

Prepare for Class: "Read the Book"

| Feature | Description | Benefit | Page(s) |
|--|--|--|---------------|
| Every Chapter begins with . . . | | | |
| Chapter-Opening Topic & Project | Each chapter begins with a discussion of a topic of current interest and ends with a related project. | In the concluding project, you will apply what you have learned to solve a problem related to the topic. | 424, 533 |
|  Internet-Based Projects | These projects allow for the integration of spreadsheet technology that you will need to be a productive member of the workforce. | The projects give you an opportunity to collaborate and use mathematics to deal with issues of current interest. | 533 |
| Every Section begins with . . . | | | |
| LEARNING OBJECTIVES  | Each section begins with a list of objectives. Individual objectives also appear in the text where they are covered. | These objectives focus your studying by emphasizing what's most important and where to find it. | 446 |
| Sections contain . . . | | | |
| PREPARING FOR THIS SECTION | Most sections begin with a list of key concepts to review, with page numbers. | Ever forget what you've learned? This feature highlights previously learned material to be used in this section. Review it, and you'll always be prepared to move forward. | 446 |
|  Now Work the 'Are You Prepared?' Problems | These problems assess whether you have the prerequisite knowledge for the upcoming section. | Work the 'Are You Prepared?' problems. If you get one wrong, you'll know exactly what you need to review and where to review it! | 446, 458 |
|  Now Work PROBLEMS | These follow most examples and direct you to a related exercise. | We learn best by doing. You'll solidify your understanding of examples if you try a similar problem right away, to be sure you understand what you've just read. | 454, 460 |
|  CAUTION | Words of caution are provided in the text. | These point out common mistakes and help you avoid them. | 482 |
| Explorations and Seeing the Concept | These graphing utility activities foreshadow a concept or reinforce a concept just presented. | You will obtain a deeper and more intuitive understanding of theorems and definitions. | 441, 453 |
| In Words | This feature provides alternative descriptions of select definitions and theorems. | Why didn't you say that in the first place? This feature translates math into plain English. | 465 |
|  Calculus | This symbol appears next to information essential for the study of calculus. | Foreshadowing calculus now will make the material easier later. | 220, 429, 454 |
| SHOWCASE EXAMPLES | These examples provide "how to" instruction by offering a guided, step-by-step approach to solving a problem. | With each step presented on the left and the mathematics displayed on the right, you can immediately see how each step is employed. | 358–359 |
|  Model It! Examples and Problems | These examples and problems require you to build a mathematical model from either a verbal description or data. The homework Model It! problems are marked by purple problem numbers. | It is rare for a problem to come in the form "Solve the following equation." Rather, the equation must be developed based on an explanation of the problem. These problems require you to develop models that will enable you to describe the problem mathematically and suggest a solution to the problem. | 472, 504 |
| NEW!  Need to Review? | These margin notes provide a just-in-time reminder of a concept needed now, but covered in an earlier section of the book. Each note is back-referenced to the chapter, section and page where the concept was originally discussed. | Sometimes as you read, you encounter a word or concept you know you've seen before, but don't remember exactly what it means. This feature will point you to where you first learned the word or concept. A quick review now will help you see the connection to what you are learning for the first time and make remembering easier the next time. | 453 |

Practice: “Work the Problems”

| Feature | Description | Benefit | Page(s) |
|--|--|---|--------------------|
| ‘Are You Prepared?’ Problems | These problems assess your retention of the prerequisite material. Answers are given at the end of the section exercises. This feature is related to the Preparing for This Section feature. | Do you always remember what you’ve learned? Working these problems is the best way to find out. If you get one wrong, you’ll know exactly what you need to review and where to review it! | 446, 458 |
| Concepts and Vocabulary | These short-answer questions, mainly fill-in-the-blank, multiple-choice, and true/false items, assess your understanding of key definitions and concepts in the current section. | It is difficult to learn math without knowing the language of mathematics. These problems test your understanding of the formulas and vocabulary. | 458–459 |
| Skill Building | Correlated with section examples, these problems provide straightforward practice. | These problems give you ample opportunity to dig in and develop your skills. | 459–461 |
| Mixed Practice | These problems offer comprehensive assessment of the skills learned in the section by asking problems related to more than one concept or objective. These problems may also require you to utilize skills learned in previous sections. | Learning mathematics is a building process. Many concepts build on each other and are related. These problems help you see how mathematics builds on itself and how the concepts are linked together. | 461 |
| Applications and Extensions | These problems allow you to apply your skills to real-world problems. They also enable you to extend concepts learned in the section. | You will see that the material learned within the section has many uses in everyday life. | 461–464 |
| NEW! Challenge Problems | These problems have been added in most sections and appear at the end of the Application and Extensions exercises. They are intended to be thought-provoking, requiring some ingenuity to solve. | Challenge problems can be used for group work or to challenge your students. Solutions to Challenge Problems are in the Annotated Instructor’s Edition or in the Instructor’s Solution Manual (online). | 464 |
| Explaining Concepts: Discussion and Writing | “Discussion and Writing” problem numbers are colored red. They support class discussion, verbalization of mathematical ideas, and writing and research projects. | To verbalize an idea, or to describe it clearly in writing, shows real understanding. These problems nurture that understanding. Many are challenging, but you’ll get out what you put in. | 464 |
| Retain Your Knowledge | These problems allow you to practice content learned earlier in the course. | Remembering how to solve all the different kinds of problems that you encounter throughout the course is difficult. This practice helps you remember previously learned skills. | 464 |
| Now Work PROBLEMS | Many examples refer you to a related homework problem. These related problems are marked by  and orange problem numbers. | If you get stuck while working problems, look for the closest Now Work problem, and refer to the related example to see if it helps. | 454, 456, 457 |
| NEW! Interactive Figure Exercises | Exercises that require you manipulate an interactive figure to solve. These exercises are labeled with the icon  . | These exercises help you visualize important concepts and develop a “feel” for them. The figures are housed at bit.ly/2Mibga0 and were developed in GeoGebra by author Michael Sullivan III. | 458, 459, 473, 474 |
| Review Exercises | Every chapter concludes with a comprehensive list of exercises to practice. Use the list of objectives to determine what objective and examples correspond to each problem. | Work these problems to ensure that you understand all the skills and concepts employed in the chapter. Think of it as a comprehensive review of the chapter. All answers to Chapter Review problems appear in the back of the text. | 528–531 |

