Preface

*Basic College Mathematics with Early Integers, Fourth Edition* was written to provide a solid foundation in the basics of college mathematics, including the topics of whole numbers, integers, fractions, decimals, ratio and proportion, percent, and algebra topics. Integers are introduced in Chapter 2 and integrated throughout the text. This allows students to gain confidence and mastery by working with integers throughout the course. Specific care was taken to make sure students have the most up-to-date relevant text preparation for their next mathematics course or for non-mathematical courses that require an understanding of basic mathematical concepts. I have tried to achieve this by writing a user-friendly text that is keyed to objectives and contains many worked-out examples. As suggested by AMATYC and the NCTM Standards (plus Addenda), real-life and real-data applications, data interpretation, conceptual understanding, problem solving, writing, cooperative learning, appropriate use of technology, number sense, estimation, critical thinking, and geometric concepts are emphasized and integrated throughout the book.

The many factors that contributed to the success of the previous edition have been retained. In preparing the Fourth Edition, I considered comments and suggestions of colleagues, students, and many users of the prior edition throughout the country.

What’s New in the Fourth Edition?

- **The Martin-Gay Program** has been revised and enhanced with a new design in the text and MyLab Math to actively encourage students to use the text, video program, and Video Organizer as an integrated learning system.

- **New Getting Ready for the Test** can be found before each Chapter Test. These exercises can increase student success by helping students prepare for their Chapter Test. The purpose of these exercises is to check students’ conceptual understanding of the topics in the chapter as well as common student errors. It is suggested that students complete and check these exercises before taking a practice Chapter Test. All Getting Ready for the Test exercises are either Multiple Choice or Matching, and all answers can be found in the answer section of this text.

  Video Solutions of all exercises can be found in MyLab Math. These video solutions contain brief explanations and reminders of material in the chapter. Where applicable, incorrect choices contain explanations.

  Getting Ready for the Test exercise numbers marked in blue indicate that the exercise is available in Learning Catalytics. LC

- **New Learning Catalytics** is an interactive student response tool that uses students’ smartphones, tablets, or laptops to engage them in more sophisticated tasks and thinking. Generate class discussion, guide your lecture, and promote peer-to-peer learning with real-time analytics. Accessible through MyLab Math, instructors can use Learning Catalytics to:
  - Pose a variety of open-ended questions that help your students develop critical thinking skills.
  - Monitor responses to find out where students are struggling.
  - Use real-time data to adjust your instructional strategy and try other ways of engaging students during class.
  - Manage student interactions by automatically grouping students for discussion, teamwork, and peer-to-peer learning.
Pearson-created questions for developmental math topics are available to allow you to take advantage of this exciting technology. Additionally, “Getting Ready for the Test” exercises (marked in blue) are available in Learning Catalytics. Search the question library for “MGBCMEI” and the chapter number, for example, MGBCMEI17 would be the questions from Chapter 7.

**New Key Concept Activity Lab Workbook** includes Extension Exercises, Exploration Activities, Conceptual Exercises, and Group Activities. These activities are a great way to engage students in conceptual projects and exploration as well as group work. This workbook is available in MyLab Math, or can be packaged with a text or MyLab code.

**Exercise Sets** have been carefully examined and revised. Special focus was placed on making sure that even- and odd-numbered exercises are carefully paired and that real-life applications are updated.

**The Martin-Gay MyLab Math** course has been updated and revised to provide more exercise coverage, including assignable Video Check questions and an expanded video program. There are Lecture Videos for every section, which students can also access at the specific objective level; Student Success Tips videos; and an increased number of video clips at the exercise level to help students while doing homework in MyLab Math. Suggested homework assignments have been premade for assignment at the instructor’s discretion.

**Key Pedagogical Features**

The following key features have been retained and/or updated for the Fourth Edition of the text:

- **Problem-Solving Process** This is formally introduced in Chapter 1 with a four-step process that is integrated throughout the text. The four steps are **Understand**, **Translate**, **Solve**, and **Interpret**. The repeated use of these steps in a variety of examples shows their wide applicability. Reinforcing the steps can increase students’ comfort level and confidence in tackling problems.

