quick to tune out, so much so that someone compared their attention spans to those of Labrador Retriever puppies. We can lament that fact, but we can’t change it. What we can do is to meet students where they are and creatively attempt to obtain their engagement.

We designed this text with that hope and goal in mind. Every feature of this book is designed to make it easy for students to engage with the content, not by watering it down but rather, we hope, by making it interesting and relevant to them. This text is not an encyclopedia; it attempts to teach essential topics well. It does so by providing opportunities for students to actively engage with the content, by providing features to help students better manage their study time, and with an appearance that makes it easy for students to pick up and start.
ACTIVE ENGAGEMENT

The structure of this edition of *Experiencing MIS* provides many opportunities for active engagement. Each chapter includes a So What? feature that contains exercises and questions for students to answer to demonstrate the relevancy of the chapter’s material to them. Each chapter also contains an Ethics Guide that looks at the ethical implications of the chapter content. These can be used for small in-class exercises. Finally, this edition contains 41 application exercises (see page 660).

FACILITATE STUDENT STUDY

Today’s students were reared in an environment of constant stimulation and channel surfing, and it seems nearly impossible for many students to focus on a single topic for more than a few minutes. Again, we can wish it otherwise, but short attention spans are students’ and our reality. And recent research does seem to substantiate students’ claim that, except for texting in class, students can multitask in class without problem.5

This text is structured to accommodate today’s students’ learning styles. First, to help students manage their time, it is organized around questions. Each chapter or chapter extension starts with a list of questions. Each major heading of the material is one of those questions, and the end of the chapter or extension includes an Active Review in which students are asked to demonstrate their learning of the answer to each question. Students should study until they can answer the questions; that may be 5 minutes or 5 hours, but their job is to answer those questions. This technique, from Marilla Svinicki’s research, vastly helps students manage their study time.6

You can also use the questions to structure class sessions or at least parts of those sessions. You can open class by asking students to “do the questions.” Go around the room and call on someone to answer a question or part of one.

Second, students learn more when they are emotionally engaged in the material. The purpose of the vignettes that introduce each chapter is to raise student emotion; their purpose is to cause students to care about the chapter material.

Third, 82 percent of students in the business school prefer visual learning to auditory (voice or word) learning.7 To make it easier for students to open this book and continue to read it, interesting and engaging art and photos have been used. *In every instance, however, we have insisted that the photo or art be related to the topic under discussion; these photos are not simply eye candy.* Pearson allows us to personally review and approve every photo and art exhibit in this text. We believe a good book does not have to appear boring, but all art must be relevant.

FEATURES FOR ENGAGING THE STUDENT

*Experiencing MIS* was written to make it impossible for readers of this text to miss the importance of MIS in business. The text is designed to be approachable, easy to use, sometimes humorous, with an upbeat and in-your-face attitude, but always with the goal of underlining the importance of MIS to all businesspeople in the 21st century.

An important part of making the text approachable was choosing a modular design. The text consists of 12 short chapters along with 19 supplemental discussions, called chapter extensions.

The modular nature of this text is discussed in more detail later in this preface.

EMPHASIS ON COLLABORATION

As with prior editions, this text emphasizes collaboration. It is one of Reich’s key skills for the 21st-century professional, as described in Chapter 1. We believe we need not only to require our students to collaborate but also to teach them key skills for doing so. The first two chapter extensions present collaboration techniques and collaboration information systems, respectively. Each chapter also includes a collaboration exercise at the end of the chapter.
Additionally, Pearson Education is sponsoring Microsoft SharePoint for student use. At your request, Pearson will set up a SharePoint site collection that your students can use when responding to the collaboration exercises at the end of each chapter. Students need nothing more than a browser to participate. See your Pearson sales representative for more information.

OPENING SCENARIOS FOR PARTS AND CHAPTERS

Each part and each chapter opens with a scenario intended to get students involved emotionally. We want students to mentally place themselves in the situation and to realize that this situation—or something like it—could happen to them. Each scenario sets up the chapter’s content and provides an obvious example of why the chapter is relevant to them. These scenarios help support the goals of student motivation and learning transfer.