Review: “Study for Quizzes and Tests”

| Feature | Description | Benefit | Page(s) |
|---|---|--|---------|
| Most Sections Contain . . . | | | |
| Retain Your Knowledge | Keeps what you have learned at the forefront and see how topics are connected. | These problems allow content to remain fresh so you are more prepared for the final exam. | 478 |
| The Chapter Review at the end of each chapter contains . . . | | | |
| Things to Know | A detailed list of important theorems, formulas, and definitions from the chapter. | Review these and you’ll know the most important material in the chapter! | 526–527 |
| You Should Be Able to . . . | A complete list of objectives by section, examples that illustrate the objective, and practice exercises that test your understanding of the objective. | Do the recommended exercises and you’ll have mastered the key material. If you get something wrong, go back and review the example listed, and try again. | 527–528 |
| Review Exercises | These provide comprehensive review and practice of key skills, matched to the Learning Objectives for each section. | Practice makes perfect. These problems combine exercises from all sections, giving you a comprehensive review in one place. | 528–531 |
| Chapter Test | About 15–20 problems that can be taken as a Chapter Test. Be sure to take the Chapter Test under test conditions—no notes! | Be prepared. Take the sample practice test under test conditions. This will get you ready for your instructor’s test. If you get a problem wrong, you can watch the Chapter Test Prep Video. | 531–532 |
| Cumulative Review | These problem sets appear at the end of each chapter, beginning with Chapter 2. They combine problems from previous chapters, providing an ongoing cumulative review. When you use them in conjunction with the Retain Your Knowledge problems, you will be ready for the final exam. | These problem sets are really important. Completing them will ensure that you are not forgetting anything as you go. This will go a long way toward keeping you primed for the final exam. | 532–533 |

Contents

| | | |
|----------|--|-----------|
| | Three Distinct Series | xvi |
| | The Enhanced with Graphing Utilities Series | xvii |
| | Preface to the Instructor | xviii |
| | Applications Index | xxvi |
| | To the Student | xxxii |
| R | Review | 1 |
| | R.1 Real Numbers | 2 |
| | Work with Sets • Classify Numbers • Evaluate Numerical Expressions • Work with Properties of Real Numbers | |
| | R.2 Algebra Essentials | 18 |
| | Graph Inequalities • Find Distance on the Real Number Line • Evaluate Algebraic Expressions • Determine the Domain of a Variable • Use the Laws of Exponents • Evaluate Square Roots • Use a Calculator to Evaluate Exponents • Use Scientific Notation | |
| | R.3 Geometry Essentials | 31 |
| | Use the Pythagorean Theorem and Its Converse • Know Geometry Formulas • Understand Congruent Triangles and Similar Triangles | |
| | R.4 Polynomials | 41 |
| | Recognize Monomials • Recognize Polynomials • Add and Subtract Polynomials • Multiply Polynomials • Know Formulas for Special Products • Divide Polynomials Using Long Division • Work with Polynomials in Two Variables | |
| | R.5 Factoring Polynomials | 51 |
| | Factor the Difference of Two Squares and the Sum and Difference of Two Cubes • Factor Perfect Squares • Factor a Second-Degree Polynomial: $x^2 + Bx + C$ • Factor by Grouping • Factor a Second-Degree Polynomial: $Ax^2 + Bx + C, A \neq 1$ • Complete the Square | |
| | R.6 Synthetic Division | 59 |
| | Divide Polynomials Using Synthetic Division | |
| | R.7 Rational Expressions | 63 |
| | Reduce a Rational Expression to Lowest Terms • Multiply and Divide Rational Expressions • Add and Subtract Rational Expressions • Use the Least Common Multiple Method • Simplify Complex Rational Expressions | |
| | R.8 nth Roots; Rational Exponents | 74 |
| | Work with n th Roots • Simplify Radicals • Rationalize Denominators and Numerators • Simplify Expressions with Rational Exponents | |
| 1 | Graphs, Equations, and Inequalities | 83 |
| | 1.1 Graphing Utilities; Introduction to Graphing Equations | 84 |
| | Graph Equations by Plotting Points • Graph Equations Using a Graphing Utility • Use a Graphing Utility to Create Tables • Find Intercepts from a Graph • Use a Graphing Utility to Approximate Intercepts | |

| | |
|--|------------|
| 1.2 Solving Equations Using a Graphing Utility; Linear and Rational Equations | 95 |
| Solve Equations Using a Graphing Utility • Solve Linear Equations • Solve Rational Equations • Solve Problems That Can Be Modeled by Linear Equations | |
| 1.3 Quadratic Equations | 106 |
| Solve a Quadratic Equation by Factoring • Solve a Quadratic Equation Using the Square Root Method • Solve a Quadratic Equation by Completing the Square • Solve a Quadratic Equation Using the Quadratic Formula • Solve Problems That Can Be Modeled by Quadratic Equations | |
| 1.4 Complex Numbers; Quadratic Equations in the Complex Number System | 118 |
| Add, Subtract, Multiply, and Divide Complex Numbers • Solve Quadratic Equations in the Complex Number System | |
| 1.5 Radical Equations; Equations Quadratic in Form; Absolute Value Equations; Factorable Equations | 127 |
| Solve Radical Equations • Solve Equations Quadratic in Form • Solve Equations Involving Absolute Value • Solve Equations by Factoring | |
| 1.6 Problem Solving: Interest, Mixture, Uniform Motion, Constant Rate Job Applications | 135 |
| Translate Verbal Descriptions into Mathematical Expressions • Solve Interest Problems • Solve Mixture Problems • Solve Uniform Motion Problems • Solve Constant Rate Job Problems | |
| 1.7 Solving Inequalities | 145 |
| Use Interval Notation • Use Properties of Inequalities • Solve Linear Inequalities Algebraically and Graphically • Solve Combined Inequalities Algebraically and Graphically • Solve Absolute Value Inequalities Algebraically and Graphically | |
| Chapter Review | 156 |
| Chapter Test | 160 |
| Chapter Projects | 160 |

