This edition is dedicated to Chip Case, a wonderful colleague and friend. He was the inspiration for this textbook some 30 years ago, and he served as an inspiration to study economics for thousands of students.
Karl E. Case, who passed away in July, 2016, was a Professor of Economics Emeritus at Wellesley College where he taught for 34 years, serving several tours of duty as Department Chair. He was a Senior Fellow at the Joint Center for Housing Studies at Harvard University and a founding partner in the real estate research firm of Fiserv Case Shiller Weiss, which produces the S&P Case-Shiller Index of home prices. He served as a member of the Index Advisory Committee of Standard and Poor’s, and on the Academic Advisory Board of the Federal Reserve Bank of Boston.

Professor Case received his B.A. from Miami University in 1968, spent three years on active duty in the Army, and received his Ph.D. in Economics from Harvard University in 1976.

Professor Case’s research was in the areas of real estate, housing, and public finance. He authored or coauthored five books, including Principles of Economics, Economics and Tax Policy, and Property Taxation: The Need for Reform, and published numerous articles in professional journals, focused on real estate markets and prices.

Chip, as he was known to his many friends and colleagues, contributed to this textbook throughout its many editions. In his honor and with respect for his substantial contributions to the text and the discipline of economics, his co-authors plan to keep his name on the text for all future editions.

Ray C. Fair is Professor of Economics at Yale University. He is a member of the Cowles Foundation at Yale and a Fellow of the Econometric Society. He received a B.A. in Economics from Fresno State College in 1964 and a Ph.D. in Economics from MIT in 1968. He taught at Princeton University from 1968 to 1974. Professor Fair has taught introductory and intermediate macroeconomics at Yale since 1974. He has also taught graduate courses in macroeconomic theory and macroeconometrics.

Professor Fair’s research has primarily been in the areas of macroeconomics and econometrics, with particular emphasis on macroeconometric model building. He has also done work in the areas of finance, voting behavior, and aging in sports. His publications include Specification, Estimation, and Analysis of Macroeconometric Models (Harvard Press, 1984); Testing Macroeconometric Models (Harvard Press, 1994); Estimating How the Macroeconomy Works (Harvard Press, 2004), and Predicting Presidential Elections and Other Things (Stanford University Press, 2012).

Professor Fair’s U.S. and multicountry models are available for use on the Internet free of charge. The address is http://fairmodel.econ.yale.edu. Many teachers have found that having students work with the U.S. model on the Internet is a useful complement to an introductory macroeconomics course.

Sharon M. Oster is the Frederic Wolfe Professor of Economics and Management and former Dean of the Yale School of Management. Professor Oster joined Case and Fair as a coauthor in the ninth edition of this book. Professor Oster has a B.A. in Economics from Hofstra University and a Ph.D. in Economics from Harvard University.

Professor Oster’s research is in the area of industrial organization. She has worked on problems of diffusion of innovation in a number of different industries, on the effect of regulations on business, and on competitive strategy. She has published a number of articles in these areas and is the author of several books, including Modern Competitive Analysis and The Strategic Management of Nonprofits.

Prior to joining the School of Management at Yale, Professor Oster taught for a number of years in Yale's Department of Economics. In the department, Professor Oster taught introductory and intermediate microeconomics to undergraduates as well as several graduate courses in industrial organization. Since 1982, Professor Oster has taught primarily in the Management School, where she teaches the core microeconomics class for MBA students and a course in the area of competitive strategy. Professor Oster also consults widely for businesses and nonprofit organizations and has served on the boards of several publicly traded companies and nonprofit organizations.
# Brief Contents

## PART I  Introduction to Economics  
1. The Scope and Method of Economics  
2. The Economic Problem: Scarcity and Choice  
3. Demand, Supply, and Market Equilibrium  
4. Demand and Supply Applications  
5. Elasticity  

