The Study Plan gives students personalized recommendations, practice opportunities, and learning aids to help them stay on track.

Video Exercises are available for select chapter topics to help engage students and hold them accountable for their learning.

“The simulations because they require thought process, the activity is fun and gets me engaged into the process and has real scenarios.”
— Business Communication Student, Paul Luu, San Bernardino Valley College

Dynamic Study Modules use the latest developments in cognitive science and help students study chapter topics by adapting to their performance in real time.

91% Study Plan 93% Dynamic Study Modules 92%

% of students who found learning aids helpful

Pearson eText enhances student learning with engaging and interactive lecture and example videos that bring learning to life.

The Gradebook offers an easy way for you and your students to see their performance in your course.

85% of students would tell their instructor to keep using MyLab Business Communication

Preface

New to This Edition

MORE VALUABLE THAN EVER WITH NEW STUDENT-FOCUSED FEATURES

- **Build Your Career** activities help students create their employment-communication packages throughout the course, so they’re ready to apply for jobs by the end of the course.
- **Apply Your Skills Now** highlight boxes help students apply their newly developing communication skills in other classes and in their personal lives.
- **Five-Minute Guides** serve as handy reminders of the steps needed to accomplish a variety of fundamental communication tasks, from resolving workplace conflict to writing business email to planning reports and presentations.

DOUBLE THE COVERAGE OF INTERPERSONAL COMMUNICATION

*Excellence in Business Communication* now has two chapters devoted to these important topics: listening, nonverbal communication, conversational skills, conflict resolution, negotiation, teamwork, collaborative communication, meeting skills, and business etiquette. (To keep the text at 16 chapters and a similar page count as the previous edition, the three chapters on report writing have been streamlined to two chapters.)

THE ONLY TEXT THAT COVERS INTELLIGENT COMMUNICATION TECHNOLOGY

The digital transformation sweeping through business is creating a host of new communication tools and techniques that students will encounter during their job searches and in the workplace. A new four-page visual feature, “Empowering Communicators with Intelligent Communication Technology,” shows 15 applications of artificial intelligence and smart technology. New highlight boxes take a close look at innovations ranging from augmented writing tools to résumé bots.

EXTENSIVE CONTENT ENHANCEMENTS

All new *On the Job* vignette/simulation pairs. These chapter-opening vignettes and end-of-chapter simulations show students how professionals apply the same skills they are reading about in the chapter. All 16 are new in this edition.

Nearly **70 new figures**. The Thirteenth Edition has 71 annotated model documents, 31 examples of mobile communication in business communication, 16 examples of social media, and 15 examples of intelligent communication technology.

Revised annotations in model document before/after pairs. These revised notes make it easier for students to see the specific changes made to transform ineffective messages into effective ones.

Nearly **300 new questions and student activities**. Every chapter has fresh project ideas and evaluation questions.

Streamlined coverage of report writing and production. To maintain the 16-chapter structure after the addition of a second chapter on interpersonal communication, the separate chapters on writing and completing reports have been merged into one chapter.
Solving Teaching and Learning Challenges

Communication is the most valuable skill that graduates can bring into the workforce, but it is one of the most challenging to teach. *Excellence in Business Communication* blends the timeless fundamentals of communication with contemporary media skills and contemporary business practices. To help students succeed from their first day on the job, *Excellence in Business Communication* presents the full range of on-the-job skills that today’s communicators need, from writing conventional printed reports to using the latest digital, social, mobile, and visual media.

Each chapter opens with a brief vignette that describes a challenge or opportunity faced by a business professional, emphasizing concepts and valuable skills that students will explore in the chapter.

Annotated model documents are perhaps the most important feature of a business communication text, and *Excellence in Business Communication* is packed with a balance of carefully chosen examples from real companies and original material created to illustrate specific concepts.
To improve student results, we recommend pairing this text with MyLab Business Communication, which is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and will help your students learn and retain key course concepts while developing skills that future employers are seeking in their candidates.

**Mini Sims**—Real-world simulations that put students in professional roles and give them the opportunity to apply course concepts and develop decision-making skills through real-world business challenges.

These **branching** Mini Sims strengthen a student’s ability to think critically, help students understand the impact of their decisions, engage students in active learning, and provide students with immediate feedback on their decisions.

Each decision point remediates to the Learning Objective in the eText.

**Chapter Warm-Ups**

Assessment helps you hold your students accountable for **READING** and demonstrating their knowledge of key concepts in each chapter before coming to class.