2 Graphs 162

| | |
|--|------------|
| 2.1 The Distance and Midpoint Formulas | 163 |
| Use the Distance Formula • Use the Midpoint Formula | |
| 2.2 Intercepts; Symmetry; Graphing Key Equations | 170 |
| Find Intercepts Algebraically from an Equation • Test an Equation for Symmetry with Respect to the x -Axis, the y -Axis, and the Origin • Know How to Graph Key Equations | |
| 2.3 Lines | 179 |
| Calculate and Interpret the Slope of a Line • Graph Lines Given a Point and the Slope • Find the Equation of a Vertical Line • Use the Point-Slope Form of a Line; Identify Horizontal Lines • Use the Slope-Intercept Form of a Line • Find the Equation of a Line Given Two Points • Graph Lines Written in General Form Using Intercepts • Find Equations of Parallel Lines • Find Equations of Perpendicular Lines | |
| 2.4 Circles | 195 |
| Write the Standard Form of the Equation of a Circle • Graph a Circle by Hand and by Using a Graphing Utility • Work with the General Form of the Equation of a Circle | |
| 2.5 Variation | 202 |
| Construct a Model Using Direct Variation • Construct a Model Using Inverse Variation • Construct a Model Using Joint Variation | |

| | |
|-------------------|-----|
| Chapter Review | 208 |
| Chapter Test | 210 |
| Cumulative Review | 210 |
| Chapter Project | 211 |

3 Functions and Their Graphs 212

| | |
|--|-----|
| 3.1 Functions | 213 |
| Describe a Relation • Determine Whether a Relation Represents a Function • Use Function Notation; Find the Value of a Function • Find the Difference Quotient of a Function • Find the Domain of a Function Defined by an Equation • Form the Sum, Difference, Product, and Quotient of Two Functions | |
| 3.2 The Graph of a Function | 229 |
| Identify the Graph of a Function • Obtain Information from or about the Graph of a Function | |
| 3.3 Properties of Functions | 239 |
| Identify Even and Odd Functions from a Graph • Identify Even and Odd Functions from an Equation • Use a Graph to Determine Where a Function Is Increasing, Decreasing, or Constant • Use a Graph to Locate Local Maxima and Local Minima • Use a Graph to Locate the Absolute Maximum and the Absolute Minimum • Use a Graphing Utility to Approximate Local Maxima and Local Minima and to Determine Where a Function Is Increasing or Decreasing • Find the Average Rate of Change of a Function | |
| 3.4 Library of Functions; Piecewise-defined Functions | 253 |
| Graph the Functions Listed in the Library of Functions • Analyze a Piecewise-defined Function | |
| 3.5 Graphing Techniques: Transformations | 265 |
| Graph Functions Using Vertical and Horizontal Shifts • Graph Functions Using Compressions and Stretches • Graph Functions Using Reflections about the x -Axis or y -Axis | |
| 3.6 Mathematical Models: Building Functions | 279 |
| Build and Analyze Functions | |
| Chapter Review | 284 |
| Chapter Test | 288 |
| Cumulative Review | 289 |
| Chapter Projects | 289 |

4 Linear and Quadratic Functions 291

| | |
|--|-----|
| 4.1 Properties of Linear Functions and Linear Models | 292 |
| Graph Linear Functions • Use Average Rate of Change to Identify Linear Functions • Determine Whether a Linear Function Is Increasing, Decreasing, or Constant • Build Linear Models from Verbal Descriptions | |
| 4.2 Building Linear Models from Data | 302 |
| Draw and Interpret Scatter Plots • Distinguish between Linear and Nonlinear Relations • Use a Graphing Utility to Find the Line of Best Fit | |
| 4.3 Quadratic Functions and Their Properties | 310 |
| Graph a Quadratic Function Using Transformations • Identify the Vertex and Axis of Symmetry of a Parabola • Graph a Quadratic Function Using Its Vertex, Axis, and Intercepts • Find a Quadratic Function Given Its Vertex and One Other Point • Find the Maximum or Minimum Value of a Quadratic Function | |

| | |
|--|------------|
| 4.4 Building Quadratic Models from Verbal Descriptions and from Data | 324 |
| Build Quadratic Models from Verbal Descriptions • Build Quadratic Models from Data | |
| 4.5 Inequalities Involving Quadratic Functions | 332 |
| Solve Inequalities Involving a Quadratic Function | |
| Chapter Review | 336 |
| Chapter Test | 338 |
| Cumulative Review | 339 |
| Chapter Projects | 340 |

5 Polynomial and Rational Functions 341

| | |
|---|------------|
| 5.1 Polynomial Functions | 342 |
| Identify Polynomial Functions and Their Degree • Graph Polynomial Functions Using Transformations • Identify the Real Zeros of a Polynomial Function and Their Multiplicity | |
| 5.2 The Graph of a Polynomial Function; Models | 357 |
| Analyze the Graph of a Polynomial Function • Build Cubic Models from Data | |
| 5.3 The Real Zeros of a Polynomial Function | 366 |
| Use the Remainder and Factor Theorems • Use Descartes' Rule of Signs to Determine the Number of Positive and the Number of Negative Real Zeros of a Polynomial Function • Use the Rational Zeros Theorem to List the Potential Rational Zeros of a Polynomial Function • Find the Real Zeros of a Polynomial Function • Solve Polynomial Equations • Use the Theorem for Bounds on Zeros • Use the Intermediate Value Theorem | |
| 5.4 Complex Zeros; Fundamental Theorem of Algebra | 381 |
| Use the Conjugate Pairs Theorem • Find a Polynomial Function with Specified Zeros • Find the Complex Zeros of a Polynomial Function | |
| 5.5 Properties of Rational Functions | 388 |
| Find the Domain of a Rational Function • Find the Vertical Asymptotes of a Rational Function • Find the Horizontal or Oblique Asymptote of a Rational Function | |
| 5.6 The Graph of a Rational Function | 399 |
| Analyze the Graph of a Rational Function • Solve Applied Problems Involving Rational Functions | |
| 5.7 Polynomial and Rational Inequalities | 411 |
| Solve Polynomial Inequalities Graphically and Algebraically • Solve Rational Inequalities Graphically and Algebraically | |
| Chapter Review | 418 |
| Chapter Test | 421 |
| Cumulative Review | 421 |
| Chapter Projects | 423 |