Furthermore, both of these introductory cases involve the application of new technology to existing businesses. Our goal is to provide opportunities for students to see and understand how businesses are affected by new technology and how they need to adapt while, we hope, providing numerous avenues for you to explore such adaptation with your students.

In developing these scenarios, we endeavor to create business situations rich enough to realistically carry the discussions of information systems while at the same time simple enough that students with little business knowledge and even less business experience can understand. We also attempt to create scenarios that will be interesting to teach. This edition introduces the new ARES case and continues the Falcon Security case from the seventh edition.

FALCON SECURITY

The chapters in Parts 1 and 2 are introduced with dialogue from key players at Falcon Security, a privately owned company that provides surveillance and inspection services for companies using flying drones. We wanted to develop the case around an interesting business model that students would want to learn more about. Drones get a lot of attention in the press, but students may not know a lot about how they’re used in business. Drones are getting cheaper and easier to fly and have a lot more functionality than they did just a few years ago. It’s likely that students will see drones deployed widely during their careers.

Falcon Security is considering strengthening its competitive advantage by 3D printing its own drones. Buying fleets of drones is expensive, and they become outdated quickly. However, were the company to do so, it would be changing its fundamental business model, or at least adding to it. Making drones would require Falcon Security to hire new employees, develop new business processes, and potentially develop a new IS to support the custom-built drones. All of this is good fodder for Chapter 3 and for underlining the importance of the ways IS needs to support evolving business strategy.

Ultimately, Falcon Security determines that it does not want to become a drone manufacturer. It could print some drone parts, but not enough to make it cost effective. They’d still have to buy a lot of expensive component parts to assemble an airworthy drone, something they’re not sure they can do consistently. Falcon decides to focus on its core strength of providing integrated security services.

Students may object that, in studying Falcon Security, they devoted considerable time to an opportunity that ultimately didn’t make business sense and was rejected. But this outcome is at least as informative as a successful outcome. The example uses knowledge of processes as well as application of business intelligence to avoid making a serious blunder and wasting substantial money. Falcon Security didn’t have to open a factory and 3D-print a fleet of custom-built drones just to find out it would be a mistake. It could make a prototype, analyze the costs and benefits, and then avoid making the mistake in the first place. The very best way to solve a problem is not to have it!
ARES

The Augmented Reality Exercise System (ARES) is an embryonic entrepreneurial opportunity that uses digital reality devices (Microsoft HoloLens), data-gathering exercise equipment, and the cloud to share integrated data among users, health clubs, and employers. ARES allows users to virtually bike with friends, famous cyclists, or even “pacers” mimicking their previous performance.

ARES is based on a real-world prototype developed for the owner of a health club who wanted to connect the workout data of his club members to their workout data at home and to their employers, insurance companies, and healthcare professionals. The prototype was written in C#, and the code runs against an Azure database in the cloud. It used the Windows Phone emulator that is part of Visual Studio.

As reflected in the ARES case, the developers realized it was unlikely to succeed because Dr. Flores was too busy as a cardiac surgeon to make his startup a success. Therefore, he sold it to a successful businessman who changed the staff and the strategy and repurposed the software to take advantage of new digital reality hardware. All of this is described at the start of Chapter 7.

USE OF THE CATEGORICAL IMPERATIVE AND UTILITARIANISM IN ETHICS GUIDES

Since the introduction of the Ethics Guides into the first edition of this text, we believe there was a shift in students’ attitudes about ethics. Students seem, at least many of them, to be more cynical and callous about ethical issues.

As a result, in the fifth edition, we began to use Kant’s categorical imperative and Bentham and Mill’s utilitarianism to ask students, whose ethical standards are often immature, to adopt the categorical imperative and utilitarian perspectives rather than their own perspectives and, in some cases, in addition to their own perspectives. By doing so, the students are asked to “try on” those criteria, and we hope in the process they think more deeply about ethical principles than they do when we allow them simply to apply their personal biases.