**Chapter Quiz**

Every chapter has quizzes written by our authors so you can assess your students’ understanding of chapter learning objectives.
COMPOSITIONAL MODES FOR DIGITAL MEDIA

As you practice using digital media in this course, focus on the principles of social media communication and the fundamentals of planning, writing, and completing messages, rather than on the specific details of any one medium or system. Fortunately, the basic communication skills required usually transfer from one system to another. You can succeed with written communication in virtually all digital media by using one of nine compositional modes:

- **Conversations.** Although they take place via writing, some forms of communication function more like real-time conversations than the still documents. Much of Chapter 2’s advice on conversations apply to e-mail and the section on business messaging (see page 213) explores this ever-expanding communication format.
- **Comments and critiques.** One of the most powerful aspects of social media is the opportunity for interested parties to express opinions and provide feedback or leaving comments on a blog post or reviewing products on an e-commerce site. Sharing helpful tips and insightful commentary is also a great way to build awareness of your brand. To be an effective commenter, focus on short, concise comments that are relevant to the discussion.
- **Orientations.** The ability to help people find their way through an unfamiliar situation, message, or document is critical in the digital world. People can quickly lose interest if they don’t understand where they are or how to navigate. The storytelling techniques covered in Chapter 5 (see page 145) can be applied to any content you create. For example, you can use a “you” attitude, politeness, and rhetorical questions to keep your audience interested. Remember to include clear, concise instructions that guide your audience to the next step.
- **Summaries.** At the beginning of an article or webpage, a summary functions as a brief overview of the material, giving readers all the key points while skipping over details (see Example 8.1). At the end of an article or webpage, a summary functions as a review, reminding readers of the key points they’ve just read.
- **General plans.** Instead of a single, detailed plan, you might offer a broad overview of the main ideas, or focus on the general plan rather than the specific details of each step. For example, you could explain the three steps of the planning process (analyzing the situation, writing, and completing the message) rather than the specific details of each step.
- **Proofread carefully—it could save you hours of headaches and damage control.** Always proofread your work before submitting it. Look for spelling and grammatical errors, and make sure your message is clear and concise. Proofreading is especially important when you’re working with digital media, where it’s easy to make mistakes and have them spread instantly.
- **Revise to make the message clear and concise.** Make sure your message is easy to understand and that you communicate your main points effectively. Avoid using jargon or technical terms that might be unfamiliar to your audience.
- **Use cc to include secondary recipients.** If you’re sending an email to multiple people, make sure to include everyone who needs to know about the message. Use the cc function to include secondary recipients.
- **Use a simple, clean layout with an easily readable font.** Keep your text easy to read by using a simple, clean layout and using a font that’s easy to read. Avoid using too many colors or fonts, and make sure your text is easy to scan.
- **Include visual aids to help communicate your message.** Use images, charts, and other visual aids to help illustrate your points and make your message more engaging. Make sure your visual aids are clear and easy to understand.

Original Coverage

Going beyond covering the tried-and-true, Bové and Thill make unique contributions to the pedagogy and practice of business communication, such as the nine compositional modes required to succeed with digital and social media.

Reducing Stress and Uncertainty for Students

Students sometimes flounder when faced with unfamiliar or difficult writing challenges because they don’t know how to move a project forward. By following the proven three-step process described in *Excellence in Business Communication*, they never have to feel lost or waste time figuring out what to do next.
No other textbook comes close to offering the valuable resources the authors provide students and instructors—many of which are available exclusively to Bovée and Thill adopters:

- The unique Real-Time Updates system extends the textbook with thousands of online media items that complement the text’s coverage with fresh examples and valuable insights
- Sponsored instructor communities on LinkedIn and Facebook with nearly 2,000 members
- Tips and techniques in Bovée and Thill’s Business Communication Blog and Twitter feed
- The Bovée & Thill channel on YouTube
- Business Communication Headline News
- Videos and PowerPoint presentations on SlideShare
- Hundreds of infographics, videos, articles, podcasts, and PowerPoints in the Business Communication Pictorial Gallery on Pinterest
- The Ultimate Guide to Resources for Teaching Business Communication
- Nine curated magazines for business communication on Scoop.it

Links to all these services and resources can be found at blog.businesscommunicationnetwork.com/resources.
Developing Employability Skills

In addition to helping students develop a full range of communication skills, Excellence in Business Communication will enhance a wide range of other skills that experts say are vital for success in the 21st-century workplace:

- **Critical thinking.** In many assignments and activities, students need to define and solve problems and make decisions or form judgments.
- **Collaboration.** Team-skills assignments provide multiple opportunities to work with classmates on reports, presentations, and other projects.
- **Knowledge application and analysis.** From the basic communication process to strategies for specific message types, students will learn a variety of concepts and apply that knowledge to a wide range of challenges.
- **Business ethics and social responsibility.** Ethical choices are stressed from the beginning of the book, and multiple projects encourage students to be mindful of the ethical implications that they could encounter in similar projects on the job.
- **Information technology skills.** Projects and activities in every chapter help students build skills with technology, including document preparation tools, online communication services, presentation software, and messaging systems.
- **Data literacy.** Report projects in particular present opportunities to fine-tune data literacy skills, including the ability to access, assess, interpret, manipulate, summarize, and communicate data.