6 Exponential and Logarithmic Functions 424

| | |
|---|------------|
| 6.1 Composite Functions | 425 |
| Form a Composite Function • Find the Domain of a Composite Function | |

| | |
|---|------------|
| 6.2 One-to-One Functions; Inverse Functions | 433 |
| Determine Whether a Function Is One-to-One • Determine the Inverse of a Function Defined by a Mapping or a Set of Ordered Pairs • Obtain the Graph of the Inverse Function from the Graph of a One-to-One Function • Verify that a Function Defined by an Equation Is an Inverse Function • Find the Inverse of a Function Defined by an Equation | |
| 6.3 Exponential Functions | 446 |
| Evaluate Exponential Functions • Graph Exponential Functions • Define the Number e • Solve Exponential Equations | |
| 6.4 Logarithmic Functions | 465 |
| Change Exponential Statements to Logarithmic Statements and Logarithmic Statements to Exponential Statements • Evaluate Logarithmic Expressions • Determine the Domain of a Logarithmic Function • Graph Logarithmic Functions • Solve Logarithmic Equations | |
| 6.5 Properties of Logarithms | 479 |
| Work with the Properties of Logarithms • Write a Logarithmic Expression as a Sum or Difference of Logarithms • Write a Logarithmic Expression as a Single Logarithm • Evaluate Logarithms Whose Base Is Neither 10 Nor e • Graph a Logarithmic Function Whose Base is Neither 10 Nor e | |
| 6.6 Logarithmic and Exponential Equations | 488 |
| Solve Logarithmic Equations • Solve Exponential Equations • Solve Logarithmic and Exponential Equations Using a Graphing Utility | |
| 6.7 Financial Models | 497 |
| Determine the Future Value of a Lump Sum of Money • Calculate Effective Rates of Return • Determine the Present Value of a Lump Sum of Money • Determine the Rate of Interest or the Time Required to Double a Lump Sum of Money | |
| 6.8 Exponential Growth and Decay Models; Newton's Law; Logistic Growth and Decay Models | 507 |
| Model Populations That Obey the Law of Uninhibited Growth • Model Populations That Obey the Law of Uninhibited Decay • Use Newton's Law of Cooling • Use Logistic Models | |
| 6.9 Building Exponential, Logarithmic, and Logistic Models from Data | 518 |
| Build an Exponential Model from Data • Build a Logarithmic Model from Data • Build a Logistic Model from Data | |
| Chapter Review | 526 |
| Chapter Test | 531 |
| Cumulative Review | 532 |
| Chapter Projects | 533 |

7 Analytic Geometry **534**

| | |
|--|------------|
| 7.1 Conics | 535 |
| Know the Names of the Conics | |
| 7.2 The Parabola | 536 |
| Analyze Parabolas with Vertex at the Origin • Analyze Parabolas with Vertex at (h, k) • Solve Applied Problems Involving Parabolas | |
| 7.3 The Ellipse | 546 |
| Analyze Ellipses with Center at the Origin • Analyze Ellipses with Center at (h, k) • Solve Applied Problems Involving Ellipses | |

| | |
|--|------------|
| 7.4 The Hyperbola | 559 |
| Analyze Hyperbolas with Center at the Origin • Find the Asymptotes of a Hyperbola • Analyze Hyperbolas with Center at (h, k) • Solve Applied Problems Involving Hyperbolas | |
| Chapter Review | 574 |
| Chapter Test | 575 |
| Cumulative Review | 575 |
| Chapter Projects | 576 |

8 Systems of Equations and Inequalities 577

| | |
|--|------------|
| 8.1 Systems of Linear Equations: Substitution and Elimination | 578 |
| Solve Systems of Equations by Substitution • Solve Systems of Equations by Elimination • Identify Inconsistent Systems of Equations Containing Two Variables • Express the Solution of a System of Dependent Equations Containing Two Variables • Solve Systems of Three Equations Containing Three Variables • Identify Inconsistent Systems of Equations Containing Three Variables • Express the Solution of a System of Dependent Equations Containing Three Variables | |
| 8.2 Systems of Linear Equations: Matrices | 592 |
| Write the Augmented Matrix of a System of Linear Equations • Write the System of Equations from the Augmented Matrix • Perform Row Operations on a Matrix • Solve a System of Linear Equations Using Matrices | |
| 8.3 Systems of Linear Equations: Determinants | 607 |
| Evaluate 2 by 2 Determinants • Use Cramer's Rule to Solve a System of Two Equations Containing Two Variables • Evaluate 3 by 3 Determinants • Use Cramer's Rule to Solve a System of Three Equations Containing Three Variables • Know Properties of Determinants | |
| 8.4 Matrix Algebra | 618 |
| Find the Sum and Difference of Two Matrices • Find Scalar Multiples of a Matrix • Find the Product of Two Matrices • Find the Inverse of a Matrix • Solve a System of Linear Equations Using an Inverse Matrix | |
| 8.5 Partial Fraction Decomposition | 635 |
| Decompose $\frac{P}{Q}$ where Q Has Only Nonrepeated Linear Factors | |
| • Decompose $\frac{P}{Q}$ where Q Has Repeated Linear Factors • Decompose $\frac{P}{Q}$ where Q Has a Nonrepeated Irreducible Quadratic Factor • Decompose $\frac{P}{Q}$ where Q Has a Repeated Irreducible Quadratic Factor | |
| 8.6 Systems of Nonlinear Equations | 644 |
| Solve a System of Nonlinear Equations Using Substitution • Solve a System of Nonlinear Equations Using Elimination | |
| 8.7 Systems of Inequalities | 654 |
| Graph an Inequality by Hand • Graph an Inequality Using a Graphing Utility • Graph a System of Inequalities | |
| 8.8 Linear Programming | 663 |
| Set Up a Linear Programming Problem • Solve a Linear Programming Problem | |
| Chapter Review | 670 |
| Chapter Test | 674 |
| Cumulative Review | 675 |
| Chapter Projects | 676 |

