

Do You Know Revel? – History Video TRANSCRIPT

There it is. And there. And there.

When your student lights up because they just got it. You watch it in real time, and you can't get enough of it. Let's make it happen more often.

Enter Revel. A digital learning platform that makes your students feel the connection between their classroom and the world.

Revel doesn't just bring learning to life; it brings real life to learning.

Students will experience history in your class, so they'll be ready when the time comes to make their own.

Let's take a look at Revel History.

History 360 interactives immerse students into the settings of historic sites, allowing them to explore sites independently or be guided by audio narration.

Compelling video, including author-narrated videos, enhances the narrative.

Artifacts as Evidence videos, produced in partnership with the Smithsonian, present unique artifacts from the Smithsonian collection to illuminate the American historical experience.

Interactive Maps help students visualize events and periods in history, enabling them to make clearer connections across time.

End-of-chapter source collections, inclusive of header notes, questions, and audio, contain seven to ten resources that are relevant to the chapter content.

History tells us that great leaders aren't born, they're made, and as a recognized leader in instructional solutions technology, we couldn't agree more.

Revel inspires and empowers students to apply their learning, not just in your course, but in their lives today, and their future careers.