Hundreds of realistic exercises, activities, and cases offer an array of opportunities for students to practice vital skills and put new-found knowledge to immediate use.

These resources are logically sorted by learning category, from conceptual recall to situational analysis to skill development.

To help instructors zero in on specific learning needs, activities are tagged in multiple ways, from media usage to team skills.

---

**Practice Your Skills**

**Exercises**

Each activity is labeled according to the primary skill or skills you will need to use. To review relevant chapter content, you can refer to the indicated Learning Objective. In some instances, supporting information will be found in another chapter, as indicated.

2-6. Interpersonal Communication: Listening Actively [LO-1]

For the next several days, take notes on your listening performance during at least a half-dozen situations in class, during social activities, and at work, if applicable. Referring to the traits of effective listeners in Table 2.4, rate yourself using always, frequently, occasionally, or never on these positive listening habits. In a report no longer than one page, summarize your analysis and identify specific areas in which you can improve your listening skills.

Select a business letter and envelope you have received at work or home. Analyze their appearance. What nonverbal messages do they send? Are these messages consistent with the content of the letter? If not, what could the sender have done to make the nonverbal communication consistent with the verbal communication? Summarize your findings in a post on your class blog or in an email message to your instructor.

---

**Cases**

For all cases, feel free to use your creativity to make up any details you need in order to craft effective messages.

**SOCIAL NETWORKING SKILLS**

Many companies now have voice of the customer (VOC) programs to collect and analyze commentary and feedback from customers. The most comprehensive of these programs automatically gather data from social media, customer call records, technical support emails, online product reviews, and more. To extract insights from these large collections of text, marketers can use an intelligent communication technology called text analytics.

Your task: Review the text analytics information on the Clarabridge website at [www.clarabridge.com](http://www.clarabridge.com). The company refers to its technology as CX Analytics, for customer experience analytics. Write a 100–to 150-word summary of this technology that Clarabridge could use as a post on its Facebook page to explain the capability to potential customers.

**SOCIAL NETWORKING SKILLS**

8-31. Media Skills: Social Networking: Online Etiquette [LO-2], Chapter 3

Employees who take pride in their work are a practically priceless resource for any business. However, pride can sometimes manifest itself in negative ways when employees come under criticism, and public criticism is a fact of life in social media. Imagine that your company has recently experienced a rash of product quality problems, and these problems have generated some unpleasant and occasionally unfair criticism on a variety of social media sites. Someone even set up a Facebook page specifically to give customers a place to vent one evening and discovered that two engineers in your company’s product design lab have been responding to complaints on their own. They identified themselves as company employees and defended their product design, blaming the company’s production department and even criticizing several customers for lacking the skills needed to use such a sophisticated product. Within a matter of minutes, you see their harsh comments being reweeted and reposted on multiple sites, only fueling the fire of negative feedback against your firm. Needless to say, you are horrified.

Your task: You manage to reach the engineers by private message and tell them to stop posting messages, but you realize you have a serious training issue on your hands. Write a post for the internal company blog that advises employees on how to respond appropriately when they are representing the company online. Use your imagination to make up any details you need.

**NETWORKING SKILLS / TEAM SKILLS**

Social media can be a great way to, well, socialize during your college years, but employers are increasingly checking up on the online activities of potential hires to avoid bringing in employees who may reflect poorly on the company.

Your task: Team up with another student and review each other’s public presence on Facebook, Twitter, Flickr, blogs, and any other website that an employer might check during the interview and recruiting process. Identify any photos, videos, messages, or other material that could raise a red flag when an employer is evaluating a job candidate. Write your teammate an email message that lists any risky material.
Instructor Teaching Resources

This program comes with the following teaching resources.

About the Authors

Courtland L. Bovée and John V. Thill have been leading textbook authors for more than two decades, introducing millions of students to the fields of business and business communication. Their award-winning texts are distinguished by proven pedagogical features, extensive selections of contemporary case studies, hundreds of real-life examples, engaging writing, thorough research, and the unique integration of print and digital resources. Each new edition reflects the authors’ commitment to continuous refinement and improvement, particularly in terms of modeling the latest practices in business and the use of technology.

Professor Bovée has 22 years of teaching experience at Grossmont College in San Diego, where he has received teaching honors and was accorded that institution’s C. Allen Paul Distinguished Chair. Mr. Thill is a prominent communications consultant who has worked with organizations ranging from Fortune 500 multinationals to entrepreneurial start-ups. He formerly held positions with Pacific Bell and Texaco.

Courtland Bovée and John Thill were recently awarded proclamations from the Governor of Massachusetts for their lifelong contributions to education and for their commitment to the summer youth baseball program that is sponsored by the Boston Red Sox.

Acknowledgments

The Thirteenth Edition of Excellence in Business Communication reflects the professional experience of a large team of contributors and advisors. We express our thanks to the many individuals whose valuable suggestions and constructive comments influenced the success of this book.