| | | |
|-------------|--|------------|
| 9 | Sequences; Induction; the Binomial Theorem | 677 |
| 9.1 | Sequences | 678 |
| | List the First Several Terms of a Sequence • List the Terms of a Sequence Defined by a Recursive Formula • Use Summation Notation • Find the Sum of a Sequence Algebraically and Using a Graphing Utility • Solve Annuity and Amortization Problems Using Recursive Formulas | |
| 9.2 | Arithmetic Sequences | 692 |
| | Determine Whether a Sequence Is Arithmetic • Find a Formula for an Arithmetic Sequence • Find the Sum of an Arithmetic Sequence | |
| 9.3 | Geometric Sequences; Geometric Series | 698 |
| | Determine Whether a Sequence Is Geometric • Find a Formula for a Geometric Sequence • Find the Sum of a Geometric Sequence • Determine Whether a Geometric Series Converges or Diverges • Solve Annuity Problems Using Formulas | |
| 9.4 | Mathematical Induction | 710 |
| | Prove Statements Using Mathematical Induction | |
| 9.5 | The Binomial Theorem | 714 |
| | Evaluate $\binom{n}{j}$ • Use the Binomial Theorem | |
| | Chapter Review | 721 |
| | Chapter Test | 723 |
| | Cumulative Review | 724 |
| | Chapter Projects | 725 |
| 10 | Counting and Probability | 726 |
| 10.1 | Counting | 727 |
| | Find All the Subsets of a Set • Count the Number of Elements in a Set • Solve Counting Problems Using the Multiplication Principle | |
| 10.2 | Permutations and Combinations | 732 |
| | Solve Counting Problems Using Permutations Involving n Distinct Objects • Solve Counting Problems Using Combinations • Solve Counting Problems Using Permutations Involving n Nondistinct Objects | |
| 10.3 | Probability | 741 |
| | Construct Probability Models • Compute Probabilities of Equally Likely Outcomes • Find Probabilities of the Union of Two Events • Use the Complement Rule to Find Probabilities | |
| | Chapter Review | 751 |
| | Chapter Test | 753 |
| | Cumulative Review | 754 |
| | Chapter Projects | 754 |
| | Answers | AN1 |
| | Challenge Problem Solutions | CP1 |
| | Photo Credits | C1 |
| | Subject Index | I1 |

Three Distinct Series to Meet Varied Instructional Needs

Students have different goals, learning styles, and levels of preparation. Instructors have different teaching philosophies, styles, and techniques. Rather than write one series to fit all, the Sullivans have written three distinct series. All share the same goal—to develop a high level of mathematical understanding and an appreciation for the way mathematics can describe the world around us. The manner of reaching that goal, however, differs from series to series.

Enhanced with Graphing Utilities Series

This series provides a thorough integration of graphing utilities into topics, allowing students to explore mathematical concepts and encounter ideas usually studied in later courses. Many examples show solutions using algebra side-by-side with graphing techniques. Using technology, the approach to solving certain problems differs from the Contemporary (Flagship) or Concepts through Functions Series, while the emphasis on understanding concepts and building strong skills is maintained. Texts in this series are *College Algebra*, *Algebra & Trigonometry*, and *Precalculus*.

Flagship Series

The Flagship Series is the most traditional in approach, yet modern in its treatment of precalculus mathematics. In each text, needed review material is included and is referenced when it is used. Graphing utility coverage is optional and can be included or excluded at the discretion of the instructor. Texts in this series are *College Algebra*, *Algebra & Trigonometry*, *Trigonometry: A Unit Circle Approach*, and *Precalculus*.

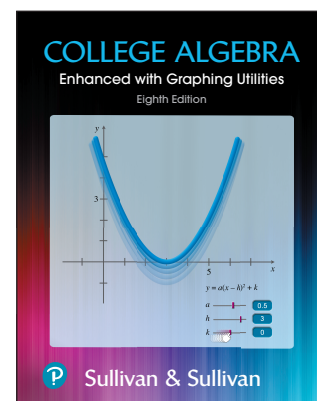

Concepts through Functions Series

This series differs from the others, utilizing a functions approach that serves as the organizing principle tying concepts together. Functions are introduced early in various formats. This approach supports the Rule of Four, which states that functions are represented symbolically, numerically, graphically, and verbally. Each chapter introduces a new type of function and then develops all concepts pertaining to that particular function. The solutions of equations and inequalities, instead of being developed as stand-alone topics, are developed in the context of the underlying functions. Graphing utility coverage is optional and can be included or excluded at the discretion of the instructor. Texts in this series are *College Algebra*; *Precalculus, with a Unit Circle Approach to Trigonometry*; *Precalculus, with a Right Triangle Approach to Trigonometry*.

The Enhanced with Graphing Utilities Series

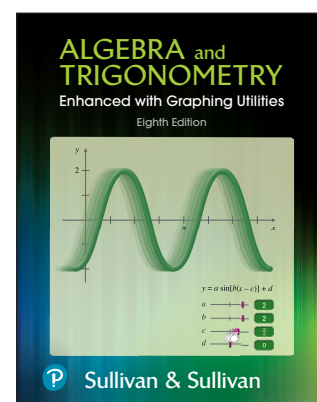

College Algebra, Eighth Edition

This text provides an approach to college algebra that completely integrates graphing technology without sacrificing mathematical analysis and conceptualization. The text has three chapters of review material preceding the chapter on functions. Graphing calculator usage is integrated throughout. After completing this text, a student will be prepared for trigonometry, finite mathematics, and business calculus.