## PART II  The Market System  
6. Household Behavior and Consumer Choice  
7. The Production Process: The Behavior of Profit-Maximizing Firms  
8. Short-Run Costs and Output Decisions  
9. Long-Run Costs and Output Decisions  
10. Input Demand: The Labor and Land Markets  
11. Input Demand: The Capital Market and the Investment Decision  
12. General Equilibrium and the Efficiency of Perfect Competition  

## PART III  Market Imperfections and the Role of Government  
13. Monopoly and Antitrust Policy  
14. Oligopoly  

## PART IV  The World Economy  
15. Monopolistic Competition  
16. Externalities, Public Goods, and Common Resources  
17. Uncertainty and Asymmetric Information  
18. Income Distribution and Poverty  
19. Public Finance: The Economics of Taxation  

## PART V  Methodology  
20. International Trade, Comparative Advantage, and Protectionism  
21. Economic Growth in Developing Economies  
22. Critical Thinking about Research

PART I  Introduction to Economics  1

1  The Scope and Method of Economics  1

   Why Study Economics?  2
      To Learn a Way of Thinking  2
   ECONOMICS IN PRACTICE  Rainfall and Schooling in India  3
   ECONOMICS IN PRACTICE  Majoring in Economics Makes You Less Vulnerable to a Recession!  4
      To Understand Society  4
      To Be an Informed Citizen  5
   The Scope of Economics  5
      Microeconomics and Macroeconomics  5
   ECONOMICS IN PRACTICE  iPod and the World  6
      The Diverse Fields of Economics  7
   The Method of Economics  8
      Theories and Models  8
   ECONOMICS IN PRACTICE  Does Your Roommate Matter for Your Grades?  10
   Economic Policy  10
   An Invitation  12
   Economic Skills and Economics as a Career  12

   Summary  12  Review Terms and Concepts  13
   Problems  13  Appendix: How to Read and Understand Graphs  15

2  The Economic Problem: Scarcity and Choice  23

   Scarcity, Choice, and Opportunity Cost  24
      Scarcity and Choice in a One-Person Economy  24
      Scarcity and Choice in an Economy of Two or More  25
   ECONOMICS IN PRACTICE  Frozen Foods and Opportunity Costs  26
      The Production Possibility Frontier  29
      The Economic Problem  35
   ECONOMICS IN PRACTICE  Trade-Offs among the Rich and Poor  36
      Economic Systems and the Role of Government  36
      Command Economies  36
      Laissez-Faire Economies: The Free Market  37

   Mixed Systems, Markets, and Governments  38
   Looking Ahead  38
   Summary  38  Review Terms and Concepts  39  Problems  39

3  Demand, Supply, and Market Equilibrium  43

   Firms and Households: The Basic Decision-Making Units  44
   Input Markets and Output Markets: The Circular Flow  44
   Demand in Product/Output Markets  46
      Changes in Quantity Demanded versus Changes in Demand  46
      Price and Quantity Demanded: The Law of Demand  47
      Other Determinants of Household Demand  50
   ECONOMICS IN PRACTICE  Have You Bought This Textbook?  51
   ECONOMICS IN PRACTICE  On Sunny Days People Buy Convertibles!  52
      Shift of Demand versus Movement along a Demand Curve  53
      From Household Demand to Market Demand  54
   Supply in Product/Output Markets  56
      Price and Quantity Supplied: The Law of Supply  57
      Other Determinants of Supply  58
      Shift of Supply versus Movement along a Supply Curve  59
      From Individual Supply to Market Supply  60
   Market Equilibrium  61
      Excess Demand  61
      Excess Supply  63
      Market Equilibrium with Equations  64
      Changes in Equilibrium  64
   ECONOMICS IN PRACTICE  Quinoa  67
      Demand and Supply in Product Markets: A Review  67
   ECONOMICS IN PRACTICE  Why Do the Prices of Newspapers Rise?  68
      Looking Ahead: Markets and the Allocation of Resources  69

   Summary  69  Review Terms and Concepts  70  Problems  71
4 Demand and Supply Applications 74

The Price System: Rationing and Allocating Resources 75
  Price Rationing 75
  Constraints on the Market and Alternative Rationing Mechanisms 77