MYLAB CONTRIBUTORS

Storm Russo, Patricia Buhler, Maureen Steddin, Carol Heeter, Susan Schanne, Chris Parent (accuracy reviewer), and Kerri Tomasso (copy editor).

PERSONAL ACKNOWLEDGMENTS

We wish to extend a heartfelt thanks to our many friends, acquaintances, and business associates who provided materials or agreed to be interviewed so that we could bring the real world into the classroom.

A very special acknowledgment goes to George Dovel, whose superb writing skills, distinguished background, and wealth of business experience assured this project of clarity and completeness. Also, recognition and thanks to Jackie Estrada for her outstanding skills and excellent attention to details. Her creation of the “Peak Performance Grammar and Mechanics” material is especially noteworthy.

We also feel it is important to acknowledge and thank the Association for Business Communication, an organization whose meetings and publications provide a valuable forum for the exchange of ideas and for professional growth.

In addition, we would like to thank Susan Schanne and Lauren De George for their assistance in preparing supplements for this new edition.

We want to extend our warmest appreciation to the devoted professionals at Pearson Higher Education for their commitment to producing high-value, student-focused texts, including Donna Battista, Vice President, Business Publishing; Stephanie Wall, Director of Portfolio Management; Melissa Feimer, Managing Producer, Business; Yasmita Hota, Content Producer; Ashley Santora, Director of Production, Business; Becky Brown, Product Marketer; and Nicole Price, Field Marketing Manager. We are also grateful to Nicole Suddeth and Liz Kincaid of SPI Global, Angela Urquhart and Andrea Archer of Thistle Hill Publishing, and Melissa Pellerano.

John V. Thill
Courtland L. Bovée
Dedication

This book is dedicated to the many thousands of instructors and students who use Bovée and Thill texts to develop career-enhancing skills in business communication. We appreciate the opportunity to play a role in your education, and we wish you the very best with your careers.

Courtland L. Bovée
BUILDING A SUCCESSFUL CAREER WITH YOUR COMMUNICATION SKILLS

One Course—Three Powerful Benefits

You will invest considerable time and energy in this course, so it’s fair to ask what you will get in return. The simple answer: a lot. If you practice the techniques you’ll discover here and use this opportunity to develop those techniques with your instructor’s guidance, we’re confident this course will help you in three important ways:

1. It will help you succeed in college.
2. It will help you conduct a more successful job search.
3. It will help you succeed in your first job so you can build a thriving career.

The following sections expand on this promise and offer valuable career-planning advice. Table 1 on the next page highlights the specific features of this book that can help you at every stage.

Prologue

HOW THIS COURSE WILL HELP YOU

Take advantage of this opportunity to develop the single most important skill you’ll need for a rewarding career: the ability to communicate. This textbook is designed to help you in three valuable ways.

1. SUCCEED IN COLLEGE
   Many of the skills you will learn in this course—writing, giving presentations, working in teams, resolving conflict, and more—can be applied in just about every course you take from now until graduation.

2. FIND THE RIGHT JOB
   The entire job search process is really an extended exercise in communication, and the process gives you the chance to use your communication skills to stand apart from the competition.

3. LAUNCH YOUR CAREER
   The bulk of this course is devoted to the communication and media skills you will need to use as soon as you enter (or reenter) the workforce. Succeed in your first job, and you’ll be on your way to a rewarding career!

Stage 1: Succeeding in College

The first step in your career starts right now, with getting your degree and getting the most from all the courses you take between now and graduation. The communication skills you learn in this class can help you in virtually every other course. From brief homework assignments to complicated team projects to interactions with your professors, you will be able to communicate more effectively.

In addition to improving your communication effectiveness, this course will also improve your efficiency. Follow the writing process outlined in this book, and you can avoid the time-wasting uncertainty, dead ends, and rework that can make writing projects drag on forever.

Keep an eye out for the special highlight boxes titled “Apply Your Skills Now,” which offer tips on using your new skills in all your college courses. Read these boxes and think about the situations in which you can apply the advice. If you need to have a difficult conversation with an instructor or resolve conflict in a project team, for example, these boxes can help. Many of these techniques can help you outside of the school environment, too, whenever you face communication challenges in any of your interpersonal relationships.

QUICK TIPS TO SUCCEED IN THIS COURSE

Although this course explores a wide range of message types and appears to cover quite a lot of territory, the underlying structure of the course is rather simple. You’ll learn a few basic concepts, identify the key skills to use and procedures to follow—and then practice, practice, practice. Whether you’re writing a blog post in response to one of the real-company cases or drafting your own résumé, you’ll be practicing the same fundamental skills in a variety of scenarios. With feedback and reinforcement from your instructor and your classmates, your confidence will grow and the work will become easier and more enjoyable.

Some of the assignments will involve business topics that may be new to you or somewhat less than exciting, but view them all as opportunities to hone your craft. Visualize yourself in each scenario and imagine that you are trying to convince a skeptical boss, calm an angry customer, or accomplish whatever task is assigned.