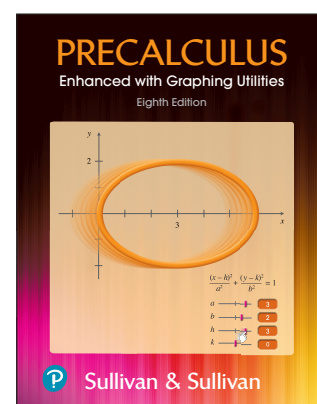

Algebra & Trigonometry, Eighth Edition

This text contains all the material in *College Algebra*, but it also develops the trigonometric functions using a right triangle approach and shows how that approach is related to the unit circle approach. Graphing techniques are emphasized, including a thorough discussion of polar coordinates, parametric equations, and conics using polar coordinates. Vectors in the plane, including the dot product, sequences, induction, and the binomial theorem are also presented. After completing this text, a student will be prepared for finite mathematics, business calculus, and engineering calculus.

Precalculus, Eighth Edition

This text contains a review chapter before covering the traditional precalculus topics of functions and their graphs, polynomial and rational functions, and exponential and logarithmic functions. The trigonometric functions are introduced using a unit circle approach and show how it is related to the right triangle approach. Graphing techniques are emphasized, including a thorough discussion of polar coordinates, parametric equations, and conics using polar coordinates. Vectors in the plane and in space, including the dot and cross products, sequences, induction, and the binomial theorem are also presented. Graphing calculator usage is integrated throughout. The final chapter provides an introduction to calculus, with a discussion of the limit, the derivative, and the integral of a function. After completing this text, a student will be prepared for finite mathematics, business calculus, and engineering calculus.

Preface to the Instructor

As professors at an urban university (Michael Sullivan) and a community college (Michael Sullivan III), we are aware of the varied needs of students in this course. Such students range from those who have little mathematical background and are fearful of mathematics courses to those with a strong mathematical education and a high level of motivation. For some of your students, this will be their last course in mathematics, whereas others will further their mathematical education. We have written this text with both groups in mind.

As a teacher, and as an author of precalculus, engineering calculus, finite mathematics, and business calculus texts, Michael Sullivan understands what students must know if they are to be focused and successful in upper-level math courses. As an instructor and an author of a developmental mathematics series, Michael's son and co-author, Michael Sullivan III, understands the trepidations and skills that students bring to the College Algebra course. As the father of current college students, Michael III realizes that today's college students demand a variety of media to support their education. This text addresses that demand by providing technology and video support that enhances understanding without sacrificing math skills. Together, we have taken great pains to ensure that the text offers solid, student-friendly examples and problems, as well as a clear and seamless writing style.

A tremendous benefit of authoring a successful series is the broad-based feedback we receive from teachers and students. We are sincerely grateful for their support. Virtually every change in this edition is the result of their thoughtful comments and suggestions. We are confident that, building on the success of the first seven editions and incorporating many of these suggestions, we have made *College Algebra Enhanced with Graphing Utilities*, 8th Edition, an even better tool for learning and teaching. We continue to encourage you to share with us your experiences teaching from this text.

Features in the Eighth Edition

A descriptive list of the many special features of *College Algebra* can be found in the front of this text. This list places the features in their proper context as building blocks of an overall learning system that has been carefully crafted over the years to help students get the most out of the time they put into studying. Please take the time to review this and to discuss it with your students at the beginning of your course. Our experience is that when students utilize these features, they are more successful in the course.

New to the Eighth Edition

New Within the Textbook

All of the exercises and examples in the text have been reviewed and analyzed, and we have incorporated feedback from users of the text. All time-sensitive problems have been updated to the most recent information available. Here are the new features of this edition:

- **Challenge Problems** – These problems appear in the Applications and Extensions part of the section exercises and are designed to challenge students. Full solutions are in the back of the Annotated Instructor's Edition and in the Instructor's Solution Manual.
- **"Need to Review?" feature** – We placed reminders in the margin for key review topics. The reminders point students to the location of the review material in the textbook.
- **Chapter Projects** – The projects have been enhanced to give students an up-to-the-minute experience. Many of these projects require the student to research information online in order to solve problems.
- **Interactive Figure Exercises** – We have added this new category of exercises that require students to manipulate an interactive figure to solve. The interactive figures may be found at bit.ly/2Mibga0 or in the Video and Resource Library of MyLab Math, and were created by author Michael Sullivan III in GeoGebra. These exercises are labeled with the icon .
- **Expanded! Retain Your Knowledge Problems** – These problems, which were new to the previous edition, are based on learning research, including a study of precalculus students at University of Louisville entitled "Spaced retrieval practice increases college students' short- and long-term retention of mathematics knowledge" (Hopkins et al, 2016). The Retain Your Knowledge problems were so well received that we have expanded them in this edition. Moreover, while the focus remains to help students maintain their skills, in most sections, problems were chosen that preview skills required to succeed in subsequent sections or in calculus () Δ). All answers to Retain Your Knowledge problems are given in the back of the text and these problems are available in the prebuilt assignments in the Assignment Manager in MyLab Math.
- **Key to Exercise Types** – To help you navigate the features of the exercise sets, we've included a key at the bottom of the first page of each section's exercises.

 **Now Work**  **1. Modeling** **1. Writing/Discussion**
 **Calculus Preview**  **Interactive Figure**

- **Graphing Utility Screen Captures** – In several instances we have added Desmos screen captures along with the TI-84 Plus CE screen captures. These updated screen captures provide alternative ways of visualizing concepts and making connections between equations, data, and graphs in full color.

Content Changes

Chapter R

- Section R.8 Objective 3 now includes rationalizing the numerator. Problems 69–76 provide practice.

Chapter 1

- Section 1.1 has been reorganized to only include an introduction to graphing and graphing utilities.