ECONOMICS IN PRACTICE  Why is My Hotel Room So Expensive? A Tale of Hurricane Sandy 79
  Prices and the Allocation of Resources 81
  Price Floor 81

Supply and Demand Analysis: Tariffs (Tax) 82

ECONOMICS IN PRACTICE  The Price Mechanism at Work for Shakespeare 83
  Supply and Demand and Market Efficiency 84
  Consumer Surplus 84
  Producer Surplus 85
  Competitive Markets Maximize the Sum of Producer and Consumer Surplus 86
  Potential Causes of Deadweight Loss From Under- and Overproduction 87

Looking Ahead 88

Summary 88  Review Terms and Concepts 88  Problems 89

5 Elasticity 92

Price Elasticity Of Demand 93
  Slope and Elasticity 93
  Types of Elasticity 94

Calculating Elasticities 95
  Calculating Percentage Changes 95
  Elasticity Is a Ratio of Percentages 96
  The Midpoint Formula 96
  Elasticity Changes along a Straight-Line Demand Curve 97
  Elasticity and Total Revenue 100

The Determinants of Demand Elasticity 101
  Availability of Substitutes 101
  The Importance of Being Unimportant 101
  Luxuries versus Necessities 101

ECONOMICS IN PRACTICE  Elasticities at a Delicatessen in the Short Run and Long Run 102
  The Time Dimension 102

Other Important Elasticities 103
  Income Elasticity of Demand 103
  Cross-Price Elasticity of Demand 103
  Elasticity of Supply 104

ECONOMICS IN PRACTICE  Elasticities of a Delicatessen in the Short Run and Long Run 102
  The Time Dimension 102

PART II The Market System 113

6 Household Behavior and Consumer Choice 116

Household Choice in Output Markets 117
  The Determinants of Household Demand 117
  The Budget Constraint 117
  The Equation of the Budget Constraint 120
  The Basis of Choice: Utility 121
  Diminishing Marginal Utility 121
  Allocating Income to Maximize Utility 122
  The Utility-Maximizing Rule 124

ECONOMICS IN PRACTICE  Price Salience 125
  Diminishing Marginal Utility and Downward-Sloping Demand 125

Income and Substitution Effects 126
  The Income Effect 126
  The Substitution Effect 127

Household Choice in Input Markets 128
  The Labor Supply Decision 128

ECONOMICS IN PRACTICE  Substitution and Market Baskets 129
  The Price of Leisure 129
  Income and Substitution Effects of a Wage Change 130

ECONOMICS IN PRACTICE  Job Flexibility for Uber Drivers 131
  Saving and Borrowing: Present versus Future Consumption 132

A Review: Households in Output and Input Markets 133

Summary 133  Review Terms and Concepts 134  Problems 134  Appendix: Indifference Curves 138

7 The Production Process: The Behavior of Profit-Maximizing Firms 145

The Behavior of Profit-Maximizing Firms 146
  Profits and Economic Costs 147
  Short-Run versus Long-Run Decisions 148

ECONOMICS IN PRACTICE  Tax Rates and Migration in Europe 105
  What Happens when We Raise Taxes: Using Elasticity 105
  Looking Ahead 107

Summary 107  Review Terms and Concepts 108  Problems 108

Preface

New to this Edition

Updates for this edition of *Principles of Microeconomics* include:

- It is our hope that students will come to see both how broad the tools of economics are and how exciting is much of the new research in the field. The 13th edition has continued the changes in the *Economics in Practice* boxes that we began several editions ago. In these boxes, we aim to bring economic thinking to the concerns of the typical student. In many cases, we do this by spotlighting recent research, much of it by young scholars. Here are some examples of the topics we cover in the new boxes:
  - Research on the role weather plays in reducing school achievement in rural India by changing the importance of child labor in agriculture (Chapter 1, “The Scope and Method of Economics”).
  - The strength of the economics major in helping students avoid unemployment in a recession, showing how the skills students learn in an economics class can benefit them regardless of the career path they choose (Chapter 1, “The Scope and Method of Economics”).
  - The E-Z pass and the role of price salience in determining a customer’s response to price changes (Chapter 6, “Household Behavior and Consumer Choice”). This is one of the several new behavioral economics boxes we have in the new edition.
  - How researchers can use data on adopted children to explore whether generationally-correlated investing patterns are learned behavior or have some genetic component reflecting risk preference (Chapter 11, “Input Demand: The Capital Market and the Investment Decision”).
  - Most coders are men. How much does this have to do with gender identity? We discuss an experiment in Peru by a nonprofit to see if more women can be encouraged to go into this lucrative field (Chapter 18, “Income Distribution and Poverty”).
  - Whether shareholders or workers benefit from the 2017 Trump tax package’s big reduction in the corporate income tax (Chapter 19, “Public Finance: The Economics of Taxation”).
- We have reworked some of the chapters to streamline them and to improve readability. In the discussions of supply and demand and the discussions of perfect and imperfect competition, we have added simple algebraic material to the graphical, numeric and verbal explanations to aid in clarity of understanding.
  - Chapter 11, “Input Demand: The Capital Market and the Investment Decision,” has been considerably reworked to include a more thorough discussion of finance, that should be especially interesting to students who anticipate a career in the financial sector.
  - Chapter 18, “Income Distribution and Poverty,” has also been substantially reworked to reflect the increased worldwide concern with issues of inequality and economic mobility.
- Many end-of-chapter problems have been revised.
- We have added Critical Thinking questions to each Economics in Practice box and each end-of-chapter section, to reinforce the underlying economic principles and to give students practical application of what they’ve learned.
The Principles of Microeconomics Program

Our goal in the 13th edition, as it was in the first edition, is to instill in students a fascination with both the functioning of the economy and the power and breadth of economics. The first line of every edition of our book has been “The study of economics should begin with a sense of wonder.” We hope that readers come away from our book with a basic understanding of how market economies function, an appreciation for the things they do well, and a sense of the things they do poorly. We also hope that readers begin to learn the art and science of economic thinking and begin to look at some policy, and, even personal decisions, in a different way. We have prepared this edition of the text and MyLab Economics with this in mind. To improve student results, we recommend pairing the text content with MyLab Economics, which is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and will help your students learn and retain key course concepts while developing skills that future employers are seeking in their candidates. From Digital Interactives to Real-time Data Analysis Exercises, MyLab Economics helps you teach your course, your way. Learn more at www.pearson.com/mylab/economics.

Solving Teaching and Learning Challenges

As authors and teachers, we understand the challenges of the principles of economics course. The foundational themes of Principles of Microeconomics, 13th edition, are to introduce the discipline of economics and to provide a basic understanding of how economies function. This requires a blend of economic theory, institutional material, and real-world applications. We have maintained a balance between these ingredients in every chapter. There is such volume of material for teachers to cover, and for students to understand. We address this learning challenge through: (1) A three-tiered approach of explaining key concepts through relevant stories, graphs and equations (2) Pedagogical features in the text and accompanying digital resources in MyLab Economics that illustrate and reinforce key concepts through real-world examples and applications that are relevant to students; (3) Graphs and animations; and (4) A wide variety of questions and problems.

Three-Tiered Explanations: Stories-Graphs-Equations

Professors who teach principles of economics are faced with a classroom of students with different abilities, backgrounds, and learning styles. For some students, analytical material is difficult no matter how it is presented; for others, graphs and equations seem to come naturally. The problem facing instructors and textbook authors alike is how to convey the core principles of the discipline to as many students as possible without selling the better students short. Our approach to this problem is to present most core concepts in the following three ways.

First, we present each concept in the context of a simple intuitive story or example in words often followed by a table. Second, we use a graph in most cases to illustrate the story or example. And finally, in many cases where appropriate, we use an equation to present the concept with a mathematical formula. In this edition, we have strengthened this element without greatly increasing mathematical levels needed for the class. For students who would benefit from a math review, MyLab Economics offers math skills review Chapter R, accessible from the assignment manager and containing over 150 graphing, algebra, and calculus exercises for homework, quiz, and test use.
Economics in Practice

We know that students are best motivated when they see the relevance of what they’re learning to the world they live in. We’ve created *Economics in Practice* with a focus on recent research or events that support a key concept in the chapter and help students think about the broad and exciting applications of economics to their lives and the world around them. Each box contains a Critical Thinking question or two to further connect the material they are learning with their lives.