As you read each chapter, take time to study the examples and model documents (see Figure 1). This book offers dozens of realistic examples of business messages, many with notes along the sides that explain strong and weak points. Some are messages from real companies; others were created to show specific points about writing. Study these documents and any other examples your instructor provides. Learn what works and what doesn’t, and then apply these lessons to your own writing.
Along the way, learn from the feedback you get from your instructor and from other students. Don’t take the criticism personally; your instructor and your classmates are commenting about the work, not about you. Always view feedback as an opportunity to improve.

QUICK TIPS FOR WRITING ASSIGNMENTS IN ANY COURSE

For assignments in this or any other course, particularly major projects such as reports and presentations, follow these suggestions to produce better results with less effort:

- **Don’t panic!** If the thought of writing a report or giving a speech sends a chill up your spine, you’re not alone. Everybody feels that way when first learning business communication skills, and even experienced professionals can feel nervous about big projects. Keep three points in mind. First, every project can be broken down into a series of small, manageable tasks. Don’t let a big project overwhelm you; it’s nothing more than a bunch of smaller tasks. Second, remind yourself that you have the skills you need. As you move through the course, the assignments are carefully designed to match the skills you’ve developed up to that point. Third, if you feel panic creeping up on you, take a break and regain your perspective.

- **Focus on one task at a time.** Don’t try to organize and express your ideas while simultaneously worrying about audience reactions, grammar, spelling, formatting, page design, and a dozen other factors. Fight the temptation to do everything at once. Trying to get everything perfect on the first pass will make the process slow and frustrating. In particular, don’t worry too much about word choices or overall writing style during your first draft. Concentrate on the organization of your ideas first, then the best way to express those ideas, and then finally the presentation and production of your messages. Following the three-step writing process is an ideal way to focus on one task at a time in a logical sequence.
Give yourself plenty of time. As with every other school project, waiting until the last minute creates unnecessary stress. Writing and speaking projects are much easier if you tackle them in small stages with breaks in between, rather than trying to get everything done in one frantic blast. Moreover, there will be instances when you simply get stuck on a project, and the best thing to do is walk away and give your mind a break. If you allow room for breaks in your schedule, you'll minimize the frustration and spend less time overall on your homework, too.

Step back and assess each project before you start. The writing and speaking projects you'll have in this course cover a wide range of communication scenarios, and it's essential that you adapt your approach to each new challenge. Resist the urge to dive in and start writing without a plan. Ponder the assignment for a while, consider the various approaches you might take, and think carefully about your objectives before you start writing. Nothing is more frustrating than getting stuck halfway through because you're not sure what you're trying to say or you've wandered off track. Spend a little more time planning, and you'll spend a lot less time writing.

Use the three-step writing process. Those essential planning tasks are the first step in the three-step writing process, which you'll learn about in Chapter 5 and use throughout the course. This process has been developed and refined by professional writers with decades of experience and thousands of projects ranging from short blog posts to 600-page textbooks. It works, so take advantage of it.

Stage 2: Conducting a Successful Job Search

Every activity in the job-search process relies on communication. The better you can communicate, the more successful you'll be at landing interesting and rewarding work. Plus, you can reduce the stress of preparing a résumé and going to job interviews.

Writing a résumé can be a big task, but you don’t need to do it all at once if you give yourself plenty of time. The 16 Build Your Career activities (see the end of each chapter) show you how to build your job-search package one step at time. Do the activity in each chapter, and by the time you finish the book, you'll have the materials you need to start your job search.

Chapter 15 and Chapter 16 are dedicated to various forms of employment-related communication. If your course doesn’t cover these chapters, your college probably offers a workshop or other activity to help you get ready to apply and interview for jobs. No matter where you learn the skills related to résumés and interviewing, this section will help you
think about the career you want to craft for yourself, with advice on finding the best fit, developing an employment portfolio, and defining your personal brand.

**FINDING THE BEST FIT**

Figuring out where and how you can thrive professionally is a lifelong quest. You don’t need to have all the answers today, and your answers will no doubt change in the coming years. However, start thinking about it now so that you can bring some focus to your job search. Organize your strategic planning with three questions: what you want to do, what you have to offer, and how you can make yourself more valuable.

**What Do You Want to Do?**

Economic necessities and the dynamics of the marketplace will influence much of what happens in your career, and you may not always have the opportunity to do the kind of work you would really like to do. Even if you can’t get the job you want right now, though, start your job search by examining your values and interests. Doing so will give you a better idea of where you want to be eventually, and you can use those insights to learn and grow your way toward that ideal situation. Consider these factors:

- **What would you like to do every day?** Research occupations that interest you. Find out what people really do every day. Ask friends, relatives, alumni from your school, and contacts in your social networks. Read interviews with people in various professions to get a sense of what their careers are like.