Chapter 2

- NEW Section 2.1 The Distance and Midpoint Formulas
- NEW Section 2.2 Example 5 Testing an Equation for Symmetry

Chapter 3

- NEW Section 3.1 Objective 1 Describe a Relation
 - NEW Example 1 Describing a Relation demonstrates using the Rule of Four to express a relation numerically, as a mapping, and graphically given a verbal description.
- NEW Section 3.2 Example 4 Expending Energy

Chapter 4

- Section 4.3 now introduces the concept of concavity for a quadratic function.
- NEW Section 4.3 Example 3 Graphing a Quadratic Function Using Its Vertex, Axis, and Intercepts
- Section 4.3 Example 8 Analyzing the Motion of a Projectile (formerly in Section 4.4)
- NEW Section 4.4 Example 4 Fitting a Quadratic Function to Data

Chapter 5

- Previous Section 5.1 has been revised and split into two sections:
 - 5.1 Polynomial Functions
 - 5.2 Graphing Polynomial Functions; Models
- NEW Section 5.2 Example 2 Graphing a Polynomial Function (a 4th degree polynomial function)

Chapter 6

- NEW Section 6.2 Objective Verify a Function Defined by an Equation is an Inverse Function

Chapter 8

- NEW Section 8.5 Example 1 Identifying Proper and Improper Rational Expressions

Chapter 9

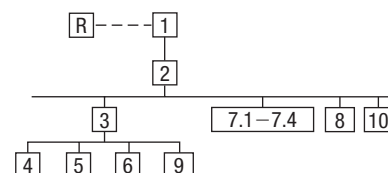

- NEW Section 9.3 Objective 5 Solving Annuity Problems Using Formulas

New Within MyLab Math

- **Setup & Solve Exercises** require students to show how they set up a problem as well as the solution, better mirroring what is required of them on tests. We have included both the “traditional” and Setup & Solve versions of exercise within MyLab to provide you with more options for assessing students.
- **Integrated Review** content and assessments help you provide students with the remediation they need, when they need it. Integrated Review consists of:
 - **Skills Check Quizzes** by chapter assess the prerequisite skills students need for that chapter.
 - **Skills Review Homework**, again by chapter, is personalized (based on the results of the Skills Check Quiz) to provide students with help on the prerequisite skills they are lacking. Students receive just the help they need—no more, no less.
 - **Intermediate Algebra eText, Exercises, Videos, and Worksheets**—For students who need more help (or for co-requisite courses), we’ve included the contents of a streamlined Intermediate Algebra course within this MyLab course. There’s no need to go elsewhere for remediation.
- **Interactive Figures** (formerly titled Guided Visualizations) have been expanded to support teaching and learning. The figures (created in GeoGebra by author Michael Sullivan III) illustrate key concepts and allow manipulation. They have been designed to be used in lecture as well as by students independently.
- **Enhanced Sample Assignments** are pre-made section-level assignments that address key concepts within the section and help keep previously learned skills fresh with Retain Your Knowledge questions. They are assignable and editable.

Using the Eighth Edition Effectively with Your Syllabus

To meet the varied needs of diverse syllabi, this text contains more content than is likely to be covered in a College Algebra course. As the chart illustrates, this text has been organized with flexibility of use in mind. Within a given chapter, certain sections are optional (see the details that follow the accompanying figure) and can be omitted without loss of continuity.

Chapter R Review

This chapter consists of review material. It may be used as the first part of the course or later as a just-in-time review when the content is required. Specific references to this chapter occur throughout the text to assist in the review process.

Chapter 1 Equations and Inequalities

Primarily a review of intermediate algebra topics, this material is a prerequisite for later topics. The coverage of complex numbers and quadratic equations with a negative discriminant is optional and may be postponed or skipped entirely without loss of continuity.

Chapter 2 Graphs

This chapter lays the foundation for functions. Section 2.5 is optional.

Chapter 3 Functions and Their Graphs

This is perhaps the most important chapter. Section 3.6 is optional.

Chapter 4 Linear and Quadratic Functions

Topic selection depends on your syllabus. Sections 4.2 and 4.4 may be omitted without loss of continuity.

Chapter 5 Polynomial and Rational Functions

Topic selection depends on your syllabus.

Chapter 6 Exponential and Logarithmic Functions

Sections 6.1–6.6 follow in sequence. Sections 6.7, 6.8, and 6.9 are optional.

Chapter 7 Analytic Geometry

Sections 7.1–7.4 follow in sequence.

Chapter 8 Systems of Equations and Inequalities

Sections 8.2–8.7 may be covered in any order, but each requires Section 8.1. Section 8.8 requires Section 8.7.

Chapter 9 Sequences; Induction; The Binomial Theorem

There are three independent parts: Sections 9.1–9.3, Section 9.4, and Section 9.5.

Chapter 10 Counting and Probability

The sections follow in sequence.

Acknowledgments

Texts are written by authors, but they evolve from idea to final form through the efforts of many people.

Thanks are due to the following people for their assistance and encouragement during the preparation of this edition:

- From Pearson Education: Dawn Murrin, for her substantial support, dedication, and energy; Jeff Weidenaar for his attention to detail, experience, editorial expertise, and genuine interest in this project; Peggy McMahon for directing the always difficult production process; Rose Kernan for handling liaison between the compositor and author; Stacey Sveum and Jordan Longoria for their creative and enthusiastic marketing this text; Marcia Horton for her continued support and genuine interest; Paul Corey for his leadership and commitment to excellence; and Peggy Lucas and the Pearson sales team

for their continued confidence and personal support of our texts.

- Accuracy checkers: Roger Lipsett read the entire manuscript and checked the accuracy of answers. Timothy Britt created the Solutions Manuals and accuracy-checked answers.
- Michael Sullivan III would like to thank his colleagues at Joliet Junior College for their support and feedback.

Finally, we offer our sincere thanks to the dedicated users and reviewers of our texts, whose collective insights form the backbone of each text revision.

The list of those to whom we are indebted continues to grow. If we've forgotten anyone, please accept our apology. Thank you to all.

Get the *most* out of MyLab Math

MyLab Math for *College Algebra Enhanced with Graphing Utilities 8e* by Michael Sullivan & Michael Sullivan III (access code required)

MyLab Math is tightly integrated with each author's style, offering a range of author-created resources, so your students have a consistent experience.