**ECONOMICS IN PRACTICE**

Have You Bought This Textbook?

As all of you know full well, college textbooks are expensive. At first, it may seem as though there are few substitutes available for the cash-strapped undergraduate. After all, if your professor assigns Smith’s *Principles of Biology* to you, you cannot go out and see if Jones’ *Principles of Chemistry* is perhaps cheaper and buy it instead. As it turns out, as some recent work by Judy Chevalier and Austan Goolsbee discovered, even when instructors require particular texts, when prices are high students have found substitutes. Even in the textbook market student demand does slope down!

Chevalier and Goolsbee collected data on textbooks from more than 1600 colleges for the years 1997–2001 to do their research. For that period, the lion’s share of both new and used college textbooks was sold in college bookstores. Next, they looked at class enrollments for each college in the large majors: economics, biology, and psychology. In each of those classes they were able to learn which textbook had been assigned. At first, one might think that the total number of textbooks, used plus new, should match the class enrollment. After all, the text is required! In fact, what they found was the higher the textbook price, the more text sales fell below class enrollments.

So what substitutes did students find for the required text? While the paper has no hard evidence on this, students themselves gave them lots of suggestions. Many decide to share books with roommates. Others use the library more. These solutions are not perfect, but when the price is high enough, students find it worth their while to walk to the library!

To further promote the relevance of economics, *Current News Exercises* provide a turn-key way to assign gradable news-based exercises in MyLab Economics. Each week, Pearson scours the news, finds a current microeconomics and macroeconomics news article or video, creates exercises around these news articles, and then automatically adds them to MyLab Economics. Assigning and grading current news-based exercises that deal with the latest micro and macro events and policy issues has never been more convenient.
Concept Checks

Giving students the opportunity to practice what they are learning along the way is critical to their success in the principles of economics course. New for this edition, each section and subsection of each learning objective, and select key figures, is reinforced with a Concept Check in the eText of MyLab Economics that contains one or two multiple choice, true/false, or fill-in questions. These checks act as “speed bumps” that encourage students to stop and check their understanding of fundamental terms and concepts before moving on to the next section. The goal is to help students assess their progress on a section-by-section basis, so they can be better prepared for homework, quizzes, and exams.

Graphing Animations

Graphs are the backbone of introductory economics, but many students struggle to understand and work with them. The Chapter 1 Appendix, “How to Read and Understand Graphs,” shows readers how to interpret the over 200 graphs featured in this book. To make interpreting graphs easier for students, we use red curves to illustrate the behavior of firms, blue curves to show the behavior of households, and a different shade of red and blue to signify a shift in a curve.

The figures in the book are also an integral part of our three-tiered approach to explain concepts in words, equations and graphs. They promote learning as students read an example or story, followed by a mathematical representation, and then see a graphical representation.

Select numbered figures in the text have a supporting animated version in MyLab Economics. The goal is to help students understand shifts in curves, movements along curves, and changes in equilibrium values by bringing graphs to life. Having an animated version of a graph helps students who have difficulty interpreting the static version in the printed text. Graded practice exercises are included with the animations to give students practice reading and interpreting graphs.
Real-Time Data

Currency is imperative in economics, particularly macroeconomics. We achieve this with real-time data analysis figures and exercises. Many of the key figures in the text have been updated in the MyLab with real-time data from the Federal Reserve’s Economic Data (FRED™) — a comprehensive, up-to-date data set maintained by the Federal Reserve Bank of St. Louis. These animated graphs help students understand shifts in curves, movements along curves, and changes in equilibrium values. Easy to assign and automatically graded, Real-Time Data Analysis exercises use up-to-the-minute, real-time macroeconomic data. These exercises communicate directly with the Federal Reserve Bank of St. Louis’s FRED™ site, so every time FRED posts new data, students see it.