- **How would you like to work?** Consider how much independence you want on the job, how much variety you like, and whether you prefer to work with products, systems, people, ideas, words, figures, or some combination thereof.

- **How do your financial goals fit with your other priorities?** For instance, many high-paying jobs involve a lot of stress, sacrifices of time with family and friends, and frequent travel or relocation. If other factors—such as stability, location, lifestyle, or intriguing work—are more important to you, you may have to sacrifice some level of pay to achieve them.

- **Have you established some general career goals?** For example, do you want to pursue a career specialty such as finance or manufacturing, or do you want to gain experience in multiple areas with an eye toward general management or entrepreneurship?

- **What sort of work culture are you most comfortable with?** Would you be happy in a formal hierarchy with clear reporting relationships? Or do you prefer less structure? Teamwork or individualism? Do you prefer a competitive environment or a more cooperative culture?

The day-to-day activities of different professions can vary widely. Do as much research as you can before you choose a career path to make sure it’s the right path for you.
You might need some time in the workforce to figure out what you really want to do, but it’s never too early to start thinking about where you want to be. Filling out the assessment in Table 2 might help you get a clearer picture of the nature of the work you would like to pursue in your career.

**What Do You Have to Offer?**

Knowing what you want to do is one thing. Knowing what companies or clients are willing to pay you to do is another thing entirely. You may already have a good idea of what you can offer employers. If not, some brainstorming can help you identify your skills, interests, and characteristics. Start by listing achievements you’re proud of and experiences that were satisfying, and identify the skills that enabled these achievements. For example, leadership skills, speaking ability, and artistic talent may have helped you coordinate a successful class project. As you analyze your achievements, you may begin to recognize a pattern of skills. Which of these would be valuable to potential employers?

<tr>
<td>18. I want as much career stability as possible.</td>
</tr>
<tr>
<td>19. I want to enjoy my work, even if that means making less money.</td>
</tr>
<tr>
<td>20. I want to become a high-level corporate manager.</td>
</tr>
</tbody>
</table>
Next, look at your educational preparation, work experience, and extracurricular activities. What do your knowledge and experience qualify you to do? What have you learned from volunteer work or class projects that could benefit you on the job? Have you held any offices, won any awards or scholarships, mastered a second language? What skills have you developed in nonbusiness situations that could transfer to a business position?

Take stock of your personal characteristics. Are you assertive, a born leader? Or are you more comfortable contributing under someone else’s leadership? Are you outgoing, articulate, and comfortable around people? Or do you prefer working alone? Make a list of what you believe are your four or five most important qualities. Ask a relative or friend to rate your traits as well.

If you’re having difficulty figuring out your interests, characteristics, or capabilities, consult your college career center. Many campuses administer a variety of tests that can help you identify interests, aptitudes, and personality traits. These tests won’t reveal your “perfect” job, but they’ll help you focus on the types of work best suited to your personality.

**How Can You Make Yourself More Valuable?**

While you’re figuring out what you want from a job and what you can offer an employer, you can take positive steps toward building your career. First, look for opportunities to develop skills, gain experience, and expand your professional network. These might involve internships, volunteer work, freelance projects, part-time jobs, or projects that you initiate on your own. You can look for freelance projects on Craigslist and numerous other websites; some of these jobs have only nominal pay, but they do provide an opportunity for you to display your skills. Also consider applying your talents to crowdsourcing projects, in which companies and nonprofit organizations invite the public to contribute solutions to various challenges. Look for ways to expand your employment portfolio and establish your personal brand (see the following sections).

Second, learn more about the industry or industries in which you want to work, and stay on top of new developments. Join networks of professional colleagues and friends who can help you keep up with trends and events. Follow the leading voices in a profession on social media. Many professional societies have student chapters or offer students discounted memberships. Take courses and pursue other educational or life experiences that would be difficult while working full time.

Whether you call it your personal brand or your professional promise, figure out what you want to be as a professional and how you should communicate that to others.
BUILDING AN EMPLOYMENT PORTFOLIO

Employers want proof that you have the skills to succeed on the job, which can be challenging if you don’t have a lot of relevant work experience in your target field. Fortunately, you can use your college classes, volunteer work, and other activities to assemble compelling proof by creating an employment portfolio, a collection of projects that demonstrate your skills and knowledge.

Your portfolio is likely to be a multimedia effort, with physical work samples (such as reports, proposals, or marketing materials), digital documents, web content, blog posts, photographs, video clips, and other items. As appropriate, you can include these items in your LinkedIn profile, bring them to interviews, and have them ready whenever an employer, client, or networking contact asks for samples of your work.

You have a variety of options for hosting a portfolio online. Your LinkedIn profile (see page 507) can function as your portfolio home, your college may offer portfolio hosting, or you might consider one of the many commercial portfolio hosting services. To see a selection of student e-portfolios from colleges around the United States, go to real-timeupdates.com/ebc13, select Student Assignments, and locate the link to student e-portfolios.