- **Exercise Sets Revised and Updated** The exercise sets have been carefully examined and extensively revised. Special focus was placed on making sure that even- and odd-numbered exercises are paired and that real-life applications were updated.

- **Examples** Detailed, step-by-step examples were added, deleted, replaced, or updated as needed. Many examples reflect real life. Additional instructional support is provided in the annotated examples.

- **Practice Exercises** Throughout the text, each worked-out example has a parallel Practice exercise. These invite students to be actively involved in the learning process. Students should try each Practice Exercise after finishing the corresponding example. Learning by doing will help students grasp ideas before moving on to other concepts. Answers to the Practice Exercises are provided at the bottom of each page.

- **Helpful Hints** Helpful Hints contain practical advice on applying mathematical concepts. Strategically placed where students are most likely to need immediate reinforcement, Helpful Hints help students avoid common trouble areas and mistakes.

- **Concept Checks** This feature allows students to gauge their grasp of an idea as it is being presented in the text. Concept Checks stress conceptual understanding at the point-of-use and help suppress misconceived notions before they start. Answers appear at the bottom of the page. Exercises related to Concept Checks are included in the exercise sets.

- **Mixed Practice Exercises** In the section exercise sets, these exercises require students to determine the problem type and strategy needed to solve it just as they would need to do on a test.
• **Integrated Reviews** This unique mid-chapter exercise set helps students assimilate new skills and concepts that they have learned separately over several sections. These reviews provide yet another opportunity for students to work with “mixed” exercises as they master the topics.

• **Vocabulary Check** This feature provides an opportunity for students to become more familiar with the use of mathematical terms as they strengthen their verbal skills. These appear at the end of each chapter before the Chapter Highlights.

• **Vocabulary, Readiness & Video Check Questions** are assignable for each section of the text and in MyLab Math. Vocabulary exercises check student understanding of new terms. The Readiness exercises center on a student’s understanding of a concept that is necessary in order to continue to the exercise set. The Video Check questions correlate to the videos in MyLab Math, and are a great way to assess whether students have viewed and understood the key concepts presented in the videos. Answers to all Video Check questions are available in an answer section at the back of the text.

• **Chapter Highlights** Found at the end of every chapter, these contain key definitions and concepts with examples to help students understand and retain what they have learned and help them organize their notes and study for tests.

• **Chapter Review** The end of every chapter contains a comprehensive review of topics introduced in the chapter. The Chapter Review offers exercises keyed to every section in the chapter, as well as Mixed Review exercises that are not keyed to sections.

• **Chapter Test and Chapter Test Prep Videos** The Chapter Test is structured to include those problems that involve common student errors. The Chapter Test Prep Videos gives students instant access to a step-by-step video solution of each exercise in the Chapter Test.

• **Cumulative Review** This review follows every chapter in the text (except Chapter 1). Each odd-numbered exercise contained in the Cumulative Review is an earlier worked example in the text that is referenced in the back of the book along with the answer.

• **Writing Exercises** These exercises occur in almost every exercise set and require students to provide a written response to explain concepts or justify their thinking.

• **Applications** Real-world and real-data applications have been thoroughly updated, and many new applications are included. These exercises occur in almost every exercise set and show the relevance of mathematics and help students gradually and continuously develop their problem-solving skills.

• **Review Exercises** These exercises occur in each exercise set (except in Chapter 1) and are keyed to earlier sections. They review concepts learned earlier in the text that will be needed in the next section or chapter.

• **Exercise Set Resource Icons** Located at the opening of each exercise set, these icons remind students of the resources available for extra practice and support:

   MyLab Math

See Student Resources descriptions on page xiii for details on the individual resources available.

• **Exercise Icons** These icons facilitate the assignment of specialized exercises and let students know what resources can support them.