Critical Thinking Questions

Throughout the course, and after graduation, students need to demonstrate critical thinking skills in their work and careers. To help develop these essential skills, we’ve added a new section of Critical Thinking questions to give students practice in higher-order thinking. Available in MyLab Economics, each end-of-chapter problem set ends with a Critical Thinking Questions section. These questions ask students to think more deeply about the concepts they’ve learned in the chapter when answering them. These assignable essay questions can be used on homework, tests, or quizzes. They require manual scoring; however, each essay question includes a sample correct answer to make grading easy.

C R I T I C A L  T H I N K I N G  Q U E S T I O N S

QUESTION 1 When an unemployed individual gives up looking for work and leaves the labor force, she is no longer considered unemployed. What happens to the unemployment rate as a result? Does this mean that the unemployment rate understates or overstates the problem of joblessness?

QUESTION 2 According to the Efficiency Wage Theory, employers occasionally pay workers more than the equilibrium wage in the market in order to increase productivity. Explain how this would lead to reduced turnover.

Problems and Solutions

Each chapter and appendix ends with a problem set that asks students to think about and apply what they’ve learned in the chapter. These problems are not simple memorization questions. Rather, they ask students to perform graphical analysis or to apply economics to a
real-world situation or policy decision. More challenging problems are indicated by an asterisk. Many problems have been updated. These problems can be assigned and auto-graded in MyLab Economics and are available with optional just-in-time learning aids to help students when they need it the most. Students can also practice these problems in the Study Plan. The Study Plan gives students personalized recommendations, practice opportunities, and learning aids to help them stay on track.

**Developing Employability Skills**

For students to succeed in a rapidly changing job market, they should be aware of their career options and how to go about developing the many skills they will need to do so. We focus on developing these skills in a variety of ways.

In the text, the *Economics in Practice* boxes help students think deeply about concepts and make connections between what they learn in class and how it can apply to their job in the real world. Chapter 1’s *Economics in Practice* box explores how majoring in economics can help make students less vulnerable to recession. Chapter 11’s *Economics in Practice* boxes highlight investment banking, the stock market, and investing strategies, topics of particular interest and relevance to students studying economics and finance.

In MyLab Economics, the *Critical Thinking Questions* and *Current News* exercises encourage application of skills that will contribute toward success in this course and in the future, regardless of each students’ career path.

**Table of Contents Overview**

**Microeconomic Structure**

The organization of the microeconomic chapters continues to reflect our belief that the best way to understand how market economies operate—and the best way to understand basic economic theory—is to work through the perfectly competitive model first, including discussions of output markets (goods and services) and input markets (land, labor, and capital), and the connections between them before turning to noncompetitive market structures such as monopoly and oligopoly. When students understand how a simple, perfectly competitive system works, they can start thinking about how the pieces of the economy “fit together.” We think this is a better approach to teaching economics than some of the more traditional approaches, which encourage students to think of economics as a series of disconnected alternative market models. We also make extensive use of concrete examples, designed to help students see the power of the simple economic model. A mastery of this material is invaluable to students interested in careers in business and the public sector. Our core interest is in helping students to think about the world using economics.

Learning perfect competition first also enables students to see the power of the market system. It is impossible for students to discuss the efficiency of markets as well as the problems that arise from markets until they have seen how a simple, perfectly competitive market system produces and distributes goods and services. This is our purpose in Chapters 6 through 11.

Chapter 12, “General Equilibrium and the Efficiency of Perfect Competition,” is a pivotal chapter that links simple, perfectly competitive markets with a discussion of market imperfections and the role of government. Chapters 13 through 15 cover three noncompetitive market structures—monopoly, monopolistic competition, and oligopoly. Chapter 16 covers externalities, public goods, and social choice. Chapter 17 covers uncertainty and asymmetric information. Chapters 18 and 19 cover income distribution as well as taxation and government finance. Figure II.2 from page 110 gives you an overview of our structure.
Instructor Teaching Resources

The instructor supplements are designed to make teaching and testing flexible and easy and are available for Micro, Macro, and Economics volumes.