Throughout this course, pay close attention to the assignments marked “Portfolio Builder,” which start in Chapter 8. These items can make good samples of your communication skills and your ability to understand and solve business-related challenges. By combining these projects with samples from your other courses, you can create a compelling portfolio when you’re ready to start interviewing. Your portfolio is also a great resource for writing your résumé because it reminds you of all the great work you’ve done over the years. Moreover, you can continue to refine and expand your portfolio throughout your career; many independent professionals use portfolios to advertise their services.

As you assemble your portfolio, collect anything that shows your ability to perform, whether it’s in school, on the job, or in other venues. However, you must check with employers before including any items that you created while you were an employee, and check with clients before including any work products (anything you wrote, designed, programmed, and so on) they purchased from you. Many business documents contain confidential information that companies don’t want distributed to outside audiences.

For each item you add to your portfolio, write a brief description that helps other people understand the meaning and significance of the project. Include such items as these:

- **Background.** Why did you undertake this project? Was it a school project, a work assignment, or something you did on your own initiative?
- **Project objectives.** Explain the project’s goals, if relevant.
- **Collaborators.** If you worked with others, be sure to mention that and discuss team dynamics if appropriate. For instance, if you led the team or worked with others long distance as a virtual team, point that out.
- **Constraints.** Sometimes the most impressive thing about a project is the time or budget constraints under which it was created. If such constraints apply to a project, consider mentioning them in a way that doesn’t sound like an excuse for poor quality. If you had only one week to create a website, for example, you might say that “One of the intriguing challenges of this project was the deadline; I had only one week to design, compose, test, and publish this material.”
- **Outcomes.** If the project’s goals were measurable, what was the result? For example, if you wrote a letter soliciting donations for a charitable cause, how much money did you raise?
- **Learning experience.** If appropriate, describe what you learned during the course of the project.

Keep in mind that the portfolio itself is a communication project, so be sure to apply everything you’ll learn in this course about effective communication and good design. Also, assume that potential employers will find your e-portfolio site, even if you don’t tell them about it, so don’t include anything that doesn’t represent you at your professional best.
BUILDING YOUR PERSONAL BRAND

You have probably heard the advice to develop a "personal brand" but might not know how to proceed or might not be comfortable with the concept of "branding" yourself. This section presents five steps that can make the task easier and more authentic.

Note that the process outlined here isn't about coming up with three or four words that are supposed to describe you, such as visionary, creator, problem solver, or things like that, as you may come across in some discussions of personal branding. This is a much more practical and comprehensive process that identifies the specific qualifications that you can bring to the job, backs them up with solid evidence, and makes sure you are ready with a concise answer when an employer asks, "So, tell me about yourself."

Don’t Call It Personal Branding If You Don’t Care for the Term

Some people object to the term personal branding, with its associations of product marketing, the implied need to “get out there and promote yourself,” and perhaps the unseemly idea of reducing something as complex as yourself to an advertising slogan. If you are just starting your career, you might also wonder how to craft a meaningful brand when you don’t have any relevant work experience.

Moreover, although personal branding makes obvious sense for professional speakers, authors, consultants, entrepreneurs, and others who must promote themselves in the public marketplace, those who aspire to professional or managerial positions in a corporate structure may rightly wonder why they need to “brand” themselves at all.

However, the underlying concept of branding as a promise applies to everyone, no matter the career stage or trajectory. A brand is fundamentally a promise to deliver on a specific set of values. For everyone in business, that promise is critical, whether it extends to a million people in the online audience for a TED talk or a half-dozen people inside a small company. And even if you never think about your personal brand, you are continuously creating and re-creating it by the way you conduct yourself as a professional. In other words, even if you reject the idea of personal branding, other people will form an opinion of you and your “brand” anyway, so you might as well take charge and help create the impression that you want others to have of you.

As an alternative to a personal brand, think of your professional promise. Frame it this way: When people hear your name, what do you want them to think about you and your professional attributes and qualifications?

Write the “Story of You”

When it’s time to write or update your résumé, step back and think about where you’ve been in your life and your career and where you’d like to go. Helpful questions include Do you like the path you’re on, or is it time for a change? Are you focused on a particular field, or do you need some time to explore?

This is also a great planning tool for developing a personal brand. In Chapter 15, you’ll see this referred to as writing the “story of you,” and it’s divided into three sections:

- **Where I have been**—the experiences from my past that give me insight into where I would like to go in the future
- **Where I am now**—where I currently stand in terms of education and career, and what I know about myself (including knowledge and skills, personal attributes, and professional interests)
- **Where I want to be**—the career progress and experiences I want to have, areas I want to explore, and goals I want to achieve

Think in terms of an image or a theme you’d like to project. Am I academically gifted? A daring innovator? A well-rounded professional with wide-ranging talents? A technical wizard? A dependable, “go-to” problem solver that people can count on? A “connector” who can bring people and resources together?
Writing this story arc is a valuable planning exercise that helps you think about where you want to go in your career. In essence, you are clarifying who you are professionally and defining a future version of yourself—and these are the foundations of your personal brand/professional promise. Another important benefit is that it makes the personal branding effort authentic, because it is based on your individual interests and passions.