The Ethics Guide in Chapter 1 introduces the categorical imperative, and the guide in Chapter 2 introduces utilitarianism. If you choose to use these perspectives, you will need to assign both of those guides.

MODULAR DESIGN

Not every MIS class is the same, and even though most MIS professors would agree on the basic content of this class, each professor has his or her own interests, expertise, and emphasis. Further, courses differ not only because of student and professor interests, but also because of the local employment environment, the grade level at which the class is taught, the background and educational maturity of students, and so on.

To support such specialization, the text is organized into short chapters and optional chapter extensions. Each of the 12 short chapters describes the minimum essentials of a topic. Additional material is then presented in 18 optional chapter extensions. Thus, for example, Chapter 9 addresses the basic ideas and purpose of business intelligence. That chapter is then supported by two chapter extensions: one on data mining and one on reporting and OLAP.

You can pick the extensions that relate to your class’s interests and needs, or you can use just the chapter itself and skip the extensions without loss of continuity. For a more specific description of how the book is organized, see the section titled “How Is the Content Organized?”

GUIDES

This book contains boxed essays called “guides” that amplify each chapter’s core material. These features have two purposes. First, the Career Guides are intended to give students a glimpse at real-world information systems jobs. Each career guide focuses on the relevant chapter material
and was written by an MIS graduate that works in that field. These guides help students think about the relevance of the chapter material to their future careers as businesspeople and, possibly, to encourage them to consider a career in MIS.

The second purpose of these guides is to encourage students to address the unique ethical issues that arise from using information systems. Use of the Ethics Guides will expose students to some of the fundamental principles relating to the combination of ethics, information systems, and business in general. All of the guides encourage students to grapple with some idea and its application to them either now or as future business professionals. Working with the guides should help students transfer knowledge from their MIS class to other classes and eventually to their business careers.

INTEGRATION OF EXCEL AND ACCESS

Most MIS courses today include some use of Microsoft Office. Usually, professors adopt a main MIS book and then select another book for Office instruction. The result is an expensive package for the student to buy and a schizophrenic break between the “principles” text and the “applications” text.

To eliminate these problems, this text includes four chapter extensions on Microsoft Excel and Access 2016. Chapter Extension 4 teaches the fundamentals of Excel. Chapter Extension 5 teaches database design, and Chapter Extension 6 shows how to apply the principles of database design using Microsoft Access. Finally, Chapter Extension 7 discusses the use of Excel and Access together. Data are passed back and forth between those products so that students can compare and contrast Excel and Access features and strengths. Also, students learn practical skills for managing real data.

Most students should be able to learn (or review) fundamental Excel and Access skills with no supplemental text. Students who need extra instruction can, of course, find it in one of the many excellent tutorials. But having that material in this text means that most students need not buy another book. Those exercises are consolidated into one list, starting on page 662.

HOW IS THE CONTENT ORGANIZED?

The text is organized into four parts. See the graphic outline on pages x-xi of the front matter for a visual presentation of the parts and chapters and of the relationship of the chapter extensions to the parts and chapters.

Part 1, “Why MIS?,” introduces MIS and explains why and how it is important for business students. The three chapters in Part 1 address basic MIS definitions and the five-component framework, show how information and information systems relate to business processes, and explain the role of IS in support of organizational strategy and competitive advantage. Chapter extensions for Part 1 concern collaboration techniques and collaboration IS.

Part 2, “Information Technology,” addresses fundamental IT concepts. The three chapters in Part 2 discuss hardware and software, database processing, and data communication. Chapter Extension 3 describes the development of Web and native mobile applications and describes an array of bring your own device (BYOD) policies. The next four chapter extensions teach the basics of Excel and Access, describe database design techniques, and show how to use Excel and Access together. Finally, Chapter Extension 8 discusses data communication technology that supports the cloud with particular focus on SOA and Web service standards.