This program comes with the following teaching resources:

<table>
<thead>
<tr>
<th>Supplements available to instructors at <a href="http://www.pearsonhighered.com/case">www.pearsonhighered.com/case</a></th>
<th>Features of the Supplement</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Instructor’s Manual</strong></td>
<td>• Detailed Chapter Outlines include key terminology, teaching notes, and lecture suggestions.</td>
</tr>
<tr>
<td>authored by Tony Lima of California State University, East Bay</td>
<td>• Topics for Class Discussion provide topics and real-world situations that help ensure that economic concepts resonate with students.</td>
</tr>
<tr>
<td></td>
<td>• Unique Economics in Practice features that are not in the main text provide extra real-world examples to present and discuss in class.</td>
</tr>
<tr>
<td></td>
<td>• Teaching Tips provide tips for alternative ways to cover the material and brief reminders on additional help to provide students. These tips include suggestions for exercises and experiments to complete in class.</td>
</tr>
<tr>
<td></td>
<td>• Extended Applications include exercises, activities, and experiments to help make economics relevant to students.</td>
</tr>
<tr>
<td></td>
<td>• Solutions are provided for all problems in the book.</td>
</tr>
<tr>
<td><strong>Test Bank</strong></td>
<td>• Multiple-choice, true/false, short-answer, and graphing questions with these annotations:</td>
</tr>
<tr>
<td>authored by Randy Methenitis of Richland College and Richard Gosselin of Houston Community College</td>
<td>• Difficulty level (1 for straight recall, 2 for some analysis, 3 for complex analysis)</td>
</tr>
<tr>
<td></td>
<td>• Type (Multiple-choice, true/false, short-answer, essay)</td>
</tr>
<tr>
<td></td>
<td>• Topic (The term or concept the question supports)</td>
</tr>
<tr>
<td></td>
<td>• Learning outcome</td>
</tr>
<tr>
<td></td>
<td>• AACSB learning standard (Written and Oral Communication; Ethical Understanding and Reasoning; Analytical Thinking; Information Technology; Interpersonal Relations and Teamwork; Diverse and Multicultural Work; Reflective Thinking; Application of Knowledge)</td>
</tr>
<tr>
<td><strong>Computerized TestGen</strong></td>
<td>TestGen allows instructors to:</td>
</tr>
<tr>
<td></td>
<td>• Customize, save, and generate classroom tests</td>
</tr>
<tr>
<td></td>
<td>• Edit, add, or delete questions from the Test Item Files</td>
</tr>
<tr>
<td></td>
<td>• Analyze test results</td>
</tr>
<tr>
<td></td>
<td>• Organize a database of tests and student results.</td>
</tr>
<tr>
<td><strong>PowerPoints</strong></td>
<td>• Slides include all the graphs, tables, and equations in the textbook.</td>
</tr>
<tr>
<td>authored by Jim Lee of Dickinson State University</td>
<td>• PowerPoints meet accessibility standards for students with disabilities. Features include, but not limited to:</td>
</tr>
<tr>
<td></td>
<td>• Keyboard and Screen Reader access</td>
</tr>
<tr>
<td></td>
<td>• Alternative text for images</td>
</tr>
<tr>
<td></td>
<td>• High color contrast between background and foreground colors</td>

Acknowledgments

We are grateful to the many people who helped us prepare the 13th edition. We thank David Alexander, our Portfolio Manager, and Carolyn Philips, our Content Producer, for their help and enthusiasm.
Jennifer Gavigan, project manager at Integra Software Services, Inc., kept us on schedule and ensured that the production process of the book went smoothly. We want to give special thanks to Patsy Balin, Murielle Dawdy, and Tracy Waldman for their research assistance.

We also owe a debt of gratitude to those who reviewed and checked the 13th edition for accuracy. They provided us with valuable insight as we prepared this edition and its supplement package.