Construct Your Brand Pyramid

With your professional story arc as a guide, the next step is to construct a brand pyramid that has all the relevant support points needed to build a personal brand message (see Figure 2).

Start by compiling a private inventory of skills, attributes, experience, and areas for improvement. This should be a positive but realistic assessment of what you have to offer now and a “to-grow” list of areas where you want to develop or improve. Obviously, this inventory isn’t for public consumption. As much as possible, provide evidence to back up each quality you list. If you are diligent and detail oriented, for instance, identify a time that you saved a project by methodically analyzing the situation to find a problem that others had overlooked. If you are a creative thinker, identify a time when you came up with an unusual new idea at work. Employers want to know how you can apply your skills, attributes, and experience; the more evidence you can provide, the better.

Next, select the appropriate materials from your inventory to develop a public profile that highlights the qualities you want to promote. As “Put Your Promise to Work” explains, this profile can take on a variety of forms for different communication platforms.

Finally, distill your professional promise down to a single, brief headline, also known as a tagline or elevator pitch. The headline should be a statement of compelling value, not a generic job title. Instead of “I’m a social media specialist,” you might say, “I help small companies get the same reach on social media as giant corporations.”

Of course, many students won’t have the relevant job experience to say something like that, and your personal brand might be more an expression of potential. Even if you have no relevant professional experience, you still have personal attributes and educational qualifications that are the foundations of your brand. The key is to make sure it’s realistic and suggests a logical connection between the present and the future. Someone pursuing an MBA in finance can reasonably claim to have a strong toolset for financial analysis, but someone with no corporate work experience can’t claim to be a bold, high-impact executive.

Here’s a good example: “I am a data science major ready to make numbers come alive through leading-edge techniques in deep learning, data mining, and visualization.”

Note that both your public profile and your headline should use relevant keywords from target job descriptions (see page 496).
Reduce or Eliminate Factors That Could Damage Your Brand

Every brand, no matter how popular and powerful, can be damaged by negative perceptions or performance issues. After identifying all the positives, do an objective analysis of areas that could undermine your career-building efforts. For example, someone who tends to overpromise and underdeliver is going to develop a reputation for unreliability that could outweigh whatever positive qualities he or she can bring to the job. Other concerns might be related to specific skills that you need to develop in order to progress toward your career goals.

Be constantly mindful of the “multimedia you” that the world sees—your online presence, your personal appearance, your conduct in business and social settings, the way you sound on the phone, your mannerisms, your vocabulary, and anything else that shapes your reputation. Careers can be derailed by a single misjudged social media post, so always be putting the best “you” on display.

Put Your Promise to Work

Now it’s time to put the branding message to work. Your public profile could be expressed in a variety of ways—as a conventional résumé, the summary section on LinkedIn, an infographic résumé, or the introductory section of a personal webpage or e-portfolio.

The headline can be adapted and used in multiple ways as well, including the headline field on LinkedIn, the qualifications summary on your résumé, your Twitter profile, and as a ready answer to the common interview question “So, tell me about yourself.”

Naturally, your brand message should be consistent across all the platforms and conversations where it is used. For instance, an employer reviewing your résumé is likely to visit your LinkedIn profile as well, so it’s important that the messages match. If you complete your branding pyramid first, it’ll be easy to adapt it to a variety of different purposes while keeping your message consistent.

As you progress through your career, bear in mind that all this planning and communication is of no value if you fail to deliver on your brand promise. Remember that branding is only a promise—it’s your performance that ultimately counts. When you deliver quality results time after time, your talents and professionalism will speak for you.

Lastly, your branding pyramid should be a “living document” that is updated whenever you acquire new skills or job experiences or want to move in a different direction. In addition, periodically revisiting it can be a good way to recapture the passion that initially launched you down your career path.

Stage 3: Succeeding in Your First Job

Your first job sets the stage for your career and gives you an opportunity to explore how you want to position yourself for the long term. If you are already working or are changing careers, you can combine these skills with the work-life perspective you already have to take your career to a new level.

As you progress along your career path, the time and energy you have invested in this course will continue to yield benefits year after year. As you tackle each new challenge, influential company leaders—the people who decide how quickly you’ll get promoted and how much you’ll earn—will be paying close attention to how well you communicate. They will observe your interactions with colleagues, customers, and business partners. They’ll take note of how well you can collect data, find the essential ideas buried under mountains of information, and convey those points to other people. They’ll observe your ability to adapt to different audiences and circumstances. They’ll be watching when you encounter tough situations that require careful attention to ethics and etiquette. The good news: Every insight you gain and every skill you develop in this course will help you shine in your career.