Part 3 is titled “Using IS for Competitive Advantage.” The three chapters in this part consider organization and systems, social media, and business intelligence systems. Part 3 chapter extensions present information on systems for ERP and supply chain management. Chapter Extensions 12 through 14 discuss database marketing, reporting systems and OLAP, and artificial intelligence.

Part 4, “Information Systems Management,” concludes the text with three chapters that address information systems security, IS management including outsourcing, and systems...
development. Note that due to the increased importance of security, that chapter is the first chapter in this part. Part 4 chapter extensions include a detailed description of data breaches, discussions of international MIS, systems development project management, agile systems development with scrum, and business process management.

Again, the goal of the modular organization of this text is to allow you to pick and choose among those topics that best fit your needs. You will preserve continuity if you use each of the 12 chapters in sequence, but you need not use any of the chapter extensions if time is short.

INSTRUCTOR RESOURCES

At the Instructor Resource Center, www.pearsonhighered.com/irc, instructors can easily register to gain access to a variety of instructor resources available with this text in downloadable format. If assistance is needed, our dedicated technical support team is ready to help with the media supplements that accompany this text. Visit http://247.pearsoned.com for answers to frequently asked questions and toll-free user support phone numbers.

The following supplements are available with this text:

- Test Bank
- TestGen® Computerized Test Bank
- PowerPoint Presentation

ACKNOWLEDGMENTS

First, we wish to thank Earl McKinney, professor of information systems at Bowling Green University and author of Processes, Systems, and Information, for many hours of insightful conversation about the role of processes in this MIS course as well as for his deep insights into the theory of information. We also thank David Auer of Western Washington University for help with data communications technology and Jeffrey Proudfoot of Bentley University for his insights on information security.

Many thanks as well to Jeff Gains of San Jose State University for helpful feedback about prior editions of this text; Jeff’s comments have strongly influenced revisions for years. Also, a special thanks to Harry Reif at James Madison University for most insightful observations about ways to improve this text.

At Microsoft, we are grateful for the help of Randy Guthrie, who supports MIS professors in many ways, including facilitating use of DreamSpark as well as giving many presentations to students. Also, we thank Rob Howard for conversations and consulting about SharePoint and SharePoint Designer and Steve Fox for helpful conversations about both SharePoint and Microsoft Azure. Regarding our SharePoint program, a very special thanks to David Auer of Western Washington University and Laura Atkins of James Madison University, who serve as the community proctors for our SharePoint MIS community site, which enables dozens of professors and hundreds of students to learn how to use SharePoint. Our SharePoint solution is hosted by NSPI in Atlanta, Georgia. Additionally, we thank Don Nilson, a certified scrum master, for essential ideas and guidance on the new material on agile development and scrum.

Laura Town is the development editor on all of our MIS books, and we continue to be grateful for her support, knowledge, expertise, and great attitude through thick and thin! The textbook industry is undergoing dramatic changes at this time, and Laura’s knowledge, guidance, and wisdom on the textbook production process is most appreciated.

We would like to thank those who contributed to the development of our excellent Instructor Resources: Instructor’s Manual, Roberta M. Roth; PowerPoints, Steve Loy; and Test Bank, Katie Trotta/ANSR Source. We would also like to express our thanks to the following authors for creating a superb set of resources for our MyLab: John Hupp, Columbus State University; Timothy P. O’Keefe, University of North Dakota; Roberta M. Roth, University of Northern Iowa; J. K. Sinclair, Arkansas State University; and Melody White, University of North Texas.
Pearson Education is a great publishing company, chock-full of dedicated, talented, and creative people. We thank Samantha Lewis for taking over production management of a complex set of texts and doing it so efficiently and willingly. We also thank art director Jerilyn Bockorick and her team for redesigning this book so beautifully. Finally, we thank Katrina Ostler and Ann Pulido for managing the production of the book.