   - ▶ Video icon: exercise worked on the Interactive Lecture Series.
   - ▲ Triangle icon: identifies exercises involving geometric concepts.
   - ▼ Pencil icon: indicates a written response is needed.
   - □ Calculator icon: optional exercises intended to be solved using a scientific or graphing calculator.
• **Group Activities** Found at the end of each chapter, these activities are for individual or group completion, and are usually hands-on or data-based activities that extend the concepts found in the chapter, allowing students to make decisions and interpretations and to think and write about algebra.

• **Optional: Calculator Exploration Boxes and Calculator Exercises** The optional Calculator Explorations provide keystrokes and exercises at appropriate points to give students an opportunity to become familiar with these tools. Section exercises that are best completed by using a calculator are identified by \( \text{eq} \) for ease of assignment.

• **The Video Organizer** workbook is designed to help students take notes and work practice exercises while watching the Interactive Lecture Series videos in MyLab Math, making it easy for students to create a course notebook and build good study habits.
  - Covers all of the video examples in order.
  - Provides ample space for students to write down key definitions and properties.
  - Includes “Play” and “Pause” button icons to prompt students to follow along with the author for some exercises while they try others on their own.

The Video Organizer is available in a loose-leaf, notebook-ready format, or can be downloaded from the MyLab Math course.

• **Interactive Lecture Series**, featuring Elayn Martin-Gay, provides students with learning at their own pace. The videos offer the following resources and more:
  - **A complete lecture for each section of the text** highlights key examples and exercises from the text. “Pop-ups” reinforce key terms, definitions, and concepts.
  - **An interface with menu navigation features** allows students to quickly find and focus on the examples and exercises they need to review.
  - **Interactive Concept Check** exercises measure students’ understanding of key concepts and common trouble spots.
  - **Student Success Tip Videos** are in short segments designed to be daily reminders to be organized and to study.
  - **The Chapter Test Prep Videos** help students during their most teachable moment—when they are preparing for a test. This innovation provides step-by-step solutions for the exercises found in each Chapter Test.
  - **The Practice Final Exam Videos** help students prepare for an end-of-course final. Students can watch full video solutions to each exercise in the Practice Final Exam at the end of this text.
Resources for Success

Get the Most Out of MyLab Math for Basic College Mathematics with Early Integers, Fourth Edition by Elayn Martin-Gay

Elayn Martin-Gay believes that every student can succeed, and every MyLab course that accompanies her texts is infused with her student-centric approach. The seamless integration of Elayn's signature support with the #1 choice in digital learning for developmental math gives students a completely consistent experience from print to MyLab.

A Comprehensive and Dynamic Video Program

The Martin-Gay video program is 100% presented by Elayn Martin-Gay in her clear, approachable style. The video program includes full section lectures and smaller objective level videos. Within many section lecture videos, Interactive Concept Checks measure students' understanding of concepts and common trouble spots—students are asked to try a question within the video in order, after which correct and incorrect answers are explained.

Assignable Video Check questions ensure that students have viewed and understood the key concepts from the section lecture videos.

Supporting College Success

Other hallmark Martin-Gay videos include Student Success Tip videos, which are short segments designed to be daily reminders to stay organized and to study. Additionally in keeping with Elayn's belief that every student can succeed, a new Mindset module is available in the course, with mindset-focused videos and exercises that encourage students to maintain a positive attitude about learning, value their own ability to grow, and view mistakes as a learning opportunity.

Resources for Success

Resources for Review
New! Getting Ready for the Test video solutions cover every Getting Ready for the Test exercise. These appear at the end of each chapter and give students an opportunity to assess whether they understand the big picture concepts of the chapter, and help them focus on avoiding common errors. Students also have Chapter Test Prep videos, a Martin-Gay innovation, to help during their most teachable moment—when preparing for a test.