Preparedness

Preparedness is one of the biggest challenges in many math courses. Pearson offers a variety of content and course options to support students with just-in-time remediation and key-concept review as needed.

Integrated Review in MyLab Math

Integrated Review can be used in corequisite courses or simply to help students who enter a course without a full understanding of prerequisite skills and concepts. Premade, editable Integrated Review assignments are available to assign in the Assignment Manager.

- Students begin each chapter by completing a Skills Check to pinpoint which topics, if any, they need to review.

- Personalized review homework provides extra support for students who need it on just the topics they didn't master in the preceding Skills Check.

- Additional review materials including videos featuring Michael Sullivan III, worksheets, and Sullivan's *Algebra Review* text, are available.

| Topic | Video | Worksheet | Text |
|--|-----------------------|---------------------------|----------------------|
| Identify Polynomials and Determine their Degrees | Video | Worksheet | Text |
| Divide Two Monomials | Video | Worksheet | Text |
| Divide a Polynomial by a Monomial | Video | Worksheet | Text |
| Divide Two Polynomials | Video | Worksheet | Text |
| Divide Polynomials Using Synthetic Division | Video | Worksheet | Text |

Enhanced Sample Assignments

The Sullivans make course set-up easier by giving instructors a starting point for each section. Enhanced Sample Assignments use a thoughtful mix of Sullivan hallmark practice problems that are geared to maximize students' performance—including Retain Your Knowledge exercises that improve students' recall of concepts learned earlier in the course.

Video Program and Resources

Author in Action Videos are actual classroom lectures by Michael Sullivan III with fully worked-out examples.

- **Video assessment questions** are available to assign in MyLab Math for key videos.
- **Updated!** The corresponding **Guided Lecture Notes** assist students in taking thorough, organized, and understandable notes while watching Author in Action Videos.

EXAMPLE

Finding the Exact Value of a Logarithmic Expression

(a) $\log_3 81 = 4$ (b) $\log_2 \frac{1}{8}$

$y = \log_a x$ means $a^y = x$

(b) $y = \log_2 \frac{1}{8}$

$2^y = \frac{1}{8}$

$2^y = \frac{1}{2^3}$

$2^y = 2^{-3}$

$2^y = 2^{-3}$

$2^y = 2^{-3}$

$2^y = 2^{-3}$

Resources for Success

Instructor Resources

Online resources can be downloaded at **pearson.com/mylab/math** or from **www.pearson.com**.

Annotated Instructor's Edition

ISBN: 0135812577 / 9780135812570
Shorter answers are on the page beside the exercises.
Longer answers are in the back of the text.

Instructor's Solution Manual

Includes fully worked solutions to all exercises in the text.

Learning Catalytics Question Library

Questions written by Michael Sullivan III are available to deliver through Learning Catalytics to engage students in your course.

PowerPoint® Lecture Slides

Fully editable slides correlate to the textbook and include alternate classroom examples for every textbook objective.

Mini Lecture Notes

This guide includes additional examples and helpful teaching tips, by section.

TestGen®

TestGen (www.pearsoned.com/testgen) enables instructors to build, edit, print, and administer tests using a computerized bank of questions developed to cover all the objectives of the text.

Online Chapter Projects

Additional projects that give students an opportunity to apply what they learned in the chapter.

Student Resources

Additional resources to enhance student success.

Lecture Video

Author in Action videos are actual classroom lectures with fully worked-out examples presented by Michael Sullivan III. Videos are assignable within MyLab Math.

Chapter Test Prep Videos

Students can watch instructors work through step-by-step solutions to all chapter test exercises from the text.

Student's Solutions Manual

ISBN: 013581202X / 9780135812020
Provides detailed worked-out solutions to odd-numbered exercises. Available within MyLab Math and in print.

Guided Lecture Notes

ISBN: 0136434754 / 9780136434757
These lecture notes assist students in taking thorough, organized, and understandable notes while watching Author in Action videos. Students actively participate in learning the *how* and *why* of important concepts through explorations and activities. The Guided Lecture Notes are available as PDF's and customizable Word files in MyLab Math. They are also available in print format.

Algebra Review

ISBN: 0131480065 / 9780131480063
Four chapters of Intermediate Algebra review. Perfect for a corequisite course or for individual review. Available in print form; PDFs are also available within MyLab Math.

To the Student

As you begin, you may feel anxious about the number of theorems, definitions, procedures, and equations you encounter. You may wonder if you can learn it all in time. Don't worry, your concerns are normal. This text was written with you in mind. If you attend class, work hard, and read and study effectively, you will build the knowledge and skills you need to be successful. Here's how you can use the text to your benefit.

Read Carefully

When you get busy, it's easy to skip reading and go right to the problems. Don't! The text provides a large number of examples and clear explanations to help you break down the mathematics into easy-to-understand steps. Reading will provide you with a clearer understanding, beyond simple memorization. Read before class (not after) so you can ask questions about anything you didn't understand. You'll be amazed at how much more you'll get out of class when you do this.

Use the Features

We use many different methods in the classroom to communicate. Those methods, when incorporated into the text, are called "features." The features serve many purposes, from supplying a timely review of material you learned before (just when you need it), to providing organized review sessions to help you prepare for quizzes and tests. Take advantage of the features and you will master the material.

To make this easier, we've provided a brief guide to getting the most from this book. Refer to the "Prepare for Class," "Practice," and "Review" guidelines on the first three pages of this book. Spend fifteen minutes reviewing the guide and familiarizing yourself with the features by flipping to the page numbers provided. Then, as you read, use them. This is the best way to make the most of your text. In this edition, we've also added a handy key to the labeling of the homework exercises so that you know what the colors and icons mean:

 **Now Work**  **1. Modeling**  **1. Writing/Discussion**  **Calculus Preview**  **Interactive Figure**

Please do not hesitate to contact us via Math@Pearson.com with any questions, comments, or suggestions about ways to improve this text. We look forward to hearing from you, and good luck with all of your studies.

Best Wishes!

Michael Sullivan