No textbook makes its way into the hands of students without the active involvement of a dedicated and professional sales force. We thank the Pearson sales team and especially Anne Fahlgren, the marketing manager for this text.

Thanks also goes to our former, and now happily retired, editor Bob Horan for his years of friendship, support, and wise counsel. Finally, like so many authors in college publishing, we owe tremendous thanks to our current editor, Samantha Lewis. Samantha continues to provide us with the skilled guidance necessary to make these texts a great success.

David Kroenke
Randy Boyle

THANKS TO OUR REVIEWERS

The following people deserve special recognition for their work on this seventh edition and previous editions of Experiencing MIS. Their feedback is truly appreciated.

Hans-Joachim Adler, The University of Texas at Dallas
Ihsan Alkadi, University of Louisiana at Lafayette
Michel Avital, Case Western Reserve University
Nick Ball, Brigham Young University
Hellene Bankowski, Philadelphia University
Hooshang M. Beheshti, Radford University
Ernst Bekkering, Northeastern State University
Meral Binbasioglu, Hofstra University
Carolyn Borne, Louisiana State University, Baton Rouge
Uptal Bose, University of Houston—Downtown
Charles Butler, Colorado State University
Teuta Cata, Northern Kentucky University
Joni M. Catanzaro, Louisiana State University, Baton Rouge
Joseph Cazier, Appalachian State University
Nettie M. Chaffee, Kent State University
Nancy Chase, Gonzaga University
Leida Chen, Creighton University
Robert Chi, California State University, Long Beach
Izic Chon, University of Washington
Anne Cohen, University of St. Thomas, Minneapolis
John Cole, Portland State University
Charles Cowell, Tyler Junior College
Martin B. Dumas, Baruch College—The City University of New York
Nellis I. Freeman, Jr., Notre Dame de Namur University
Al Fundaburk, Bloomsburg University
Jeffrey Gaines, San Jose State University
Russell Ginnings, East Tennessee State University
Bonnie C. Glassberg, Miami University
Sam Goh, The University of Tennessee at Chattanooga

Richard Grenci, John Carroll University
Kenneth Griggs, California Polytechnic State University, San Luis Obispo
Sandra Gustavson, Kent State University

ENDNOTES

ABOUT THE AUTHORS

David Kroenke has many years of teaching experience at Colorado State University, Seattle University, and the University of Washington. He has led dozens of seminars for college professors on the teaching of information systems and technology; in 1991, the International Association of Information Systems named him Computer Educator of the Year. In 2009, David was named Educator of the Year by the Association of Information Technology Professionals-Education Special Interest Group (AITP-EDSIG).

David worked for the U.S. Air Force and Boeing Computer Services. He was a principal in the startup of three companies, serving as the vice president of product marketing and development for the Microrim Corporation and as chief of database technologies for Wall Data, Inc. He is the father of the semantic object data model. David’s consulting clients have included IBM, Microsoft, and Computer Sciences Corporation, as well as numerous smaller companies. Recently, David has focused on using information systems for teaching collaboration and teamwork.

Randall J. Boyle received his Ph.D. in Management Information Systems from Florida State University in 2003. He also has a master’s degree in Public Administration and a B.S. in Finance. He has received university teaching awards at Weber State University, Longwood University, the University of Utah, and the University of Alabama in Huntsville. He has taught a wide variety of classes, including Introduction to MIS, Cyber Security, Networking & Servers, System Analysis and Design, Telecommunications, Advanced Cyber Security, Decision Support Systems, and Web Servers.

His research areas include deception detection in computer-mediated environments, secure information systems, the effects of IT on cognitive biases, the effects of IT on knowledge workers, and e-commerce. He has published in several academic journals and has authored additional textbooks, including Using MIS, 10th ed., Corporate Computer and Network Security, 4th ed., Applied Information Security, 2nd ed., and Applied Networking Labs, 2nd ed.