Personalize Learning
New! Skill Builder exercises offer just-in-time additional adaptive practice. The adaptive engine tracks student performance and delivers questions to each individual that adapt to his or her level of understanding. This new feature allows instructors to assign fewer questions for homework, allowing students to complete as many or as few questions as they need.

Get Students Engaged
New! Learning Catalytics Martin-Gay-specific questions are pre-built and available through MyLab Math. Learning Catalytics is an interactive student response tool that uses students’ smartphones, tablets, or laptops to engage them in more sophisticated tasks and thinking. Getting Ready for the Test exercises marked in blue in the text are pre-built in Learning Catalytics to use in class. These questions can be found in Learning Catalytics by searching for “MGBCMEI#” where # is the chapter number.

Resources for Success

Instructor Resources

**Annotated Instructor’s Edition**
Contains all the content found in the student edition, plus answers to even and odd exercises on the same text page, and Teaching Tips throughout the text placed at key points.

*The resources below are available through Pearson’s Instructor Resource Center, or from MyLab Math.*

**Instructor’s Resource Manual with Tests and Mini-Lectures**
Includes mini-lectures for each text section, additional practice worksheets for each section, several forms of tests per chapter—free response and multiple choice, and answers to all items.

**Instructor’s Solutions Manual**
Contains detailed, worked-out solutions to even-numbered exercises in the text.

**TestGen®**
Enables instructors to build, edit, print, and administer tests using a computerized bank of questions developed to cover all the objectives of the text. TestGen is algorithmically based, allowing instructors to create multiple but equivalent versions of the same question or test with the click of a button. Instructors can also modify test bank questions or add new questions.

**Instructor-to-Instructor Videos**
Provide instructors with suggestions for presenting course material as well as time-saving teaching tips.

**PowerPoint Lecture Slides**
Available for download only, these slides present key concepts and definitions from the text.

Student Resources

**Video Organizer**
Designed to help students take notes and work practice exercises while watching the Interactive Lecture Series videos.

- Covers all of the video examples in order.
- Provides prompts with ample space for students to write down key definitions and rules.
- Includes “Play” and “Pause” button icons to prompt students to follow along with the author for some exercises while they try others on their own.
- Includes Student Success Tips Outline and Questions.

Available printed in a loose-leaf, notebook-ready format and to download in MyLab Math. All answers are available in Instructor Resources in MyLab Math.

**New! Key Concept Activity Lab Workbook**
Includes Extension Exercises, Exploration Activities, Conceptual Exercises, and Group Activities. This workbook is available in MyLab Math, or can be packaged in printed form with a text or MyLab Math code. All answers available in Instructor Resources in MyLab Math.

**Student Solutions Manual**
Provides completely worked-out solutions to the odd-numbered section exercises; all exercises in the Integrated Reviews, Chapter Reviews, Chapter Tests, and Cumulative Reviews.
Acknowledgments

There are many people who helped me develop this text, and I will attempt to thank some of them here. Cindy Trimble was invaluable for contributing to the overall accuracy of the text. Gina Linko and Patty Bergin provided guidance throughout the production process and Suellen Robinson provided many suggestions for updating applications during the writing of this Fourth Edition.

A very special thank you goes to my editor, Rachel Ross. And, my thanks to the staff at Pearson for all their support: Barbara Atkinson, Alicia Frankel, Michael Hirsch, Chris Hoag, Paul Corey, Michelle Renda, Jenny Crum and Lauren Schur among many others.

I would like to thank the following reviewers for their input and suggestions that have affected this and previous editions:

Anita Aikman, Collin County Community College
Sheila Anderson, Housatonic Community College
Adrienne Arata, College of the Siskiyous
Cedric Atkins, Mott Community College
Laurel Berry, Bryant & Stratton College
Connie Buller, Metropolitan Community College
Lisa Feintech, Cabrillo College
Chris Ford, Shasta College
Cindy Fowler, Central Piedmont Community College
Pam Gerszewski, College of the Albemarle
Doug Harley, Del Mar College
Sonya Johnson, Central Piedmont Community College
Deborah Jones, High Tech College
Nancy Lange, Inver Hills Community College
Jean McArthur, Joliet Junior College
Carole Shapero, Oakton Community College
Jennifer Streher, Oakton Community College
Tanomo Taguchi, Fullerton College
Leigh Ann Wheeler, Greenville Technical Community College
Valerie Wright, Central Piedmont Community College

I would also like to thank the following dedicated group of instructors who participated in our focus groups, Martin-Gay Summits, and our design review for the series. Their feedback and insights have helped to strengthen this edition of the text. These instructors include:

Billie Anderson, Tyler Junior College
Cedric Atkins, Mott Community College
Lois Beardon, Schoolcraft College
Laurel Berry, Bryant & Stratton College
John Beyers, University of Maryland
Bob Brown, Community College of Baltimore County–Essex
Lisa Brown, Community College of Baltimore County–Essex
NeKeith Brown, Richland College
Gail Burkett, Palm Beach Community College
Cheryl Cantwell, Seminole Community College
Jackie Cohen, Augusta State College
Julie Dewan, Mohawk Valley Community College
Janice Ervin, Central Piedmont Community College
Richard Fielding, Southwestern College
Cindy Gaddis, Tyler Junior College
Nita Graham, St. Louis Community College
Pauline Hall, Iowa State College
Pat Hussey, Triton College
Dorothy Johnson, Lorain County Community College
Sonya Johnson, Central Piedmont Community College
Irene Jones, Fullerton College
Paul Jones, University of Cincinnati
Kathy Kopelousous, Lewis and Clark Community College
Nancy Lange, Inver Hills Community College
Judy Langer, Westchester Community College
Lisa Lindloff, McLinnan Community College
Sandy Lofstock, St. Peters burg College
Kathy Lovelle, Westchester Community College
Jean McArthur, Joliet Junior College
Kevin McCandless, Evergreen Valley College
Daniel Miller, Niagara County Community College
Personal Acknowledgements

I would like to personally thank my extended family. Although this list has grown throughout the years, it still warrants mentioning in my texts as each of these family members has contributed to my work in one way or another – from suggesting application exercises with data and updating/upgrading my computer to understanding that I usually work on “Vacations.” I am deeply grateful to them all: Clayton, Bryan (in heaven), Eric, Celeste, and Tové Gay; Leo and Barbara Miller; Mark and Madison Martin and Carrie Howard; Stuart and Earline Martin; Karen Martin Callac Pasch (in heaven); Michael, Christopher, Matthew, Nicole, and Jessica Callac; Dan Kirk; Keith, Mandy, Erin, and Clayton McQueen, Bailey Martin, Ethan, Avery, and Mia Barnes; Melissa and Belle Landrum.

About the Author

Elayn Martin-Gay has taught mathematics at the University of New Orleans for more than 25 years. Her numerous teaching awards include the local University Alumni Association’s Award for Excellence in Teaching, and Outstanding Developmental Educator at University of New Orleans, presented by the Louisiana Association of Developmental Educators.

Prior to writing textbooks, Elayn Martin-Gay developed an acclaimed series of lecture videos to support developmental mathematics students in their quest for success. These highly successful videos originally served as the foundation material for her texts. Today, the videos are specific to each book in the Martin-Gay series. The author has also created Chapter Test Prep Videos to help students during their most “teachable moment”—as they prepare for a test—along with Instructor-to-Instructor videos that provide teaching tips, hints, and suggestions for each developmental mathematics course, including basic mathematics, prealgebra, beginning algebra, and intermediate algebra.

Elayn is the author of 13 published textbooks, and a new Interactive Assignment MyLab Math course, all specializing in developmental mathematics courses. She has also published series in Algebra 1, Algebra 2, and Geometry. She has participated as an author across the broadest range of educational materials: textbooks, videos, tutorial software, and courseware. This provides an opportunity of various combinations for an integrated teaching and learning package offering great consistency for the student.
